OREGON BUSINESS AWARD

2005 PHILANTHROPY AWARD

FOR OUTSTANDING CONTRIBUTION IN SUPPORT OF EDUCATIONAL EXCELLENCE

LEED GOLD, US GREEN BUILDING CERTIFICATION

PLACED 9TH OF 100 BEST GREEN COMPANIES IN OREGON

VERNIER IS PROUD TO BE RECOGNIZED FOR ITS PHILANTHROPIC COMMITMENT, ENVIRONMENTAL POLICY, STEADY GROWTH, AND AS ONE OF THE BEST 100 COMPANIES TO WORK FOR IN OREGON FOR 10 YEARS IN A ROW.

This is the year of the "Mini." We are extremely excited about two new products with that term in their name. Our Mini GC is a revolutionary new gas chromatograph that will bring this technology to labs that never could have afforded it before.

Our LabQuest Mini is another great step we are taking to make computer data collection much less expensive. LabQuest Mini has almost all the features of a LabQuest, without the screen, and for less than half the price. When you combine that with some of the new low-cost computers, you can set up a very powerful data-collection system at an affordable price.

One of the interesting things about being in this business so long is that we see how things have changed—for the better. Twenty years ago, we introduced the Universal Lab Interface (ULI). It sold for $350 (and those were 1989 dollars). Now, LabQuest Mini does much more, much faster, for $149!

Our engineering and product design teams have been busy with new sensors and accessories for physics, chemistry, biology, and engineering education. We also introduced some great new books this year: *Investigating Chemistry through Inquiry, Physics with Video Analysis,* and a new STEM book that includes projects and labs using the LEGO NXT.

As for company news, we are pleased to have again been chosen as one of the "100 Best Companies to Work for in Oregon" (for the 10th year) and as one of the "100 Best Green Companies in Oregon" (placing ninth in the top one hundred). Vernier Software & Technology was also awarded the "Business Partner Conservation Leadership Award" from The Nature Conservancy.

As always, we encourage you to give our products a try on a 30-day (or longer) preview basis. Feel free to contact either of us personally at any time. Over the years, we have learned a lot from our customers, and we continue to listen. We look forward to hearing from you!

Dave and Christine Vernier

cvernier@vernier.com

VERNIER SOFTWARE & TECHNOLOGY

Vernier Software & Technology was co-founded in 1981 by Dave and Christine Vernier. Dave's background as a physics teacher and Christine's knack for business combined to form a company with a deep commitment to education.

Twenty-nine years later, the company is still owned by Christine and Dave, along with eight employee owners who have backgrounds in science and math education, as well as business.

WHAT'S NEW

NEW!

NEW LabQuest® Mini

Collecting data exclusively on computers or netbooks? LabQuest Mini may be the perfect solution for you.

LabQuest Mini brings the power of Vernier's award-winning LabQuest technology to teachers who don't need the versatility of a standalone device. The perfect solution for educators collecting data with a computer, LabQuest Mini interfaces with Logger *Pro* software for unparalleled power, analysis, and curricular support.

Pages ***10–11*** ONLY **$149**

NEW Mini GC®

Analyzing compounds in general chemistry and organic chemistry is now easier and more affordable with Vernier's new gas chromatograph. Students from high school to college can learn to separate and identify compounds using technology that is thousands of dollars less than a traditional GC. Unique features include:

- Use room air as a carrier gas
- Enjoy a small footprint for your lab bench—Mini GC is half the size of a shoe box
- Connect via USB to either a computer or to LabQuest as a standalone device

Pages ***34–35*** ONLY **$1,749**

NEW Improved SpectroVis® Plus

Vernier has updated its popular spectrometer with improved features:

- Improved range: 380–950 nm (VIS-NIR)
- 1 nm between reported values
- Improved optical resolution (~2.5 nm)
- New support for fluorescence

Biology, page ***26****; Chemistry, pages* ***40-41*** ONLY **$449**

NEW Watts Up Pro Sensor

Looking to monitor real-time electricity usage and cost? Investigate the energy use of common devices found in the classroom.

*Page **115***

NEW Tris-Compatible Flat pH Sensor

This double-junction pH sensor is compatible with Tris buffers and solutions containing proteins. The flat shape is useful for food and soil pH measurements.

*Page **108***

NEW *STEM 2 with Vernier and LEGO® MINDSTORMS® NXT*

This new STEM education lab book covers core topics in physical science.

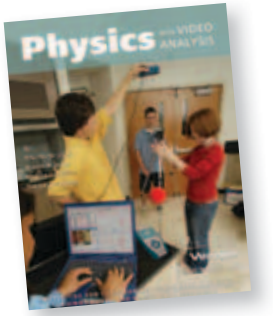
- 12 ready-to-use experiments
- 8 design-and-build robotics projects
- Essential teacher information

*Pages **44-45***

NEW *Investigating Chemistry through Inquiry* lab book

Reviewed and recommended by NSTA, this lab book contains 25 inquiry-based chemistry investigations.

*Page **37***



NEW *Physics with Video Analysis* lab book

Appropriate for both high school and college, this new lab book contains video analysis experiments covering topics in kinematics, dynamics, circuits, sound, electrostatics, and more.

*Page **74***

NEW National Instruments LabVIEW Education Edition Software

This popular college engineering software is now available as a high school edition.

See also our new lab book, *Hands-On Introduction to NI LabVIEW™ and Vernier SensorDAQ®*. See page 52.

*Page **51***

NEW Spectrum Tube Single Power Supply

The Spectrum Tube Power Supply now provides a simple means of viewing gas discharge spectral lines with any spectrometer that Vernier carries.

*Page **70***

NEW Electrostatics Kits

Want to study electrostatics with the Vernier Charge Sensor? We offer two new kits that provide the accessories to perform a range of experiments in electrostatics, including the use of Faraday's Ice Pail, charging by induction, charge distribution, and more.

*Page **71***

NEW Power Amplifier Accessory Speakers

This kit includes a speaker and accessories that can be used with the Vernier Power Amplifier to study standing waves on a string, resonance in simple harmonic motion, and more.

Breakthrough data-collection technology—the Vernier LabQuest®

Presenting the most powerful and intuitive interface for science education. Engage your students with hands-on science in your classroom or in the field.

Use it as a standalone device or as a computer interface with our award-winning Logger *Pro* software. Created with today's classroom in mind, you will love its durability, vivid color touch screen, and ease of use. And, of course, since it was developed by Vernier, it is backed by comprehensive curriculum, a generous warranty, and legendary support.

Collect buttons

Navigation keys
Provides quick access to key features

Built tough. Built to last.
Designed with students in mind, the rubber overmolding and rugged mechanical design provide protection against everyday bumps, falls, and splashes

Stylus

Built-in microphone
Record voice annotations or collect sound data

- 320 x 240 color graphic display
- LED backlighting provides you with outstanding clarity in the classroom or in the field

Built-in temperature sensor

Fast sampling rate
100,000 samples per second

Rechargeable batteries
High quality, lithium-ion rechargeable battery pack usually lets you go a school day before recharging. [Note: some sensors and types of experiments require more charge than others, so a brief mid-day charge may be necessary.]

Included with LabQuest: LabQuest unit; power adapter; USB cable; CD containing Logger Lite software, LabQuest reference guide, Flash introduction, LabQuest Emulator Software; Quick-Start Guide; 2 Styluses; Stylus tether

Six sensor ports
- Provides maximum versatility
- Compatible with your existing Vernier sensors

Computer interface
Connect LabQuest to a Windows or Macintosh computer via USB to collect data in Logger *Pro*.

Stylus

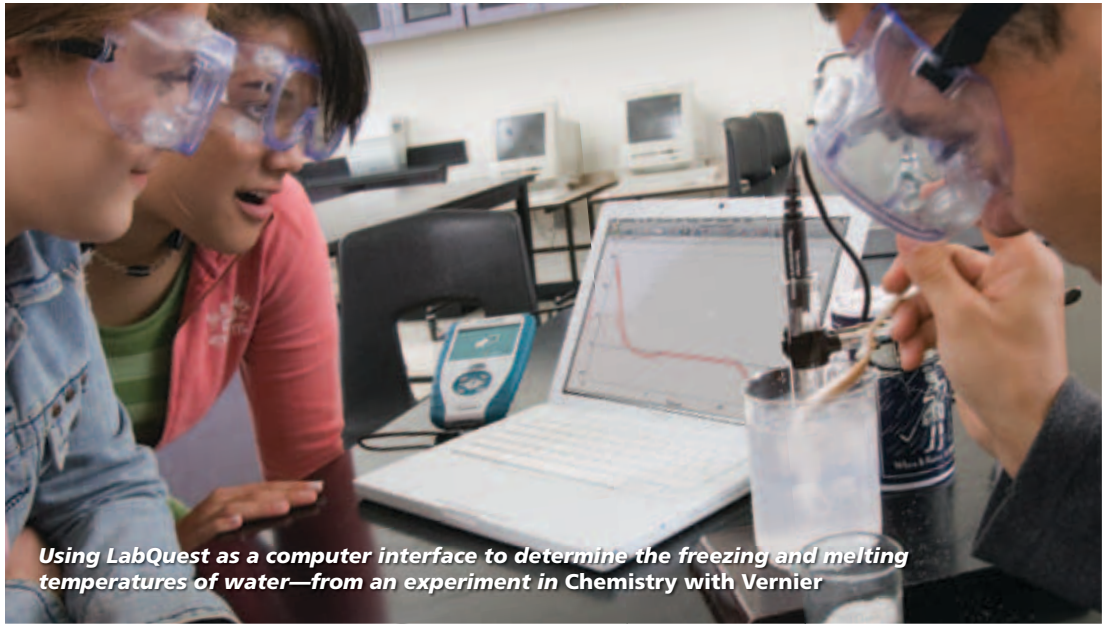
Audio in

Power
Connect to power and recharge LabQuest's built-in battery

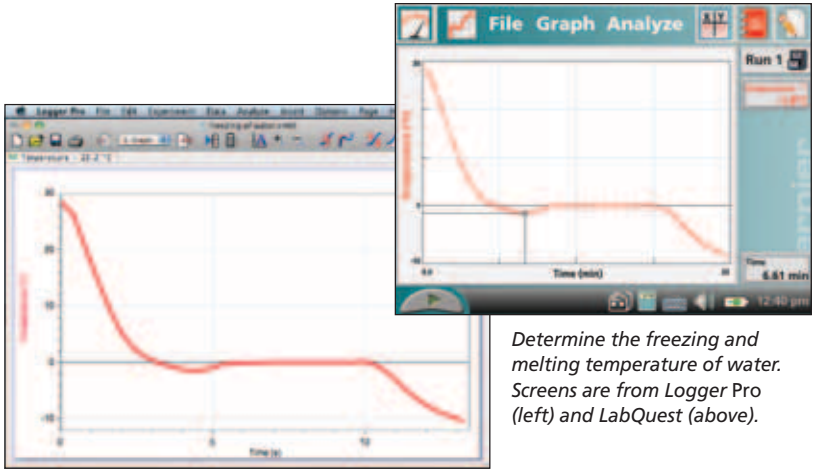
Audio out
Use audio out to connect headphones or speakers

SD/MMC card slot

USB Peripherals expansion
Connect to a printer, Flash drive, or other devices using USB



Using LabQuest as a computer interface to determine the freezing and melting temperatures of water—from an experiment in Chemistry with Vernier



Determine the freezing and melting temperature of water. Screens are from Logger Pro (left) and LabQuest (above).

Easily download your data from LabQuest to a computer for further analysis with Logger *Pro* Software.

For more information about Logger *Pro*, see pp. 14–17

- Choose from 66 compatible sensors
- Buy with confidence knowing LabQuest is backed by a 5-year warranty

MultiMedia & Internet@Schools

Built Tough

Meet our durability testers. Students are tough. We built the Vernier LabQuest interface with rugged reliability in mind. The Vernier LabQuest is designed to withstand a fall from a lab bench. It is splash resistant and holds a battery charge for your entire school day. So go ahead—teach your young scientists about real-world data analysis. Vernier will be there to support you with tough technology. [Note: some sensors and types of experiments require more power than others, so a brief mid-day charge may be necessary.]

Environmental Specifications:

- 0 – 70°C
- Splash and moisture resistant
- Rugged enclosure with rubber molding for shock absorption

Print Directly from LabQuest

LabQuest can print directly to most HP printers. Simply connect LabQuest to the printer with a standard USB cable and choose Print from the File menu. Choose full-color or grayscale, and you'll get a full-size print in moments. See **www.vernier.com/labqprinters** for details.

NEW WiFi USB Adapter

Add wireless connectivity to your LabQuest with the Vernier WiFi USB Adapter. See our web site **www.vernier.com/labqwifi** for details.

$59 ORDER CODE **WIFI-USB**

$5 ORDER CODE **LQ-LAN**

LabQuest Lanyard

This lanyard connects to the back of your LabQuest and gives students even more freedom to explore. Best of all, you don't have to worry about students dropping their interface during field studies.

NEW LabQuest Charging Station

Multi-bay charging capability for your LabQuest

Want a way to charge and store your LabQuests? The LabQuest Charging Station is the perfect solution. Each charging station has four charging slots. LEDs on the charging station indicate the charging status. The compact design uses desk space efficiently. Because the charger holds four LabQuests, it is easy and affordable to accommodate small and large lab setups.

My LabQuest Library

Vernier has embedded over 100 of our most popular science experiments into LabQuest. My LabQuest Library allows you to create, customize, organize, and download labs to LabQuest for the entire class.

Project your lab to the classroom

FREE LabQuest Emulator Software

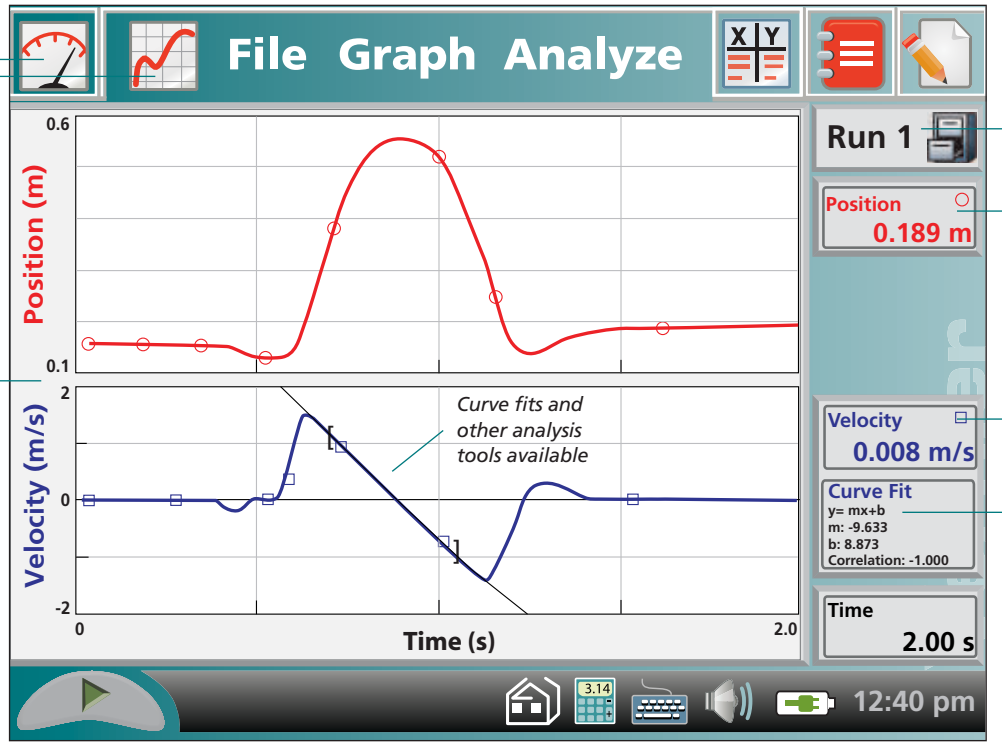
Looking for a way to project your LabQuest for an entire class to see? Connect your LabQuest to a computer running LabQuest Emulator software and project onto a screen or interactive whiteboard. *Runs on Windows XP, Vista, and Windows 7.*

Included with purchase of LabQuest or as a free download from **www.vernier.com/labquest/emulator**

LabQuest training videos

Watch as our teacher trainers guide you through several Vernier labs. These seasoned experts offer their favorite tips for collecting great data.

Go to **www.vernier.com/videos**



Quick access to graphs, tables, and meters

One or two high resolution plots of data are displayed in real time.

Multiple runs can easily be stored and recalled later.

Live display of sensor data

Curve fit statistics are displayed.

Built-In Software

ANALYSIS FEATURES

- Perform linear and curve fits
- Draw a prediction before collecting data
- Display two graphs at once
- Display a tangent line on the graph
- Autoscale
- Integral function
- Statistics

BUILT-IN APPLICATIONS

- Stopwatch
- Periodic table
- On-screen keyboard
- Scientific calculator
- Audio Function Generator
- Power Amplifier (requires Vernier Power Amplifier)

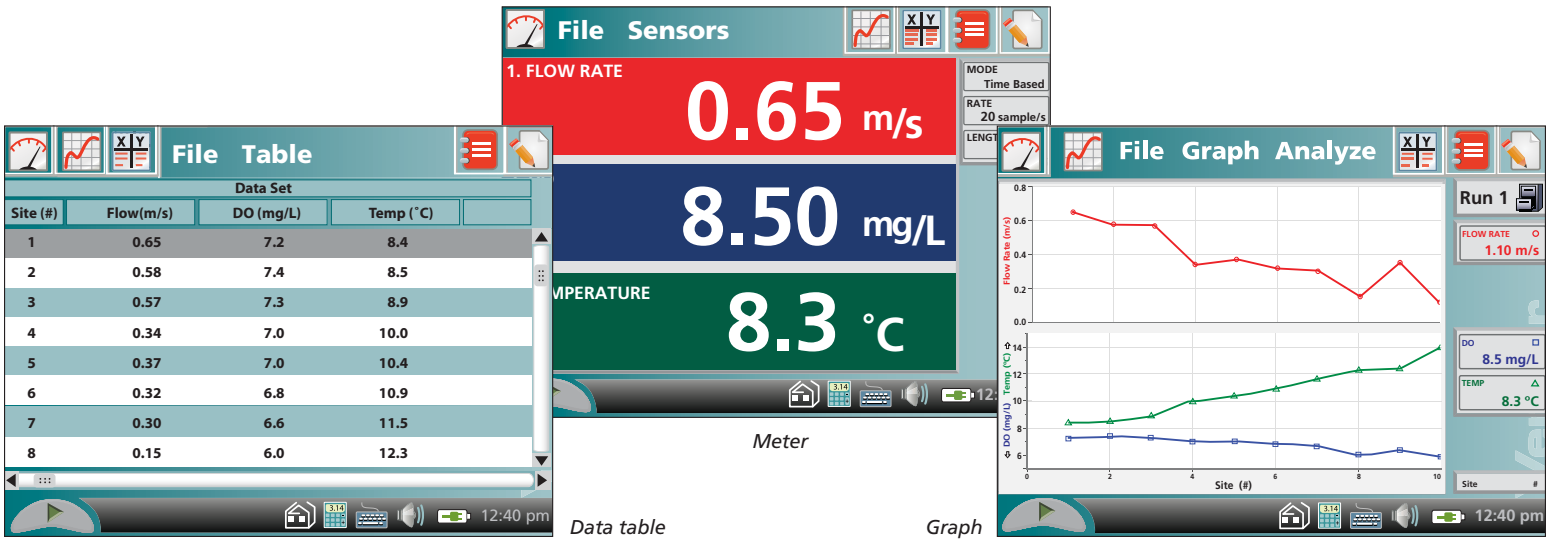
OTHER GREAT FEATURES

- Export data to Logger *Pro*
- More than 100 preloaded lab instructions from Vernier's popular lab books
- Notes field
- Voice annotation with internal microphone
- Find slopes, fit a line to a portion of your data, and display position data and its derivatives

One-Touch Simplicity

The LabQuest Graphing and Analysis Application gives your students real-time graphing capabilities in a handheld device. It's powerful—yet beautifully simple.

Your students can collect data and view them in a **Meter, Data Table,** and **Graph View.**

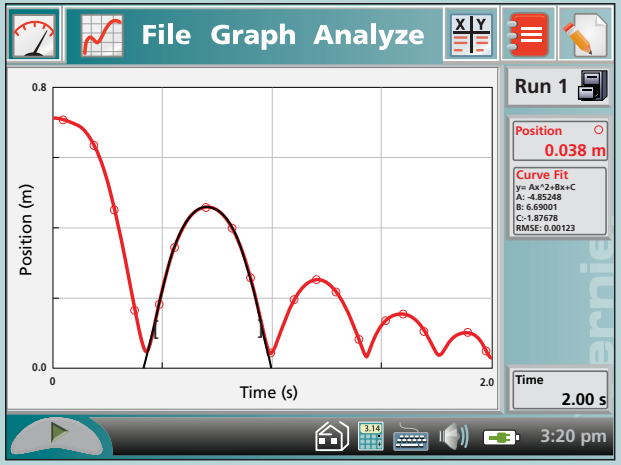


Meter

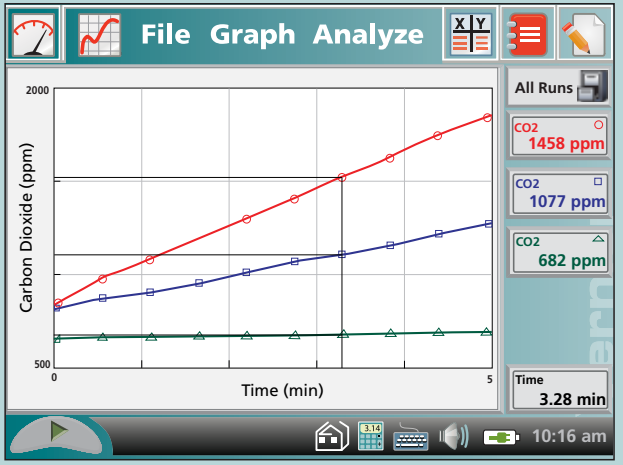
Data table

Graph

Data analysis and other applications at your fingertips



Collect position data. Show students how the ball bounces and fit a curve to your data.



Collect and display data for several sensors or runs on one graph.

VERNIER LABQUEST® MINI

Powerful. Affordable. Easy to Use.

LabQuest Mini brings the power of Vernier's award-winning LabQuest technology to teachers who don't need the versatility of a standalone device. The perfect solution for educators collecting data with a computer, LabQuest Mini interfaces with Logger *Pro* software for unparalleled power, analysis, and curricular support.

$149 ORDER CODE LQ-MINI

Key features include:

- 100 kHz maximum sampling rate gives you the unrivaled power of LabQuest
- Five sensor ports give you the flexibility to choose from 54 compatible sensors.
- Logger Lite software gets your students collecting, graphing and analyzing data. And the best part? It is free with purchase.

Five Total Sensor Ports

Three Sensor Ports
For use with 48 compatible sensors such as temperature, pH, and Gas Pressure Sensors.

Two Digital Sensor Ports
For use with motion detectors, photogates, radiation monitors, rotary motion sensors, and drop counters.

Collecting data exclusively on computers or netbooks?

LabQuest Mini may be perfect for you!

- Comes with FREE Logger Lite Software to get your students quickly collecting and analyzing data.
- Looking for more advanced features than Logger Lite provides? Our award-winning Logger *Pro* 3 software provides advanced analytical features including video analysis. See pp. 14–17 for additional details.
- Use with over 16 Vernier lab books covering core topics in Biology, Chemistry, Earth Science, Environmental Science, Physical Science, Physics, Physiology, and Water Quality.

Go!Link USB Interface

A quick and affordable way to get started with data-collection technology.

- Single-channel interface connects any one of 46 Vernier sensors to your computer's USB port. (See list of sensors.)
- Dozens of experiments from our popular lab books can be conducted using Go!Link.

Go!Link, ORDER CODE **GO-LINK, $61**

Includes Logger Lite Software

Teacher Pack of 8 Go!Links, ORDER CODE **GL-TP, $473**

Includes Logger Lite Software

ONLY $61

FREE Logger Lite Software

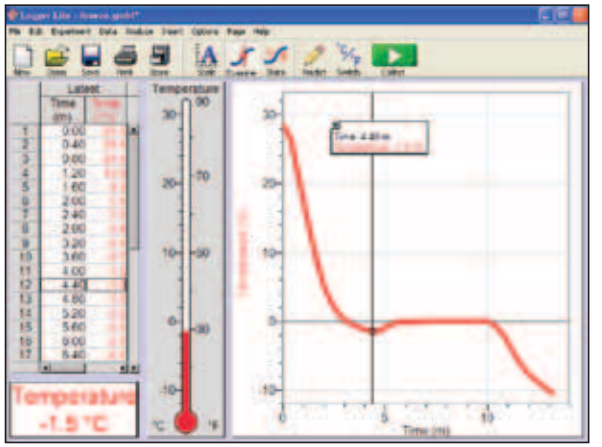
Real-Time Graphing

Go!Link, Go!Temp and Go!Motion include Logger Lite software with purchase.

PROMETHEAN ACTIVBOARD ENABLED

Rather than tell students that water changes state at 0°C, let them see it for themselves! You can also investigate magnetic fields, gravity, and force with hands-on exploration and activities to help reinforce scientific concepts.

- Collect data using one or more sensors
- Calculate statistics
- Store runs
- Annotate graphs
- Print graphs
- Write reports
- Easily export data and graphs
- And much more!



Want to import experiment movies and synchronize data with video? You'll want Logger *Pro*.

Logger *Pro* 3

Logger *Pro* 3 software, ORDER CODE **LP, $189**

For more advanced software features, buy just one copy—site license for **ALL school and students' personal computers** is included! See pp. 14–17 for details.

Go!Temp

USB Temperature Probe

Collect temperature data for only $39! Go!Temp plugs directly into your computer's USB port without the need for an additional interface. This rugged, stainless-steel temperature probe will engage your students in hands-on science as they explore temperature investigations.

Go!Temp
ORDER CODE **GO-TEMP, $39**
Includes Logger Lite Software

ONLY $39

Teacher Pack of 8 Go!Temps
ORDER CODE **GT-TP, $299**
Includes one copy of Logger Lite Software

Media & Methods AWARDS PORTFOLIO WINNER 2005

TECHNOLOGY & LEARNING WINNER 2004 Award of EXCELLENCE

MultiMedia & Internet@Schools

Go!Motion VERNIER

USB Motion Detector

- Teach important concepts in physics and physical science, such as position, velocity, and acceleration.
- Study the motion of a ball tossed in the air or a cart on a ramp.
- Engage your students with hands-on activities.

Go!Motion
ORDER CODE **GO-MOT, $99**
Includes Logger Lite Software

Technology & Learning WINNER 2005 Award of EXCELLENCE

ONLY $99

Teacher Pack of 8 Go!Motions
ORDER CODE **GO-MOT-TP, $768**
Includes one copy of Logger Lite Software

Head pivots to match the needs of your experiment.
Sensitivity switch lets you customize settings to your experiment. Objects can be as close as 15 cm and as far away as 6 m.
Connects directly to a USB port. (USB cable included.)
GoMotion
Vernier

MORE ONLINE
Go! Motion can also be used with Logger *Pro* software. Go! Motion can be used with LabPro, LabQuest, LabQuest Mini, CBL 2, or a TI graphing calculator. Visit our web site for more information at **www.vernier.com/gomotion**

Go! Quick-Start Package

Includes:

- Go! Link interface and FREE Logger Lite Software
- Our award-winning Go!Temp USB temperature probe
- A TI Light Probe for measuring light intensity

Logger *Pro* 3

Real-Time Graphing and Powerful Analytical Tools

Logger *Pro* is our flagship data-collection and analysis application for Windows and Mac. With the complete suite of data collection and analysis tools, Logger *Pro* is suitable for all students, beginning to advanced.

Don't need all this power, or working with younger students? Logger Lite, a streamlined subset of Logger *Pro*, is included free with every LabQuest, LabQuest Mini, Go!Temp, Go!Link and Go!Motion.

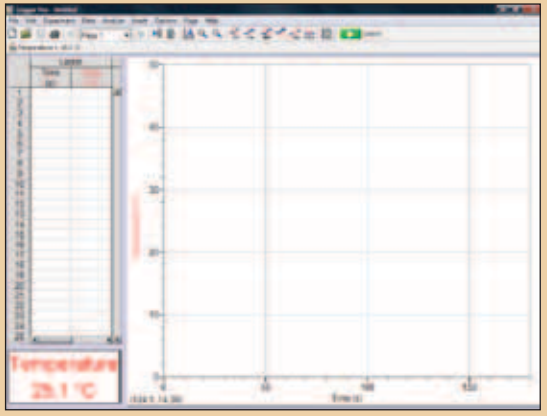
- Logger *Pro* is the most popular data-collection program in science education. Why? Teachers tell us that students find our software to be very easy and intuitive to use.
- One program does it all—for only $189—for all of your computers AND your students' personal computers.
- Think of Logger *Pro* as the digital data hub of your classroom and lab. It can gather data from a variety of sources, including LabQuest, LabQuest Mini, LabPro, Go! devices, Ohaus balances, TI graphing calculators, spectrometers, GPS units, manual entry, and more.

AWARD-WINNING

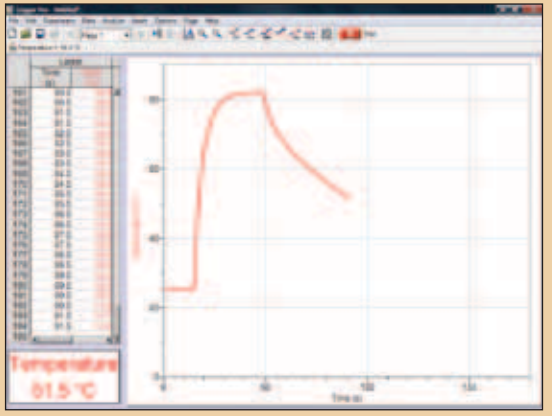
GREAT VALUE

$189 ORDER CODE **LP** **Logger *Pro* 3**

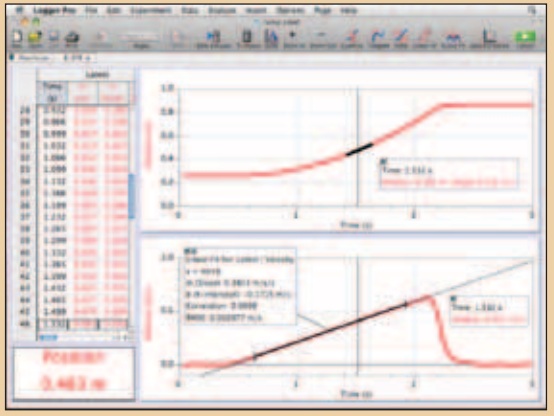
- Logger *Pro* 3 includes a site license for your entire school or college department.
- Site license includes home computers of faculty.
- Site license includes home computers of students—let them take it home!
- No need to count computers to satisfy licensing.
- Updates to Logger *Pro* 3 are free.



Logger Pro *at first launch with a temperature sensor. Graph, data table, and meter—all ready to go. Click Collect, and you're taking data.*



After you click Collect, Logger Pro *draws the graph in real time, and the data table and digital meter update continuously.*

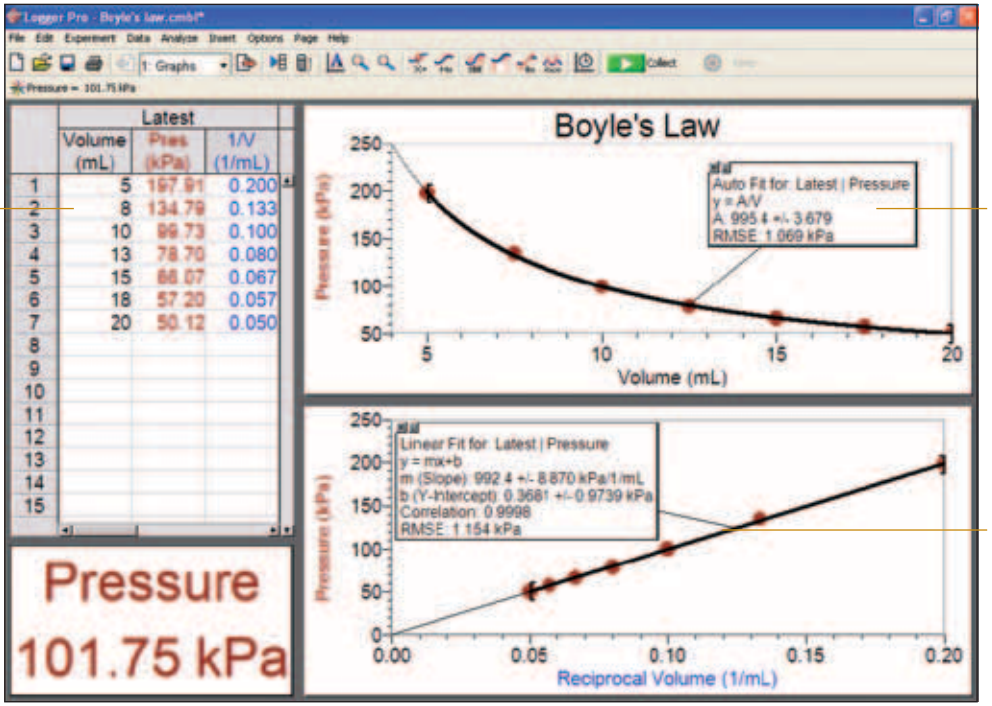


Draw tangent lines to find local slopes, fit lines to selected regions—the analysis tools you need are at your fingertips in Logger Pro.

Basic Features

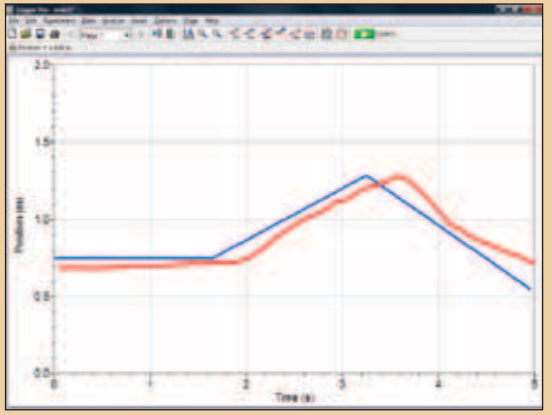
- Ease of use: connect a sensor, launch Logger *Pro*, and click Collect. Auto-ID sensors make setup effortless.
- Collect live data from more than 72 different sensors and devices.
- Draw predictions on a graph before collecting data.
- Use a variety of data-collection modes as needed for your experiment: time-based data, selected events, events with typed-in entries, photogate, radiation counting, and more.
- Manually enter data for graphing and analysis. All of the functions of Vernier's popular Graphical Analysis program are available in Logger *Pro*.
- Import data from LabQuest and calculators.
- Lay out graphs, tables, and text as needed across multiple pages to describe your experiment.
- Read values and slope from graphs using examine and tangent line tools.
- Print graphs and data tables.

See data presented in many ways: tables, graphs, curve fits, and more.

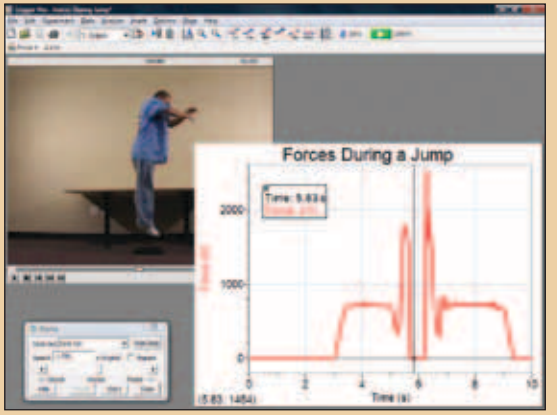


Curve fits show uncertainties in fit parameters. Choose from a library of built-in functions or enter your own.

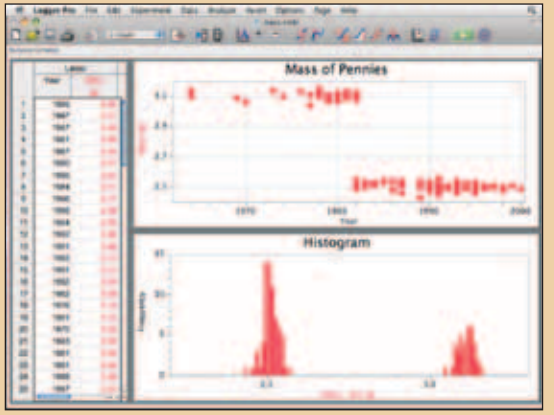
Replot data to show new relationships.



Logger Pro *will automatically create target graphs for graph-matching exercises.*

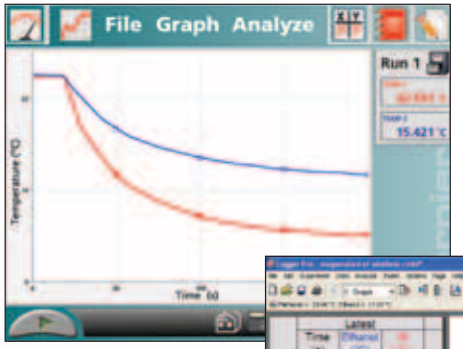


Synchronize videos to sensor data.

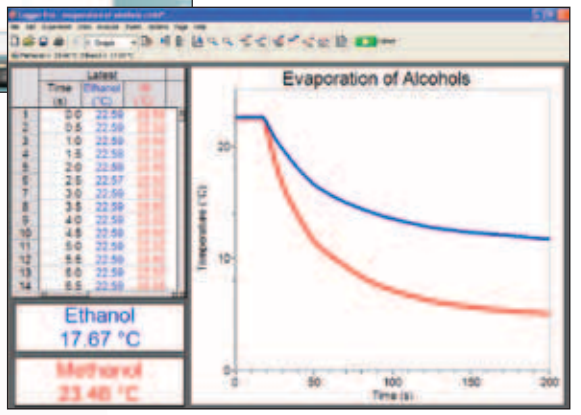


Logger Pro *has all the features of Graphical Analysis. Type or paste in data from other places and use all the analysis features in Logger* Pro.

Easily download your data from the LabQuest to a computer for further analysis with Logger *Pro* software.



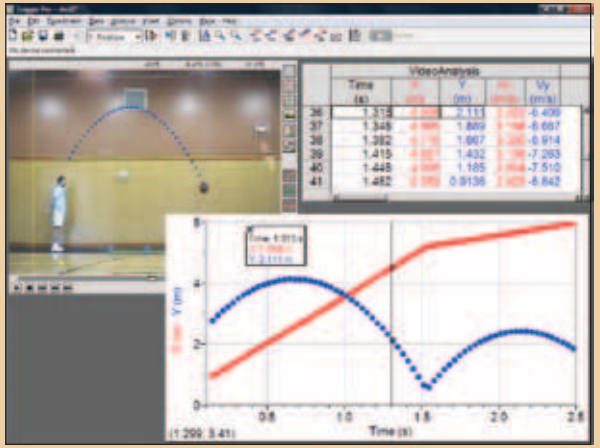
LabQuest



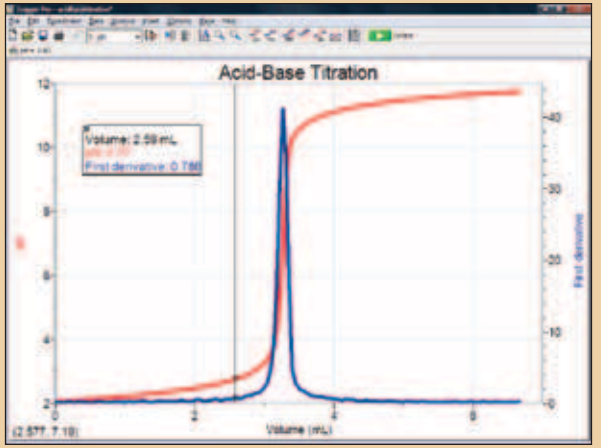
Logger Pro

Advanced Features

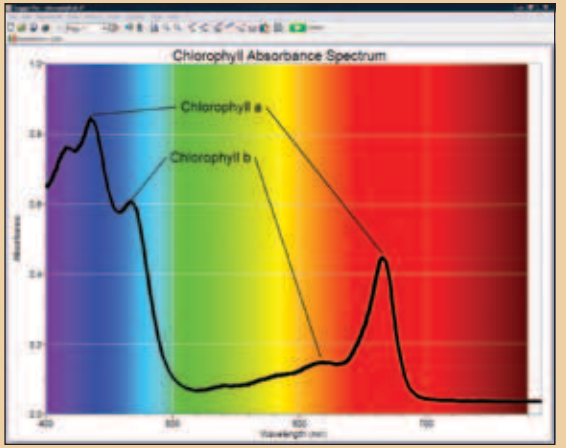
- Graph data in a variety of ways, including XY graphs, log graphs, double-Y graphs, strip charts, and FFT graphs.
- Model data with user-adjustable functions.
- Extract data from movies using frame-by-frame video analysis.
- Capture videos from DV cameras and web cameras.
- Play back movies synced to sensor data.
- Gel electrophoresis analysis.
- Calculated columns allow you to graph new quantities such as kinetic energy.
- Time of day and date stamps for graphing.
- Ocean Optics spectrometer support.
- GPS support.
- GC peak analysis.
- Manual configuration mode for IB courses.



Analyze videos to study two-dimensional motion. This is worth the price of Logger Pro *alone!*



Create double-Y graphs to tell complex stories simply.



Collect absorbance data from the Vernier Spectrometer, Ocean Optics spectrometers, or Vernier SpectroVis Plus.

LOGGER *PRO* IS COMPATIBLE WITH:

	Vernier LabQuest	Collect live data from LabQuest, retrieve existing data, or open saved files on LabQuest. Compatible with 66 different sensors.		**Digital Bioimaging Systems / ProScope HR**	Capture images and study DNA with Logger *Pro*'s gel analysis feature.
	Vernier LabQuest Mini	Connect a LabQuest Mini and use 54 different sensors.		**Vernier Mini GC**	Collect and analyze GC data with peak analysis features.
	Vernier LabPro	Connect a LabPro to collect data with 55 sensors.		**TI Graphing Calculators**	Use a TI Connectivity Cable to import data into Logger *Pro* from any TI graphing calculator, including TI-Nspire in 84-mode.
	Go!Temp **Go!Link** **Go!Motion**	Connect any of our Go! sensors and get advanced analysis tools in Logger *Pro*.		**Vernier GPS Sensor**	Import longitude and latitude from GPS receivers.
	Wireless Dynamics Sensor System	See real-time graphing of acceleration, force, and altitude data via wireless Bluetooth connection.		**Video Clips**	Capture video clips and synchronize with sensor data or perform video analysis.
	Spectrometers	Collect data directly from Ocean Optics spectrometers and Vernier SpectroVis Plus.		**Manual Entry**	Enter data manually, do further analysis, or write lab reports.

Logger *Pro* is great for YOUR students

Logger *Pro* is great for high school students

- Calculated columns allow graphing of derived data; for example, plot the square of the pendulum length for one axis
- Modeling feature lets students superimpose mathematical functions on their data

Logger *Pro* is great for middle school students

- Easy unit switching helps teach measurement units
- Data export to InspireData™
- Time-of-day graphs for weather or other long-term studies

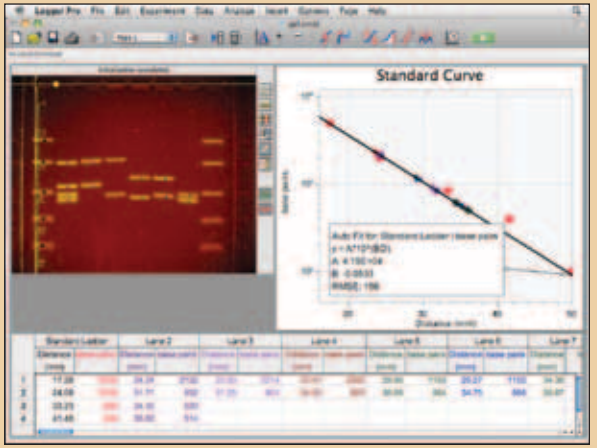
Logger *Pro* is great for college students

- Includes advanced graphing features like log graphs and semilog graphs
- Custom curve fits allow sophisticated models
- Compatible with advanced Ocean Optics spectrometers

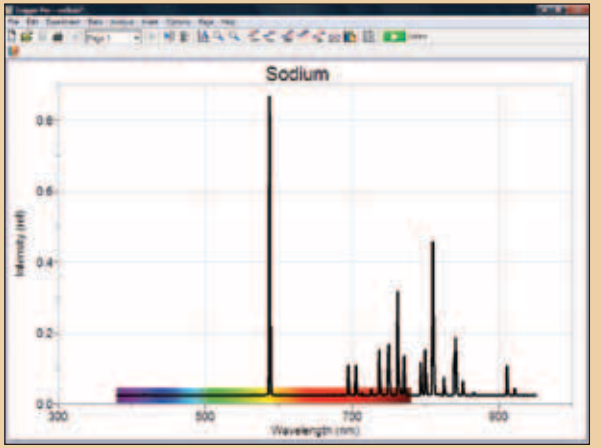
Logger *Pro* 3, ORDER CODE **LP, $189**
One CD for Mac OS X and Windows

Logger *Pro* Student 5-Pack, ORDER CODE **LP-ST5, $10**

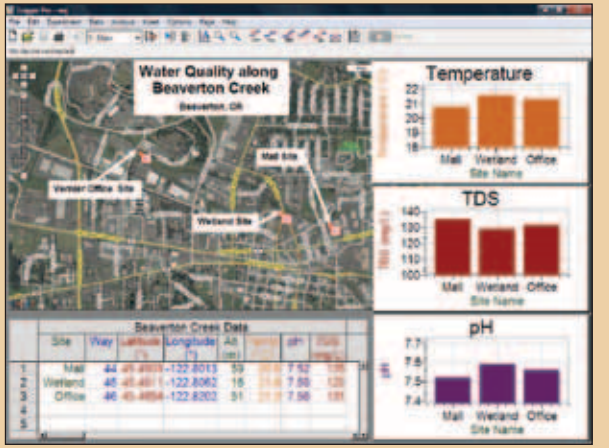
See **www.vernier.com/loggerpro**
for upgrade and system compatibility information



Use one of our digital bioimaging systems, along with Logger Pro*, to analyze gel electrophoresis data.*



Use the Ocean Optics Red Tide Spectrometer to study emission lines from discharge lamps.

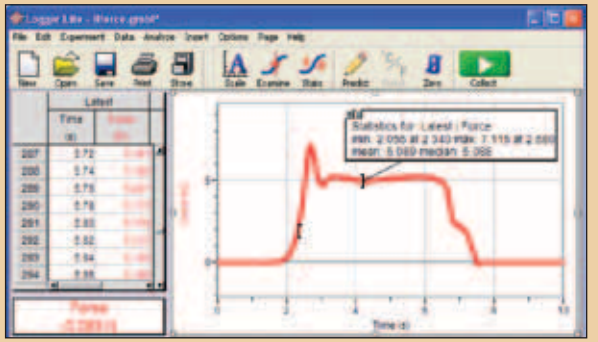


Export water quality data to Google Maps, and incorporate the result into a Logger Pro *page.*

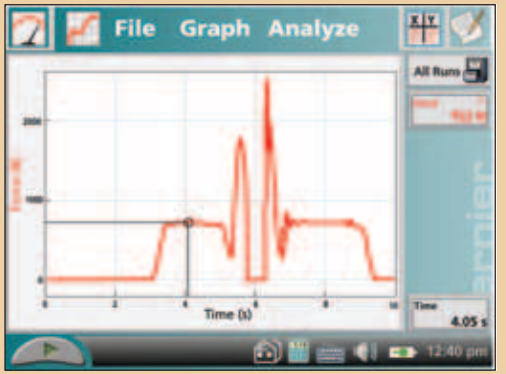
Collect Science Data with a Netbook

- Is your school using netbooks? Collect data with them. You can use a variety of Vernier equipment and software with most netbooks. See **www.vernier.com/netbooks** for updated compatibility details.
- Use netbooks with most Vernier interfaces. Go!Link, Go!Temp, or Go!Motion are excellent options, as is the new Vernier LabQuest Mini. The LabQuest Mini is compatible with 54 sensors and the Go!Link is compatible with 46 sensors. See page 12 for Go!Link, and pp. 10–11 for the LabQuest Mini.
- Choose from our wide range of sensors, including temperature, motion, light, and force. We recommend one interface and sensor set for each lab group (2–4 students).
- Software for netbooks is **FREE** from Vernier. Consider **FREE** Logger Lite for either Linux or Windows, or the **FREE** LabQuest App for ASUS Eee PC and OLPC netbooks. See **www.vernier.com/netbooks** for download details.

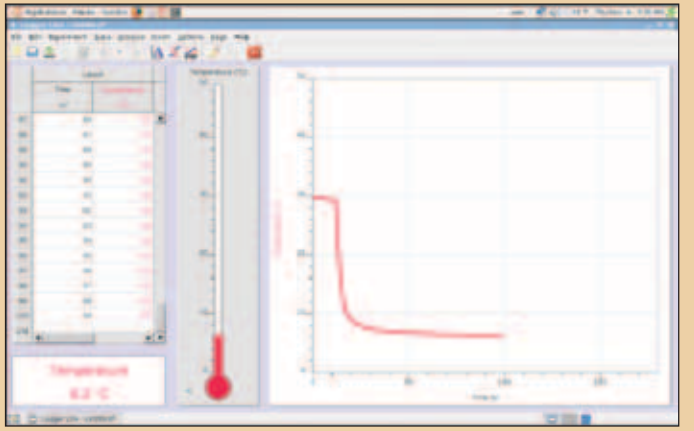
Download **FREE** Vernier software for netbooks at
www.vernier.com/netbooks



Logger Lite fits the small netbook screen.



LabQuest App runs on ASUS Eee PC and OLPC netbooks.



Logger Lite running in Linux (Ubuntu 8.04)

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with a Vernier lab book. Aligned to state and national science standards, our lab books contain experiments for LabQuest, computers, and TI graphing calculators.

2 CHOOSE YOUR INTERFACE

Vernier LabQuest – LabQuest is our color, touch-screen interface. Use it as a standalone device or as a computer interface. More details on pp. 3–9.

LabQuest Mini – LabQuest Mini is a low-cost computer solution with five sensor ports. More details on pp. 10–11.

Vernier LabPro – For data collection with TI graphing calculators, see details on pp. 88–89.

3 CHOOSE YOUR SENSORS

Choose from Vernier's recommended packages or build your own from our list of sensors.

Our Deluxe Package contains all the sensors needed to perform every experiment in our biology lab book.

Build custom packages online at **www.vernier.com/guide**

4 ADD A COPY OF LOGGER *PRO*

This award-winning software is the best value around! Includes a site license for all computers in your school or your college department, as well as students' personal computers. See pp. 14–17 for details.

NEW! Student Editions Available
www.vernier.com/studenteditions

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information.
- 31 ready-to-use student versions of Logger *Pro* experiments in print; LabQuest, computer, and calculator versions on CD.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

***Biology with Vernier* lab book contains the following experiments:**

USING TEMPERATURE PROBES
- Biodiversity and Ecosystems
- Energy in Food
- Aerobic Respiration
- Dissolved Oxygen in Water
- Watershed Testing
- Physical Profile of a Lake

USING A GAS PRESSURE SENSOR
- Testing Catalase Activity
- Transpiration
- Cell Respiration
- Sugar Fermentation
- Effect of Temperature on Fermentation
- Osmosis
- Lactase Action
- Control of Human Respiration

USING AN EKG SENSOR
- Monitoring EKG

USING A HEART RATE MONITOR
- Heart Rate and Physical Fitness
- Ventilation and Heart Rate

USING A CO_2 GAS SENSOR
- Cell Respiration
- Respiration of Sugars by Yeast
- Effect of Temperature on Respiration
- Temperature of Cold-Blooded Organisms
- Lactase Action
- Photosynthesis and Respiration

USING A COLORIMETER
- Photosynthesis
- Alcohol & Biological Membranes
- Biological Membranes
- Population Dynamics

USING A RESPIRATION MONITOR BELT
- Control of Human Respiration

USING AN O_2 GAS SENSOR
- Photosynthesis and Respiration
- Enzyme Action
- Cell Respiration
- Oxygen Gas and Human Respiration
- Cold-Blooded Organisms

USING A CONDUCTIVITY PROBE
- Limitations on Cell Size
- Diffusion through Membranes
- Conducting Solutions
- Watershed Testing
- Physical Profile of a Lake

USING A DISSOLVED OXYGEN PROBE
- Interdependence of Plants and Animals
- Aerobic Respiration
- Dissolved Oxygen in Water
- Watershed Testing
- Physical Profile of a Lake
- Primary Productivity

USING A pH SENSOR
- Acids and Bases
- Interdependence of Plants and Animals
- Acid Rain
- Watershed Testing
- Physical Profile of a Lake

FOR TI CALCULATOR-BASED DATA COLLECTION: see page 94

a. Blue Digital Bioimaging System

ORDER CODE **BL-DBS, $799**

The Blue Digital Bioimaging System is a complete solution for photodocumenting and analyzing your electrophoresis gels. With it, you can

- View your gel banding patterns using the BlueView Transilluminator.
- Capture a photograph of the gel on your computer using a ProScope HR.
- Analyze your results by creating a standard curve and calculating the number of base pairs in each band using Logger *Pro* software (not included).

The Blue Digital Bioimaging System includes a BlueView Transilluminator, Imaging Hood, ProScope HR digital USB camera with 1–10X lens, and a ProScope Stand.

b. BlueView Transilluminator

ORDER CODE **BLUE-VIEW, $419**

The BlueView Transilluminator uses super bright blue LEDs to illuminate electrophoresis gels stained with SYBR Safe stain. This combination is a safer alternative to ethidium bromide and a UV transilluminator. Includes the BlueView Transilluminator only.

- Accommodates gels up to 15 x 12 cm with a viewing area of 11 x 11 cm.
- Can be used with a variety of fluorescent stains.

c. Electrophoresis Stains

Less toxic than ethidium bromide, SYBR Safe works beautifully with the BlueView Transilluminator. SYBR Safe is available as a concentrate to be added to the agarose solution, or in a dilute form for post-electrophoresis staining. More information at **www.vernier.com/biotech**

Experiment 6B from Advanced Biology with Vernier, *"Analysis of Precut Lambda DNA"*

Three Easy Steps for Gel Analysis

Vernier provides tools for digital photodocumentation and analysis of gel electrophoresis. Here's how it's done:

1. Run your gel.
2. Use one of our Digital Bioimaging Systems to capture a digital photo of the gel in Logger *Pro*. Use Blue if using SYBR Safe stain or White if using Fast Blast™ DNA stain or methylene blue stain.
3. Use the Gel Analysis feature in Logger *Pro* to create a standard curve and determine the number of base pairs in each experimental band.

Bio-Rad's Biotechnology Explorer™ kits and curricula are designed by teachers and scientists working together to integrate real-world biology topics and activities into existing biology curricula. Vernier's photodocumentation and analysis products are a perfect complement to Bio-Rad's research-quality laboratory equipment and supplies. Visit **explorer.bio-rad.com** for more information.

d. NEW White Digital Bioimaging System

ORDER CODE **WHT-DBS, $569**

The White Digital Bioimaging System is a complete solution for photodocumenting and analyzing your electrophoresis gels.

- View your gel banding patterns using the White Light Transilluminator.
- Capture a photograph of the gel on your computer using a ProScope HR.
- Analyze your results by creating a standard curve and calculating numbers of base pairs in each band using Logger *Pro* (not included).

The White Digital Bioimaging system includes a White Light Transilluminator, Imaging Hood, ProScope HR digital USB camera with 1–10X lens, and a ProScope Stand.

e. NEW White Light Transilluminator

ORDER CODE **WHT-TRANS, $119**

The White Light Transilluminator allows you to view gels stained with non-fluorescent, visible stains, such as Bio-Rad's Fast Blast™ DNA stain and methylene blue based stains.

Bio-Rad Partnership

Vernier and Bio-Rad have partnered to bring you the best in biotechnology kits, instrumentation, consumables, data collection, analysis, and curricula. The following Bio-Rad kits are used in the new edition of our lab book, *Advanced Biology with Vernier.* For more information, go to **explorer.bio-rad.com**. To order these or other Bio-Rad products, contact Bio-Rad directly at **www.bio-rad.com**.

a. NEW Tris-Compatible Flat pH Sensor

ORDER CODE **FPH-BTA, $99**

The new Tris-Compatible Flat pH Sensor uses a double-junction electrode, making it compatible with Tris buffers and solutions containing proteins. The flat glass shape also makes it ideal for measuring the pH of semisolids, such as food or soil.

b. Vernier GPS Sensor

ORDER CODE **VGPS, $64**

The Vernier GPS (Global Positioning System) Sensor collects location data such as latitude, longitude, and altitude right on your LabQuest or computer.

- Record your location as you measure water quality at various sites along a stream.
- Track location *vs.* sensor data, such as acceleration in a car or train.

c. Stir Station

ORDER CODE **STIR, $119**

The Stir Station is a high-quality, multi-function magnetic stirrer. The speed can easily be fine-tuned to achieve the desired effect. More on page 37.

- Has a built-in ring stand.
- Runs on batteries or AC power.
- Includes Vernier Microstirrer and traditional stir bar.
- Temperature Probe and Electrode Support shown, but not included.

BioChambers provide a way for both CO_2 Gas and O_2 Gas sensors to be used at the same time in a closed system.

VERNIER GPS SENSOR
Connect directly to the USB port of your computer or LabQuest. See page 105 for more information.

SpectroVis® Plus $449 ORDER CODE SVIS-PL

Spectrophotometer + Fluorometer

NEW + IMPROVED Having an array spectrometer/fluorometer combination is now affordable for each of your lab stations! SpectroVis Plus has a new wider range and better resolution than the original SpectroVis, plus it now offers fluorescence. In absorbance mode, you can quickly and easily measure the absorbance spectrum of a solution, concentrations of solutions, and rates of reactions. With its two different excitation wavelengths, SpectroVis Plus can quantitatively measure the fluorescence spectra of many compounds, such as chlorophyll, fluorescein, GFP, and more. Connect SpectroVis Plus to a LabQuest or a computer running Logger *Pro* using a standard USB cable (included), and see the results in full color.

USES

- Measure absorbance spectrum of a liquid
- Measure fluorescence emission spectrum of a liquid
- Conduct Beer's law investigations
- Conduct kinetic studies of absorbance *vs.* time
- Conduct equilibrium studies of absorbance *vs.* time and/or absorbance *vs.* concentration
- Conduct experiments on enzyme kinetics
- Perform colorimetric or fluorescent bioassays
- Measure emissions of gas discharge tubes or other light sources using the SpectroVis Optical Fiber (not included)

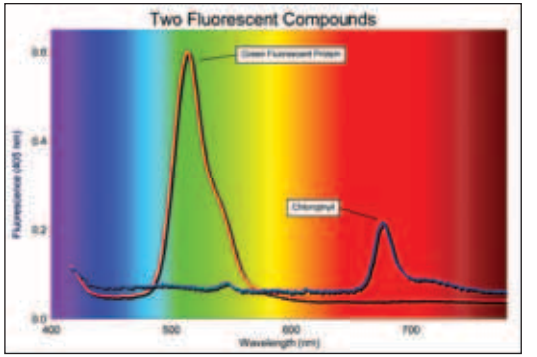
FEATURES

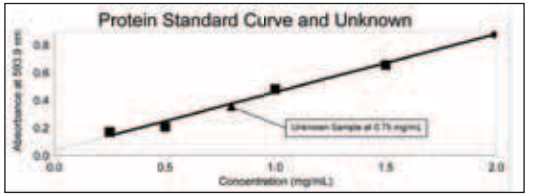
- Portable: 15 cm x 9 cm x 4 cm
- Easy one-step calibration
- Measures absorbance over a 380–950 nm range
- ~2.5 nm optical resolution, 570 wavelengths, 1 nm reporting intervals
- Fluorescence excitation centered at 405 nm or 500 nm
- Powered by computer or LabQuest USB port; no additional power source needed

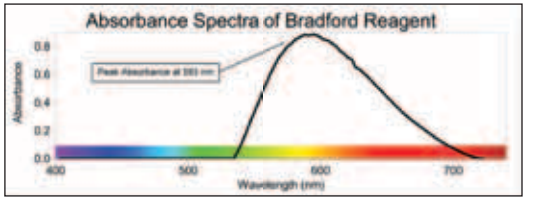
---

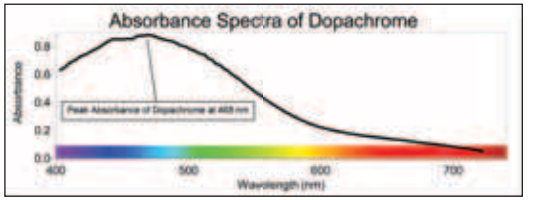
SpectroVis Optical Fiber, ORDER CODE SVIS-FIBER, $69

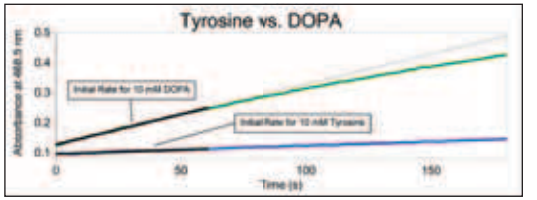
Turn your SpectroVis Plus into an emissions spectrometer using the SpectroVis Optical Fiber insert. Simply insert the unit into the cuvette holder and point the 1 m optical fiber at a light source.











Data from new spectrometer labs in Advanced Biology with Vernier

ProScope HR™
high resolution handheld microscope

High-Resolution Handheld Microscope

The ProScope HR is a USB handheld digital microscope designed for use with your computer. With a high-quality CMOS and universal lens mount, the ProScope HR can become a powerful addition to any classroom.

- Instantly displays digital images on a computer screen.
- Takes still photos, movies, and time-lapse videos.
- Interchangeable lenses make it easy to get the magnification you need.
- Includes ProScope HR software and works with Logger *Pro*.
- Lens-mounted, white LEDs make lighting subjects simple.
- Lenses also sold separately on our web site at **www.vernier.com/proscope**

ProScope HR

ORDER CODE **BD-HRB, $229**

Get started capturing high-resolution microscopic images of hair follicles, microwriting on dollar bills, and more with the 50X lens.

Includes: ProScope HR Unit, ProScope HR Software, and 50X Lens.

Biology ProScope HR Kit

ORDER CODE **BD-HRBIOL, $599**

Use the ProScope HR as a dissecting microscope or attach the ProScope HR to your regular microscope for even more magnification.

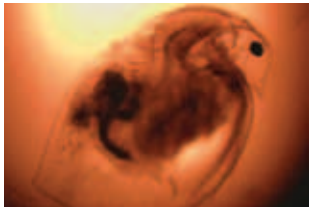
Includes: ProScope HR Unit, ProScope HR Software, 50X Lens, 1-10X Lens, C-Mount Adapter, Microscope Lens Tube Adapter, Camera Stand, Rugged Hard-Side Case

ProScope HR Deluxe Kit

ORDER CODE **BD-DLX, $899**

In addition to everything that comes with the Biology ProScope HR Kit, the Deluxe Kit includes two more lenses for maximum magnification at 100x or 200x.

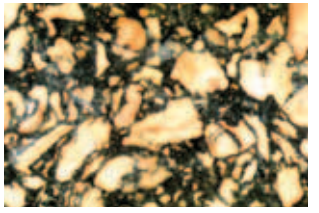
Includes: ProScope HR Unit, ProScope HR Software, 50X Lens, 1-10X Lens, 100X Lens, 200X Lens, C-Mount Adapter, Microscope Lens Tube Adapter, Camera Stand, Rugged Hard-Side Case.



Daphnia

Gel electrophoresis

Micro-writing on $5 bill



Cork board

Use the ProScope HR as a dissecting scope to study insects

Connect the ProScope HR to a microscope for more powerful magnification

NEW *higher resolution ProScope HR2 model also available. For details visit* ***www.vernier.com/proscope***

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with a Vernier lab book. Aligned to state and national science standards, our lab books contain experiments for LabQuest, computers, and TI graphing calculators.

Also recommended: *Investigating Chemistry through Inquiry* page 37.

2 CHOOSE YOUR INTERFACE

Vernier LabQuest – LabQuest is our color, touch-screen interface. Use it as a standalone device or as a computer interface. More details on pp. 3–9.

LabQuest Mini – LabQuest Mini is a low-cost computer solution with five sensor ports. More details on pp. 10–11.

3 CHOOSE YOUR SENSORS

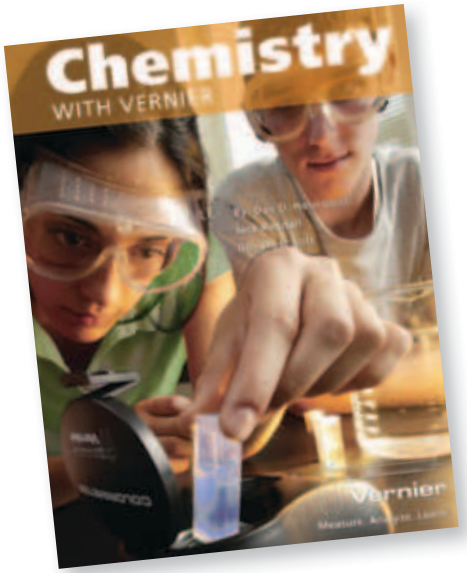
Choose from Vernier's recommended packages or build your own from our list of sensors.

Our Deluxe Package contains all the sensors needed to perform every experiment in our chemistry lab book.

Build custom packages online at **www.vernier.com/guide**

4 ADD A COPY OF LOGGER *PRO*

This award-winning software is the best value around! Includes a site license for all computers in your school or your college department, as well as students' personal computers. See pp. 14–17 for details.



GREAT VALUE

Purchase the Lab Book

$48 ORDER CODE CWV

NEW! Student Editions Available
www.vernier.com/studenteditions

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information, including instructions for preparing solutions.
- 36 ready-to-use student versions of Logger *Pro* experiments in print; LabQuest, computer, and calculator versions on CD.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

Chemistry with Vernier lab book contains the following experiments:

USING TEMPERATURE PROBES
- Endothermic and Exothermic Reactions
- Freezing and Melting of Water
- Another Look at Freezing Temperature
- Heat of Fusion of Ice
- Pressure-Temperature Relationships
- Fractional Distillation
- Evaporation and Intermolecular Attractions
- Vapor Pressure of Liquids
- Effect of Temperature on Solubility
- Finding Molecular Weight
- Energy Content of Foods
- Energy Content of Fuels
- Hess's Law
- Heat of Combustion: Magnesium

USING A pH SENSOR
- Household Acids and Bases
- Acid Rain
- Titration Curves of Acids and Bases
- ▶ Acid-Base Titration
- Titration of a Diprotic Acid
- Acid Dissociation Constant, K_a
- Time-Released Vitamin C Tablet
- The Buffer in Lemonade
- Phosphoric Acid Content in Soft Drinks
- Microscale Acid-Base Titration

USING A VOLTAGE PROBE
- Micro-Voltaic Cells
- Lead Storage Batteries

USING A GAS PRESSURE SENSOR
- Boyle's Law: Gas Pressure and Volume
- Pressure-Temperature Relationship
- Vapor Pressure of Liquids

USING A COLORIMETER
- ▶ Beer's Law
- Finding an Equilibrium Constant, K_c
- ▶ Rate Law Determination of the Crystal Violet Reaction
- Chlorine Content of Swimming Pool Water
- Quantity of Iron in a Vitamin Tablet

USING A CONDUCTIVITY PROBE
- Electrolytes and Non-Electrolytes
- The Effect of Concentration
- Using Conductivity to Find an Equivalence Point

USING A DROP COUNTER *(optional)*
- ▶ Acid-Base Titration
- Titration of a Diprotic Acid
- Using Conductivity to Find an Equivalence Point

USING NO SENSOR
- Find the Relationship: An Exercise in Graphical Analysis

Advanced Chemistry with Vernier lab book contains the following experiments:

USING TEMPERATURE PROBES
- Using Freezing-Point Depression to Find Molecular Weight **(AP)**
- The Molecular Mass of a Volatile Liquid **(AP)**
- Molar Volume of a Gas **(AP)**
- Vapor Pressure and Heat of Vaporization
- Rate Determination and Activation Energy
- Synthesis and Analysis of Aspirin **(AP)**
- Exploring the Properties of Gases
- Determining the Mole Ratios in a Chemical Reaction **(AP)**
- Determining the Enthalpy of a Chemical Reaction **(AP)**
- Synthesis and Analysis of Alum **(AP)**
- The Enthalpy of Neutralization of Phosphoric Acid

USING A pH SENSOR
- Standardizing a Solution of Sodium Hydroxide **(AP)**
- Buffers **(AP)**
- Determining the K_{sp} of Calcium Hydroxide
- Determining K_a by the Half Titration of a Weak Acid

USING A COLORIMETER OR SPECTROVIS PLUS
- The Determination of an Equilibrium Constant **(AP)**
- Determining the Concentration of a Solution: Beer's Law **(AP)**
- The Rate and Order of a Chemical Reaction
- The Synthesis and Analysis of Aspirin **(AP)**
- Rate Determination and Activation Energy

USING A pH SENSOR AND DROP COUNTER
- Acid-Base Titration **(AP)**
- Investigating Indicators **(AP)**

USING A VOLTAGE PROBE
- Electrochemistry: Voltaic Cells **(AP)**

USING A GAS PRESSURE SENSOR
- The Decomposition of Hydrogen Peroxide **(AP)**
- The Molar Volume of a Gas **(AP)**
- Exploring the Properties of Gases
- Vapor Pressure and Heat of Vaporization

USING A CONDUCTIVITY PROBE & DROP COUNTER
- Conductimetric Titration and Gravimetric Determination **(AP)**
- The Base Hydrolysis of Ethyl Acetate

USING AN ORP SENSOR & DROP COUNTER
- An Oxidation-Reduction Titration: Fe^{2+} and Ce^{4+} **(AP)**
- Potentiometric Titration of Hydrogen Peroxide

CURRENT PROBE
- Electroplating **(AP)**
- Avogadro's Number

USING A RADIATION MONITOR
- Alpha, Beta, and Gamma
- Radiation Shielding
- Half-Life Determination

NO SENSOR USED
- The Determination of a Chemical Formula **(AP)**
- The Determination of the Percent Water in a Compound **(AP)**
- Separation and Qualitative Analysis of Cations **(AP)**
- Liquid Chromatography **(AP)**

Vernier Mini GC®

ONLY $1,749

Use Room Air as a Carrier Gas

Our advanced MEMS GC chip technology allows you to use room air as a carrier gas. You also have the option of connecting other carrier gases to the Mini GC.

Connect to a Computer or LabQuest via USB

Vernier's Mini GC connects to both Windows and Macintosh computers via a robust USB connection. You can also connect directly to the Vernier LabQuest for real-time data acquisition.

Use Vernier's Award-Winning Software for Analysis

With either Vernier's Logger *Pro* for computers or Vernier's LabQuest App, peak integration analysis and retention-time determination are built right into the software.

What's Included:

- Vernier Mini GC
- Carrying case
- One high-quality Hamilton syringe
- Two spare septa
- Power supply
- USB cable
- 50+ page lab book
- User's guide

$1,749
ORDER CODE
GC-MINI

Included Labs:

- Using a Gas Chromatograph: Identifying Unknown Compounds
- Verification of Esterification
- Quantifying Substances in a Mixture
- Fractional Distillation
- Investigating Gas Chromatography

Accessories:

GC Septa (pkg 4)
ORDER CODE **GC-SEP, $25**

GC Syringe, 1 µL Hamilton
ORDER CODE **GC-SYR-MIC, $63**

See training video at **www.vernier.com/videos**

MORE ONLINE
For more information about the Mini GC, visit **www.vernier.com/gc**

Students analyzing ketones using the Vernier Mini GC and a LabQuest

Students analyzing ketones using the Vernier Mini GC and a computer running Logger Pro

Specifications

FAMILIES OF COMPOUNDS THAT CAN BE USED IN THE VERNIER MINI GC:

- Alcohols
- Aldehydes
- Aromatic hydrocarbons
- Carboxylic Acids
- Esters
- Ethers
- Ketones
- Nitriles

MEMS DETECTOR
The unique Seacoast Science MEMS Chemi-Capacitive Detector is state-of-the-art technology that allows air to be used as a carrier gas (three existing patents and one patent pending).

COLUMN
High-quality Restek MXT-1 stainless steel capillary column (11 meter)

TEMPERATURE REGULATION
Software-controlled temperature regulation from 30–120°C

COLUMN TEMPERATURE RAMP

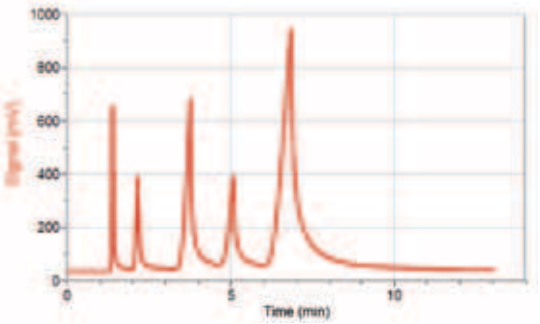
- Maximum of 10°C/minute
- Short warm-up time: <10 minute max for most labs

PRESSURE REGULATION
Software-controlled pressure regulation from 1–21 kPa above ambient

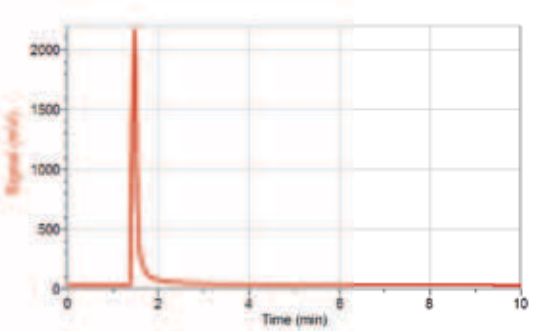
INJECTION

- Comes with one high-quality 1 µL Hamilton syringe, 7.3 cm stainless needle with non-coring beveled tip and needle guard, 3.8 cm injectable length
- Injection is direct from syringe to column
- 2 extra septa included with purchase (>150 injections/septa)
- Liquid injection volume: 0.01 to 0.50 µL

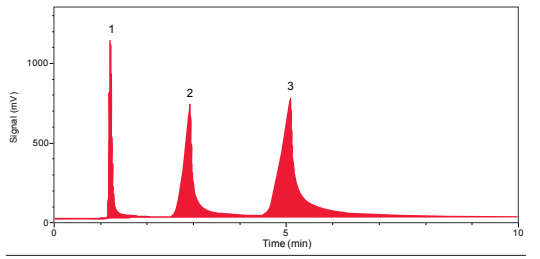
WARRANTY
Two-year warranty



Mini GC chromatogram of a ketone mixture

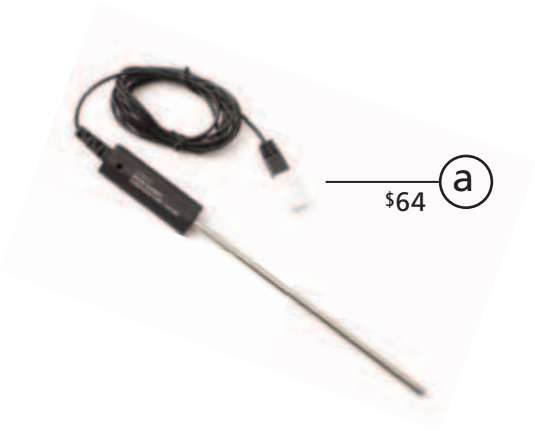


Mini GC chromatogram of acetone



Peak #	Compound	Retention Time (min)	Peak Area	% Area
1	acetone	1.207	83.6	16.1
2	4-methyl-2-pentanone	2.914	132.5	31.3
3	2-hexanone	5.077	273.6	52.6

Logger Pro displays peak retention times and areas as a graph and as a table



a. Wide-Range Temperature Probe

ORDER CODE **WRT-BTA, $64**

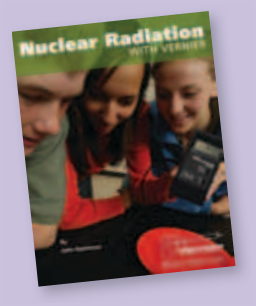
Our newest temperature probe features a wide temperature range, from -20°C to 330°C. The high upper limit of the sensor allows for melting point determinations of many organic compounds. Not only does it have a wider range, but it uses RTD (Resistance Temperature Detection) technology to establish a ±0.1°C accuracy throughout its temperature range, as well as excellent stability and repeatability. Each unit is individually calibrated. See page 114 for more details.

b. Electrode Support, ORDER CODE ESUP, $10

Our Electrode Support is a great complement to the Vernier Stir Station, as well as a perfect holder for many sensors. It is built to connect to all standard ring-stand posts; its large-handled locking nut keeps your sensors firmly in place. The larger opening (13 mm in diameter) is perfect for our pH, ISE, Conductivity, and ORP sensors. The smaller opening (5 mm) is designed to hold our Stainless Steel Temperature Probe or the Vernier Go!Temp.

c. Thermocouple, ORDER CODE TCA-BTA, $59

This sensor uses type-K thermocouple wire to measure temperatures over the range of -200 to 1400˚C. It can be used to measure flame temperatures as high as 1400˚C, or liquid nitrogen temperatures at -196˚C. The Thermocouple has an internal ice-point compensation chip, so you do not need to place a reference wire in an ice-water bath. You can simply use one measuring lead to take temperature readings. Each Thermocouple is individually calibrated.



Nuclear Radiation with Vernier lab book

ORDER CODE **NRV, $25**

Six ready-to-use experiments. Also includes a CD with word-processing files for experiments, so you may easily edit labs to fit your style. More on page 82.

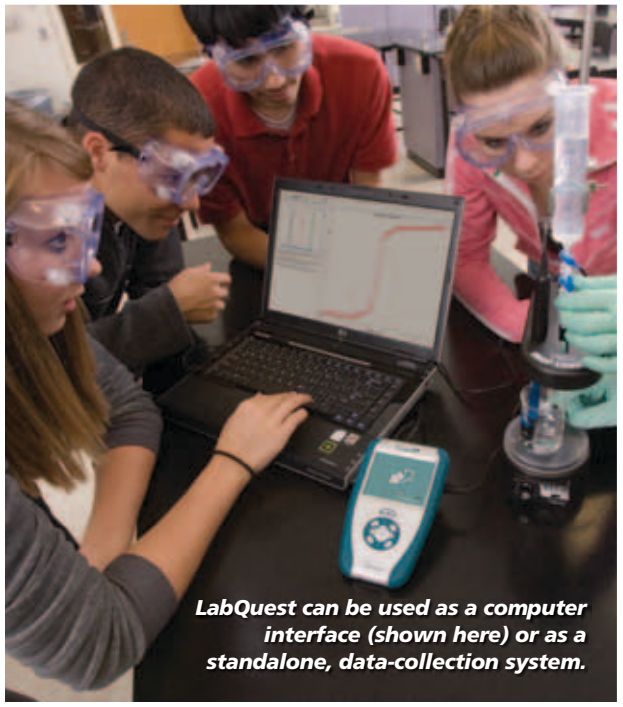
Digital Radiation Monitor,

ORDER CODE **DRM-BTD, $254**

See page 110.

LabQuest for Chemistry
• Durable and splash-resistant
• Easy to use with color touch screen navigation
• Built-in lab instructions
• Voice and text annotations for field work
See pp. 3–9 for more information.

Conducting a distillation using LabQuest and a Wide-Range Temperature Probe



LabQuest can be used as a computer interface (shown here) or as a standalone, data-collection system.

Did you know?

You can use our Electrode Amplifier with third-party pH electrodes that have BNC connectors, or purchase our pH Replacement Electrode.

NEW DESIGN
Electrode Amplifier

$40 ORDER CODE **EA-BTA**

pH Replacement Electrode*

$37 ORDER CODE **7120B**

*Has a BNC connector to connect to EA-BTA (does not replace PH-BTA)

d. NEW *Investigating Chemistry through Inquiry*

ORDER CODE **CHEM-I, $48**

If you love Vernier lab books, but want a stronger emphasis on inquiry for your student experiments, this book is for you. This new lab book, reviewed and recommended by NSTA, contains 25 inquiry-based chemistry investigations. Each experiment includes a preliminary activity, teacher information, sample researchable questions, and sample data for those researchable questions. If you are new to inquiry-based instruction, the extensive teacher section will help guide you through the inquiry-based style of chemistry instruction. Some of the labs included are:

- Vapor Pressure and Heat of Vaporization
- Baking Soda and Vinegar Investigations
- An Investigation of Urea-Containing Cold Packs
- Conductivity of Aqueous Solutions
- Reaction Stoichiometry
- Investigating the Energy Content of Foods

See www.vernier.com/cmat/chemi.html

e. Stir Station, ORDER CODE STIR, $119

The Stir Station is a high-quality, multi-function magnetic stirrer. It has a stirring capacity of 800 mL in a 1 L beaker. It works efficiently with beakers with a volume as small as 50 mL and with a wide range of sizes and shapes of magnetic stirring bars.

Includes Stir Station, Vernier Microstirrer (see page 103), magnetic stirring bar, AC power adapter, and removable ring-stand post. Can be used with AC power or batteries.

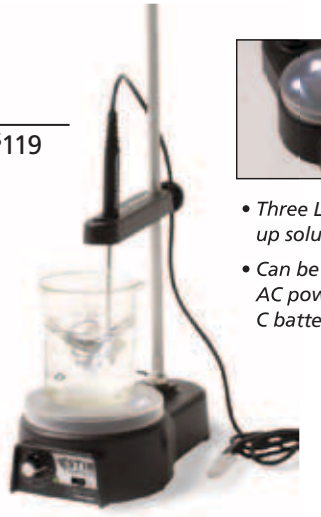
f. Vernier Drop Counter, ORDER CODE VDC-BTD, $99

Titrations! The Vernier Drop Counter allows your students to conduct titrations precisely and effectively in less time.

- Logger *Pro* and LabQuest App allows for easy calibration from drops to volume.
- Vernier chemistry labs are customized for use with our Drop Counter.
- Use with the Vernier pH Sensor for acid-base titrations.
- Use with the Vernier Conductivity Probe for conductimetric titrations.
- Use with the Vernier ORP Sensor for oxidation-reduction titrations.

d **NEW** $48

e $119



- *Three LEDs light up solutions*
- *Can be used with AC power or four C batteries*

f $99

Real-Time Mass Measurements

a. Ohaus Scout™ Pro and Adventurer™ Pro* Balances

It is easy to collect mass data from an Ohaus Scout Pro or Adventurer Pro balance using our popular Logger *Pro* 3 software. Simply connect a Scout Pro or Adventurer Pro balance to your computer's USB or serial port (Scout Pro requires a connection kit and Adventurer Pro has a built-in USB connection), start the Logger *Pro* software, and you will be collecting real-time data as if the Ohaus balance was just another Vernier sensor!

Scout Pro 0.01 g balance (200 g) ORDER CODE **OHSP-202, $319**
Scout Pro 0.01 g balance (400 g) ORDER CODE **OHSP-402, $429**
Scout Pro 0.001 g balance (120 g) ORDER CODE **OHSP-123, $419**

All three balances require:
Scout Pro USB connection kit ORDER CODE **OHSP-USB, $79**

*Adventurer Pro balances are available at **www.vernier.com/probes/ohaus.html**

$59 b

b. Instrumentation Amplifier, ORDER CODE INA-BTA, $59

The Instrumentation Amplifier monitors voltages from 20 mV to 1 V (DC or AC). It has several switch settings to allow you to select the best gain. It is typically used to amplify the chart recorder or analog output of any instrument, such as a gas chromatograph.

$179 each c

c. Ion-Selective Electrodes

Great for monitoring four environmentally important ions: Nitrate (NO_3^-), Chloride (Cl^-), Calcium (Ca^{2+}), and Ammonium (NH_4^+). More on page 106.

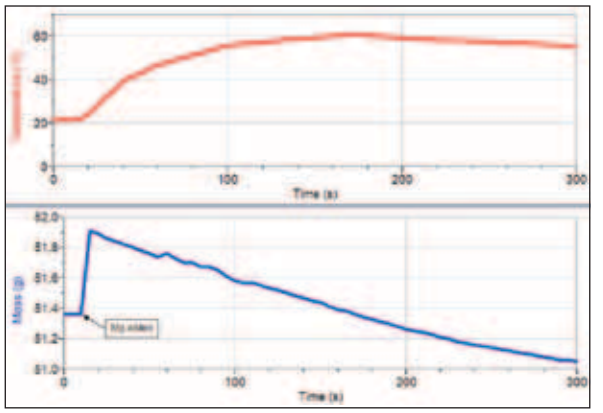
Nitrate ISE
NO3-BTA, $179

Calcium ISE
CA-BTA, $179

Chloride ISE
CL-BTA, $179

Ammonium ISE
NH4-BTA, $179

NOTE: Ion-Selective Electrodes require good chemical technique and careful calibration to obtain accurate results. They are not recommended for middle school or elementary students.



Monitoring temperature and mass in the HCl-Mg reaction

Vernier & FLINN SOFTWARE & TECHNOLOGY

Since 1995, Vernier has partnered with Flinn Scientific, the leading provider of chemistry education products, to provide outstanding support for AP Chemistry lab activities. Vernier and Flinn have expanded their commitment to AP Chemistry by offering a series of 2-day AP Chemistry workshops (see page 121).

† If you are going to use your Red Tide Spectrometer exclusively for emissions (and not for absorbance and percent transmittance measurements), you can purchase the Red Tide Emissions Spectrometer separately, for a lower price. See page 69 for details.

Spectrometer Accessories

Cuvettes

Plastic Cuvettes pkg of 100 (visible range)
ORDER CODE **CUV, $15**
(Use with V-SPEC, SPRT-VIS, SVIS, and SVIS-PL)

Plastic UV Cuvettes pkg of 100 (UV-VIS)
ORDER CODE **CUV-UV, $69**
(Use with SPRT-UV-VIS)

Cuvette Rack
ORDER CODE **CUV-RACK, $9**

Optical Fiber

Connects easily to an Ocean Optics or Vernier Spectrometer, 2 m in length, and is used to conduct emission spectrum studies.

VIS-NIR Optical Fiber
ORDER CODE **VIS-NIR, $138**
(Use with V-SPEC, SPRT-VIS, and ESRT-VIS)

UV-VIS Optical Fiber
ORDER CODE **UV-VIS, $138**
(Use with SPRT-UV-VIS)

NEW! IMPROVED

SpectroVis® Plus

An Affordable Spectrophotometer and Fluorometer

$449 ORDER CODE SVIS-PL

Having a CCD array spectrometer/fluorometer combination is now affordable for each of your lab stations! Array spectrometer technology allows you to collect a full wavelength spectrum (absorbance, percent transmittance, or intensity) in less than one second. Once the peak wavelength is determined, you can easily determine the concentration of a solution (Beer's law) or monitor rates of reaction.

What's New and Improved with SpectroVis Plus?

- Improved range: 380–950 nm (VIS-NIR)
- 1 nm between reported values (now collects 570 values)
- Improved optical resolution (~2.5 nm)
- New support for fluorescence (two excitation sources centered at 405 nm and 500 nm)

More Features

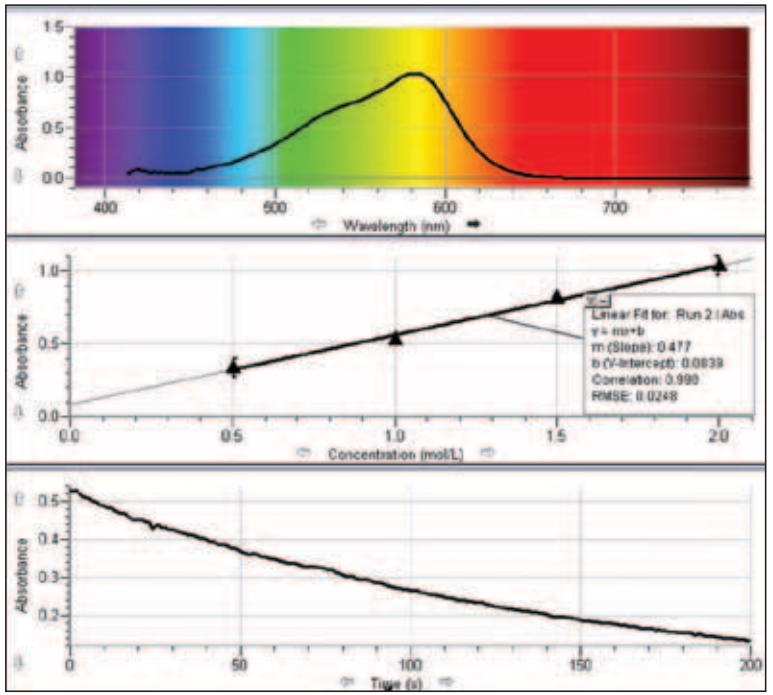
- Portable: 15 cm x 9 cm x 4 cm
- Collect a full spectrum in less than 1 second
- Easy one-step calibration
- Connects directly to LabQuest or to a computer's USB port
- No external power required
- Software required: Logger *Pro* 3.8.2 (or newer) or LabQuest App 1.4 (or newer)

NEW Spectrum Tube Single Power Supply
ORDER CODE ST-SPS, $225

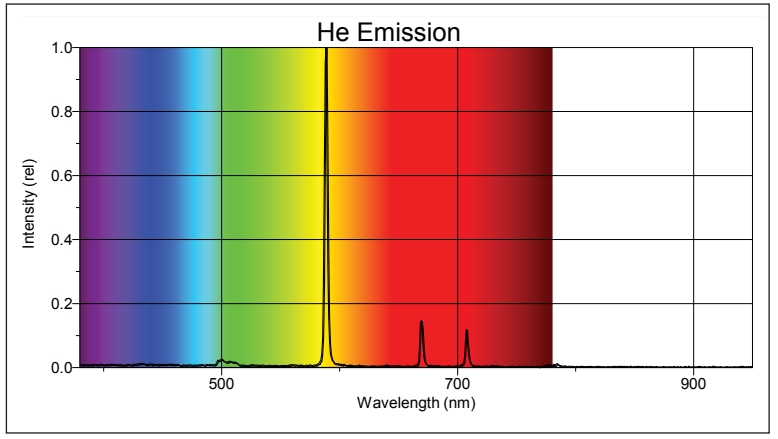
For more information see page 70.

SpectroVis Optical Fiber
ORDER CODE SVIS-FIBER, $69

Turn your SpectroVis Plus spectrophotometer into an emissions spectrometer using the SpectroVis Optical Fiber insert. Simply insert the unit into the cuvette holder and point the 1 m optical fiber at a light source. Use with SpectroVis and SpectroVis Plus.



Absorbance spectrum of crystal violet

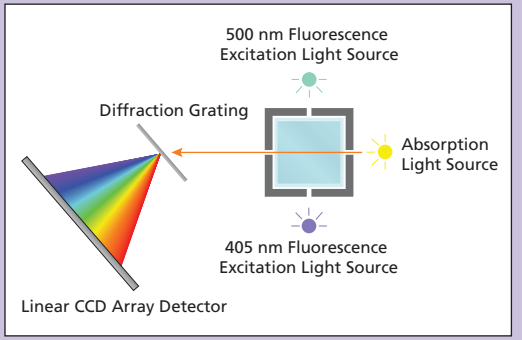


Helium emission spectrum

Uses

- Measure absorbance, percent transmittance, emissions spectra, or fluorescence
- Conduct Beer's law investigations
- Conduct kinetic studies of absorbance *vs.* time
- Perform equilibrium studies of absorbance *vs.* time or absorbance *vs.* concentration
- Conduct experiments on enzyme kinetics
- Perform colorimetric or fluorescent bioassays
- Measure emissions of gas discharge tubes, flame tests, or other light sources, using the SpectroVis Optical Fiber (not included)

How Does it Work?



Light from our long-lived LED light source passes through a solution. Emerging light goes through a high-quality diffraction grating then the diffracted light is collected and sorted by the CCD array detector.

With its two different excitation wavelengths, SpectroVis Plus can quantitatively measure the fluorescence spectra of many compounds, such as quinine, fluorescein, and chlorophyll.

Free Spectrometer Labs

Introduce your students to the common use of a spectrometer including the classic Beer's law, emissions from discharge tubes, and a novel look at theatrical lighting filters. More at **www.vernier.com/spectroscopy**

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with a Vernier lab book. Aligned to state and national science standards, our lab books contain experiments for LabQuest, computers, and TI graphing calculators.

2 CHOOSE YOUR INTERFACE

Vernier LabQuest – LabQuest is our color, touch-screen interface. Use it as a standalone device or as a computer interface. More details on pp. 3–9.

LabQuest Mini – LabQuest Mini is a low-cost computer solution with five sensor ports. More details on pp. 10–11.

Vernier LabPro – For data collection with TI graphing calculators, see details on pp. 88–89.

3 CHOOSE YOUR SENSORS

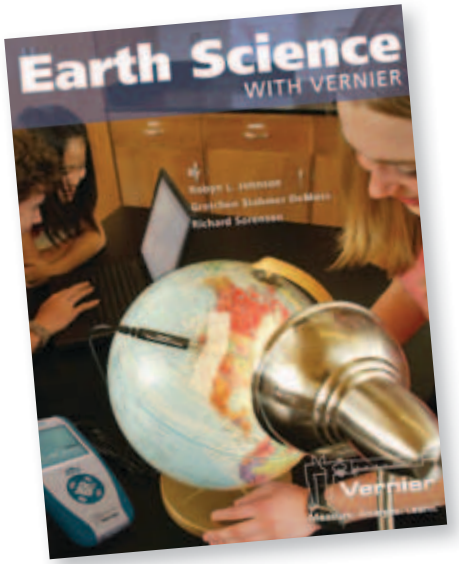
Choose from Vernier's recommended packages or build your own from our list of sensors.

Our Deluxe Package contains all the sensors needed to perform every experiment in our Earth science lab book.

Build custom packages online at **www.vernier.com/guide**

4 ADD A COPY OF LOGGER *PRO*

This award-winning software is the best value around! Includes a site license for all computers in your school or your college department, as well as students' personal computers. See pp. 14–17 for details.



GREAT VALUE

Purchase the Lab Book

$48 ORDER CODE ESV

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information.
- 33 ready-to-use student versions of Logger *Pro* experiments on hard copy. LabQuest, computer, and calculator versions on CD.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

***Earth Science with Vernier* lab book contains the following experiments:**

USING A TEMPERATURE PROBE
- Introduction to Data Collection
- Soil Temperature
- Water Quality — Temperature
- Freezing of Ocean Water
- Reflection and Absorption of Light
- The Greenhouse Effect
- Land and Sea Breezes
- Relative Humidity
- Dew Point
- Wind Chill
- Seasons and Angle of Insolation
- Fossil Fuels
- Solar Homes

USING A LIGHT SENSOR
- Reflection and Absorption of Light
- Photovoltaic Cells

USING A PH SENSOR
- Soil pH
- Soil and Acid Rain
- Water Quality — pH
- Water Treatment
- Acid Rain and Its Effect on Surface Water

USING A MOTION DETECTOR
- Mapping the Ocean Floor

USING A UVB SENSOR
- Are All Sunglasses Created Equal?
- Comparing Sunscreens
- UV Light and Clothing

USING A CONDUCTIVITY PROBE
- Soil Salinity
- Water Quality — Total Dissolved Solids
- Water Treatment
- Salinity of Ocean Water
- Desalination

USING A TURBIDITY SENSOR
- Water Quality — Turbidity
- Water Treatment

USING A MAGNETIC FIELD SENSOR
- Exploring Magnetism
- Where IS North?
- Searching for Iron Ore
- Sea Floor Spreading

USING CURRENT AND VOLTAGE PROBES
- Photovoltaic Cells
- Wind Power

Davis Weather Stations

Because they are accurate, economical, easy to use, and well built, Davis Weather Stations are a perfect choice for your school. The Davis Vantage Vue™ weather station is rugged, accurate, reliable, and very affordable. If you want customizable, professional units, the Vantage Pro2 and Vantage Pro2 Plus are excellent choices. All versions are wireless.

For further information about Davis Weather Station products, including computer software and hardware mounting options, see **www.vernier.com/weather**

$395 a

$595 b

a. Vantage Vue™, ORDER CODE DWVUE, $395

The Vantage Vue weather station includes a console with AC power adapter and a self contained, easy-to-install sensor system. The console displays current data along with the ability to view graphs. All without a computer!

The integrated sensor suite combines a rain collector, temperature sensor, humidity sensor, wind direction and anemometer—all in one package. Vantage Vue provides all of the following:

- Barometric pressure
- Rain rate
- Inside and outside humidity
- Rainfall totals
- Inside and outside temperature
- Wind chill
- Wind speed and direction
- Heat index
- Dew point
- Moon phase
- Local forecast
- Time of sunrise and sunset at your location
- Highs and lows for most weather variables

b. Vantage Pro2™, ORDER CODE DWVP, $595

The Vantage Pro2 includes all of the features of Vantage Vue, however, you can add professional features such a fan-aspirated radiation shield and other sensors.

c. Vantage Pro2 Plus™, ORDER CODE DWPLUS, $995

The Vantage Pro2 Plus includes all of the features of Vantage Pro2, plus a UV sensor, solar radiation sensor, and a sensor mounting shelf. With the Solar Radiation Sensor, you can also measure evapo-transpiration, solar radiation intensity, and THSW (temperature/humidity/sun/wind) index. The UV Sensor provides UV dose and UV index.

d. Davis Vantage Vue Console/Receiver

ORDER CODE **DWVUE-CR, $195**

By purchasing additional Vantage Vue Console/Receivers, you can set up multiple monitoring stations in other classrooms throughout your school.

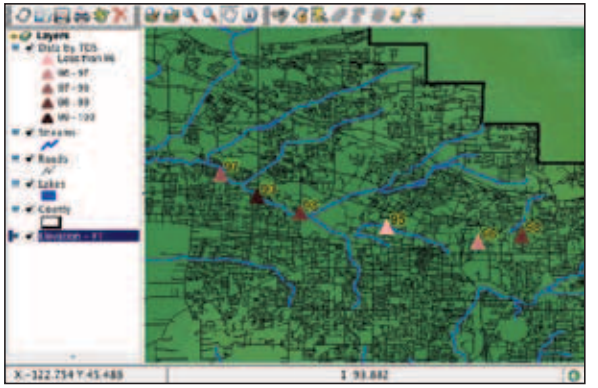
Map Your Data Using GIS software from ESRI

ESRI Technology CORPORATE ALLIANCE

Display data geographically using Logger *Pro* and free GIS software from ESRI. Logger *Pro* can export data in a GIS-friendly format for display and analysis in a variety of ESRI products, including ArcGIS and ArcExplorer Java Edition for Education (AEJEE).

AEJEE is a free mapping tool designed especially for education. Users can display standard geographic data such as shape files and images spanning global to local level, add XY data tables (such as GPS data points), analyze by classifying and querying, and stream data from the many ArcIMS servers on the internet.

To download your free copy of AEJEE, go to **www.esri.com/aejee**



Total Dissolved Solids (TDS) along Beaverton Creek mapped in AEJEE

ArcExplorer™–Java™ Edition

Global Positioning Systems (GPS)

a. Vernier GPS Sensor

ORDER CODE **VGPS, $64**

The Vernier GPS Sensor (Global Positioning System) collects location data such as latitude, longitude, and altitude right on your LabQuest or computer. This small, lightweight sensor connects directly to the USB port and works with LabQuest App and Logger *Pro* software. See a real-time graph of latitude *vs.* longitude, or export the data to various mapping programs such as Google Maps or ArcGIS.

With the GPS Sensor, LabQuest can record your location as you measure water quality at various sites along a stream, then map the data via Logger *Pro*.

Physics students can use a LabQuest and GPS Sensor to track location *vs.* sensor data, such as acceleration, in a car or train. Logger *Pro* can export a color-coded track for display to a map.

b. Garmin eTrex Venture HC

ORDER CODE **GAR-VENTHC, $199**

The eTrex Venture HC features include:

- A high-sensitivity GPS receiver for peak performance in any environment.
- Built-in basemap containing lakes, rivers, cities, interstates, national and state highways, railroads and coastlines.
- 256-color, sunlight-readable display makes it easy to distinguish map details—even in bright sunlight.
- Location data from the Garmin eTrex Venture HC can be transferred to Logger *Pro*.

a $64

b $199

Robotics Videos

Cartesian Diver

This is a robot controlled version of the classic science demonstration. A LEGO pneumatic pump and a valve are controlled by the robot to adjust pressure. The Vernier Gas Pressure Sensor is used to monitor the pressure.

Audio Assistant

This project challenges the students to write a program to indicate the Dual-Range Force Sensor reading with a sound, rather than a number or a graph. The frequency of the sound produced by the NXT is related to the force.

Solar Tracker

The NXT monitors the output from two solar panels using the Vernier Differential Voltage Probe. The solar panels are mounted on a rotating platform. The robot rotates the platform toward the solar panel with the most light. The net result is that the solar panels follow the sun.

Migrating Robot

This robot uses a Vernier Magnetic Field Sensor to detect the Earth's magnetic field and find north. It then migrates north, much like many animals do in the spring.

Many other robotics videos available at **www.vernier.com/nxt/projects.html**

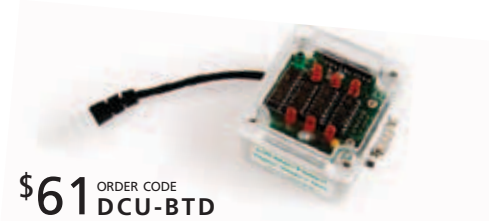
Enhance LEGO NXT Robotics

The NXT Sensor Adapter

$39 ORDER CODE BTA-NXT

- Connect over 30 Vernier sensors to the NXT Intelligent Brick (see above)
- Create sensor-based control systems
- Use with LEGO MINDSTORMS NXT, NI LabVIEW, or ROBOLAB
- View movies and download FREE project ideas at **www.vernier.com/nxt**

The DCU used with a LabPro, Conductivity Probe, and Temperature Probe to automate tea brewing



$61 ORDER CODE DCU-BTD

The Digital Control Unit (DCU) gives you an easy way to use SensorDAQ, LabPro, or LabQuest digital ports for exciting, do-it-yourself projects. It provides useful current (up to 600 mA) for controlling electrical devices.

Power supply not included
(ORDER CODE IPS, $12)

DCU Project Ideas:

- Temperature-controlled environment
- Flash lamps or LEDs
- Stepper motor control systems
- Alarm systems and feedback
- Moving displays
- Robots with sensors
- Electromagnetic mass driver

$10 ORDER CODE BB-BTA
Breadboard Cable

Want to Build Your Own Sensors?

Our Breadboard Cable:

- Provides an easy way for students to build their own sensor circuitry and input the signal into a Vernier interface for data acquisition.
- One end of the cable is a standard British Telecom Analog (BTA) connector that plugs into Vernier interfaces.
- The other end of the cable is a prototyping board connector that exposes the six sensor lines.

a. Power Amplifier

ORDER CODE **PAMP, $199**

The Vernier Power Amplifier allows you to control output circuits with SensorDAQ and other Vernier lab interfaces. You can drive loads with ±10 V and currents up to 1 A. It has a built-in current sensor, so you can monitor the current output at the same time you control the voltage. Engineering projects with feedback loops, motor speed control, PID control, and many others are naturals with this hardware. See page 110 for more details on this device.

b. NEW DESIGN
Instrumentation Amplifier

ORDER CODE **INA-BTA, $59**

The Vernier Instrumentation Amplifier provides an easy means to connect circuits and devices that produce small voltage signals. A strain gage bridge circuit is an example. The signal from the strain gage circuit varies over a few millivolts and the Instrumentation Amplifier steps up this voltage into the range where it can be handled by SensorDAQ and other Vernier interfaces. The Instrumentation Amplifier has 6 input ranges. See page 106 for more details on this sensor.

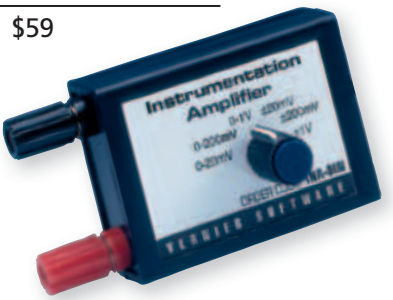
c. Rotary Motion Sensor

ORDER CODE **RMV-BTD, $169**

The Rotary Motion Sensor is a digital sensor that lets you monitor angles, or study angular motion. It can be used to study linear motion by either rolling it along a surface or by connecting the object moving to it with a string. It works great for measurements of tilt angle, joint angle, motor speed, motor efficiency, or the motion of a physical pendulum. Create a low-cost PID trainer using a DC motor with a propeller to lift a metal rod connected to the Rotary Motion Sensor. Study PID variables as you attempt to move the rod to a desired angle without overshooting. See page 111 for more details on this sensor.

(a) $199

(b) NEW DESIGN
$59



(c) $169

a. EKG Sensor, ORDER CODE EKG-BTA, $147

The EKG sensor is a biopotential sensor that can be used to record EKGs from the heart and surface EMGs from muscle. Analyze the electrical activity of the heart, compare the activity of muscles, or investigate reflex activity. See page 103 for more details on this sensor.

b. Hand Dynamometer

ORDER CODE HD-BTA, $99

The strain-gage based isometric dynamometer can be used to measure grip strength, pinch strength, and perform muscle fatigue studies. Combine the dynamometer with a Vernier EKG sensor (used to measure EMG) to measure maximum grip strength and correlate this with electrical activity of the muscles involved. See page 105 for more details on this sensor.

c. Spirometer, ORDER CODE SPR-BTA, $199

Our Spirometer can be used to perform a variety of tests related to air flow and lung volume. The sensor includes a removable flow head (22 mm ID/30 mm OD) for easy cleaning and sterilization and a differential pressure transducer. The Spirometer is designed to make human respiratory measurements at rest and during moderate activity. See page 113 for more details.

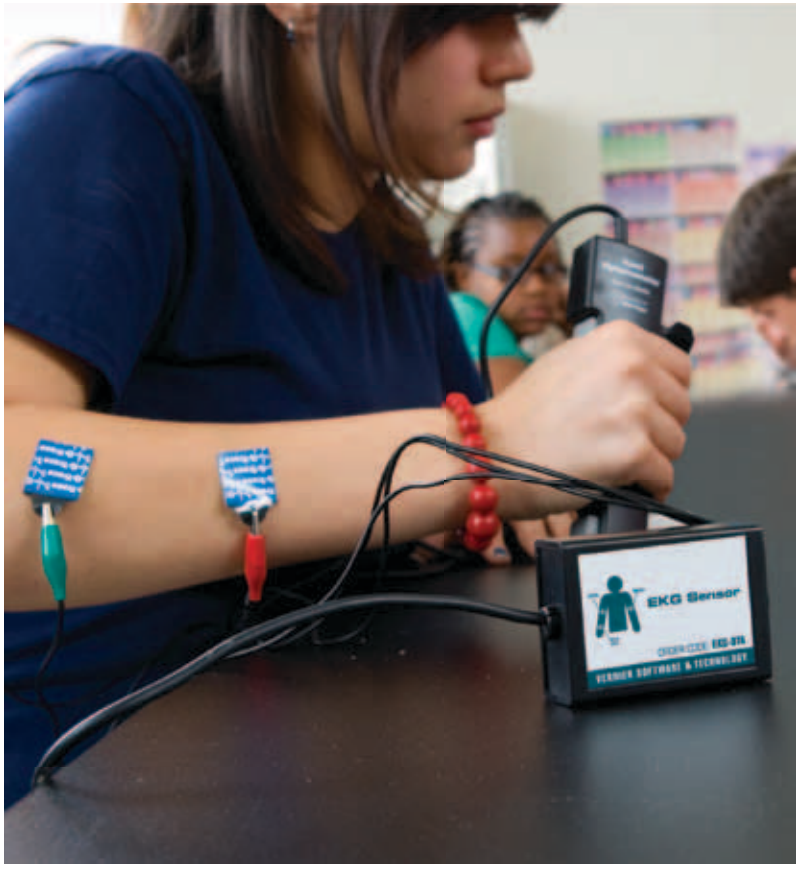
d. O_2 Gas Sensor, ORDER CODE O2-BTA, $188

The O_2 Gas Sensor measures oxygen concentration in air. Use this sensor to analyze breathing patterns, or combine with a Vernier Spirometer to measure tidal volumes and oxygen concentrations of deeply inhaled and exhaled air. See page 108 for more details of this sensor.

e. Other Vernier Biomedical Sensors:

- **Blood Pressure Sensor**
- **Hand-Grip Heart Rate Monitor**
- **CO_2 Gas Sensor**
- **Surface Temperature Probe**

See pp. 76–77 for additional physiology sensors appropriate for biomedical engineering.



PROJECT LEAD THE WAY PLTW

Biomedical Sciences™ Program from Project Lead The Way

Project Lead The Way is a national organization that works with schools to implement rigorous hands-on, project-based engineering and engineering technology programs. They provide educators with the training and course materials needed to prepare students to be successful in these pursuits. For more information on PLTW, go to **www.pltw.org**

We have worked with PLTW to integrate our SensorDAQ interface and our physiology sensors into their Biomedical Sciences courseware. For more information, go to **www.vernier.com/pltw**

NEW National Instruments LabVIEW™ Education Edition

Graphical Programming Language for High School STEM Education

The new National Instruments LabVIEW Education Edition software helps teachers bring STEM concepts to life through hands-on learning. This industry-standard NI LabVIEW (used throughout the engineering disciplines) includes modules for educational hardware, including these Vernier products:

- Go! Devices (Go!Link, Go!Temp, Go!Motion)
- NXT Sensor Adapter
- SensorDAQ

Full integration means that everything required for these Vernier products is included. Install NI LabVIEW Education Edition, connect the Vernier hardware, and begin running examples to:

- Log and analyze data
- Introduce engineering measurement and automation concepts
- Build sensor-controlled NXT robots
- Perform feedback and control
- Introduce biomedical concepts with physiology sensors

Single-User NI LabVIEW Education Edition, ORDER CODE **LVEE-1, $100**
25-User NI LabVIEW Education Edition, ORDER CODE **LVEE-25, $1,500**
Go to **www.vernier.com/labview** for more information

License available to U.S. high schools only. NI LabVIEW for use outside the U.S., in colleges and universities, or for individual use, should be purchased from National Instruments at **ni.com/**

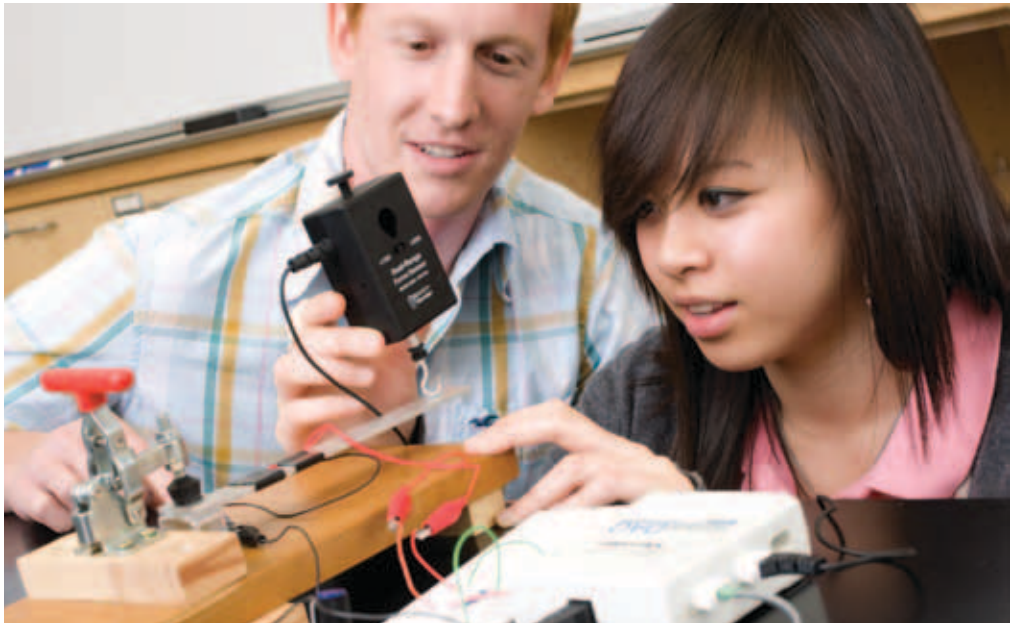
Interfaces directly integrated in NI LabVIEW Education Edition Software:

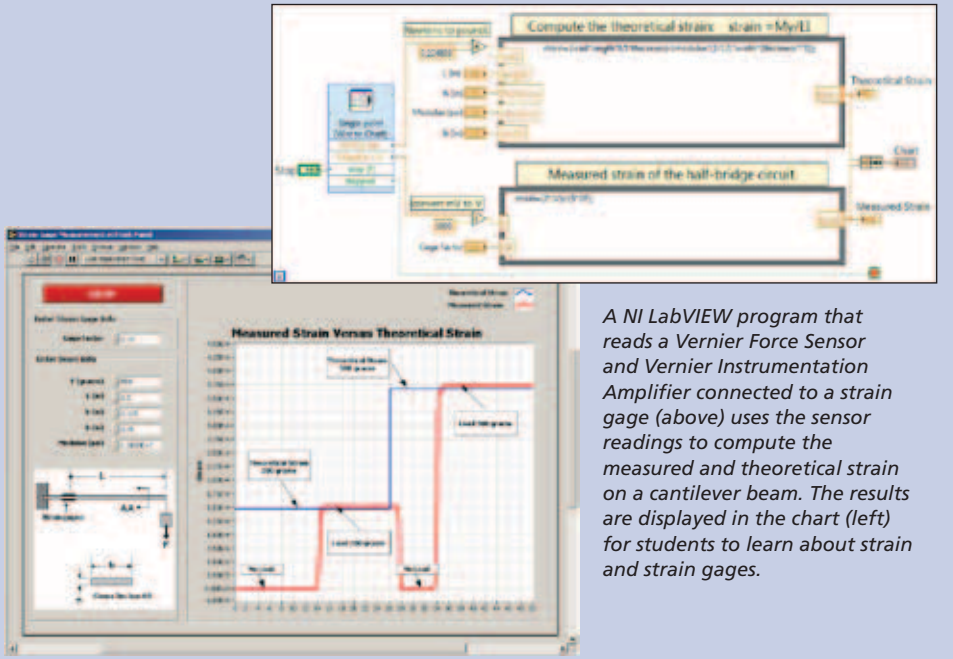
SensorDAQ

NXT Sensor Adaptor

Go! devices

Other LabVIEW supported products: LabQuest, LabPro, Mini GC, NI ELVIS





Compute the theoretical strains: strain = M*y/I
Measured strain of the half-bridge circuit
Measured Strain Versus Theoretical Strain

A NI LabVIEW program that reads a Vernier Force Sensor and Vernier Instrumentation Amplifier connected to a strain gage (above) uses the sensor readings to compute the measured and theoretical strain on a cantilever beam. The results are displayed in the chart (left) for students to learn about strain and strain gages.

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with a Vernier lab book. The **NEW** *Hands-On Introduction to NI LabVIEW with Vernier SensorDAQ* contains introductory NI LabVIEW material and exercises to get started using SensorDAQ.

2 ADD THE SENSORDAQ

SensorDAQ is our computer interface designed for engineering educators.

3 CHOOSE YOUR SENSORS

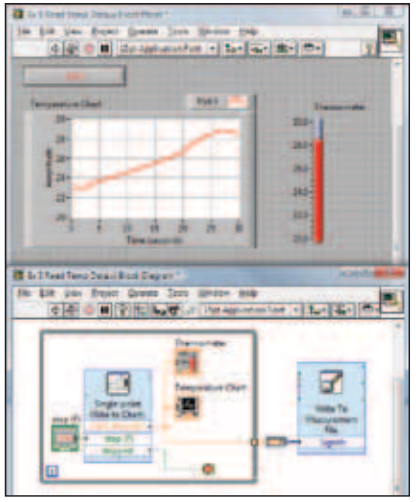
Choose from Vernier's recommended packages or build your own from our list of sensors.

Our Package contains all the sensors needed to perform every experiment in our engineering lab book.

4 ADD A COPY OF NI LABVIEW

We recommend NI LabVIEW Education Edition, which introduces students to a powerful engineering software. See page 51 for details.

NEW



Creating a LabVIEW VI to read and present temperature data

GREAT VALUE

Purchase the Lab Book

$25 ORDER CODE LWV

This book introduces NI LabVIEW programming through a series of hands-on exercises using Vernier sensors and SensorDAQ. Besides learning the basics of NI LabVIEW programming, your students will get started collecting and analyzing data. This enhances the learning experience and helps them move to the stage of creating their own custom programs and independent projects. When you buy the book you will receive:

- An introduction to the basics of NI LabVIEW programming.
- Step-by-step instructions for writing introductory NI LabVIEW programs for SensorDAQ.
- NI LabVIEW sample programs on CD.
- Microsoft® Word® files for all exercises on CD. Easily modify these files to meet your personal teaching style.
- A generous site license. Buy one book and duplicate exercises for your class.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

- Exercise 7 – Create a Temperature Conversion SubVI

SensorDAQ Automation
- Exercise 8 – Control Analog Out, Digital Out and Pulse Out

Project
- Exercise 9 – Build a Sensor Control Program

Intro to NI LabVIEW Package

Purchase one package per lab group (2–4 students).

SensorDAQ Interface & Sensors	CODE	Intro to NI LabVIEW Package EE-LV
SensorDAQ	SDAQ	$189
Stainless Steel Temperature Probe	TMP-BTA	$29
Microphone	MCA-BTA	$39
Voltage Probe *(included with SensorDAQ)*		$0
Package Price		**$257**

You will also need:

LabVIEW Education Edition Software (one per seat)
ORDER CODE **LVEE-1, $100** (single user), or
ORDER CODE **LVEE-25, $1,500** (25 users)

Hands-On Introduction to NI LabVIEW with Vernier SensorDAQ
ORDER CODE **LWV, $25**

SPECIAL OFFER: BUY 8 INTRO TO NI LABVIEW PACKAGES AT $249 EACH AND **SAVE $64!**

Screw Terminal
Build circuits, control motors, create custom sensors, and more
- 2 analog input
- 4 digital I/O
- 1 analog output
- 1 counter/pulse generator

3 Analog Sensor Channels
Connect any Vernier analog sensor

1 Digital Sensor Channel
Connect any Vernier digital sensor

Fast Sampling Rate
Up to 48,000 samples per second

Designed by NI & Vernier for Engineering Education

Perfect for teaching NI LabVIEW or for building sensor-control student projects using NI LabVIEW software

SensorDAQ, a joint project of National Instruments and Vernier, is a USB data-acquisition interface that offers convenience and power to engineering students.

- Connect over 50 Vernier sensors
- Compatible with any Vernier analog or digital sensor. Go to **www.vernier.com/sensordaq**
- Use with NI LabVIEW software version 8.2 or newer (not included, see page 51)
- Over a dozen NI LabVIEW-based projects available at **www.vernier.com/engineering**

Not compatible with Logger Pro *or Logger Lite software*

$189 ORDER CODE **SDAQ**

Includes: SensorDAQ, Voltage Probe, USB cable, User's Manual, and sample programs

1 IT ALL STARTS WITH CURRICULUM

Looking to introduce inquiry into your curriculum? Start with a Vernier lab book. Aligned to state and national science standards, our lab book contains environmental science inquiry investigations.

2 CHOOSE YOUR INTERFACE

Vernier LabQuest – LabQuest is our color, touch-screen interface. Use it as a standalone device or as a computer interface. More details on pp. 3–9.

LabQuest Mini – LabQuest Mini is a low-cost computer solution with five sensor ports. More details on pp. 10–11.

3 CHOOSE YOUR SENSORS

Choose from Vernier's recommended packages or build your own from our list of sensors.

Our Deluxe Package contains all the sensors needed to perform every experiment in our environmental science lab book.

Build custom packages online at **www.vernier.com/guide**

4 ADD A COPY OF LOGGER *PRO*

This award-winning software is the best value around! Includes a site license for all computers in your school or your college department, as well as students' personal computers. See pp. 14–17 for details.

GREAT VALUE

Purchase the Lab Book

$48 ORDER CODE ESI

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information for successful inquiry investigations.
- 34 ready-to-use student versions of experiments in print.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested researchable questions, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

Investigating Environmental Science through Inquiry lab book contains the following inquiry experiments:

USING A TEMPERATURE PROBE
- Seasons and Angle of Insolation
- A Local Weather Study
- Water Quality
- Long Term Water Monitoring
- Soil Temperature
- Biodiversity in Ecosystems
- Water Cycle Column Investigations
- Decomposition Column Investigations
- Ecocolumn Investigations
- Global Warming
- Insulation Study
- Fossil Fuel Energy
- Energy Conversion
- An Investigation of Passive Solar Heating
- A Pollution Study

USING A TURBIDITY SENSOR
- Water Quality
- Long Term Water Monitoring
- Water Treatment
- Population Dynamics
- A Pollution Study

USING A pH SENSOR
- Water Quality
- Long Term Water Monitoring
- Water Treatment
- Soil pH
- Soil and Acid Precipitation
- Water Cycle Column Investigations
- Decomposition Column Investigations
- The Effect of Acid Deposition on Aquatic Ecosystems
- A Pollution Study
- Ecocolumn Investigations

USING A CONDUCTIVITY SENSOR
- Water Quality
- Long Term Water Monitoring
- Water Treatment
- Investigating Salinity
- Soil Salinity
- Water Cycle Column Investigations
- Ecocolumn Investigations
- The Effect of Acid Deposition on Aquatic Ecosystems

USING A SOIL MOISTURE SENSOR
- Soil Moisture
- Managing Garden Soil Moisture
- Biodiversity in Ecosystems
- Water Cycle Column Investigations
- Ecocolumn Investigations
- A Pollution Study

USING A DISSOLVED OXYGEN PROBE
- Investigating Dissolved Oxygen
- Water Quality
- Long Term Water Monitoring
- Biochemical Oxygen Demand
- Primary Productivity
- A Pollution Study

USING A UV SENSOR
- A Local Weather Study
- UV Investigations
- Comparing Sunscreens

USING A VOLTAGE & CURRENT PROBE
- Wind Power
- Photovoltaic Cells

USING A RELATIVE HUMIDITY SENSOR
- A Local Weather Study
- Biodiversity in Ecosystems
- Water Cycle Column Investigations
- Decomposition Column Investigations
- Ecocolumn Investigations
- A Pollution Study

USING A LIGHT SENSOR
- Biodiversity in Ecosystems
- Water Cycle Column Investigations
- Decomposition Column Investigations
- Ecocolumn Investigations
- Measuring Particulates
- Energy Conversions

USING A CO_2 GAS SENSOR
- Cell Respiration
- Water Cycle Column Investigations
- Decomposition Column Investigations
- Investigating Indoor Carbon Dioxide Concentrations
- A Pollution Study
- Ecocolumn Investigations

NSTA RECOMMENDS

Inquiry Investigations for Environmental Science

The *Investigating Environmental Science through Inquiry* lab book contains 34 inquiry-based, environmental science investigations to prompt students' interests in the long- and short-term effects of man-made environmental changes.

Each investigation includes

- An overview of the investigation.
- Expected learning outcomes.
- Crucial information on carrying out each phase of an inquiry experiment.
- Sample data.
- Sample researchable questions.
- Answers to students' preliminary activity questions.

The book is based on recommendations from the National Research Council report, Learning and Understanding: Improving Advanced Study of Mathematics and Science in U.S. High Schools (2002) and leading inquiry-based learning experts. Labs are correlated to AP and IB standards, as well as NRC and AAAS benchmarks for scientific inquiry.

Vernier GPS Sensor

$64 ORDER CODE VGPS

The Vernier GPS (Global Positioning System) Sensor collects location data such as latitude, longitude, and altitude right on your LabQuest or computer.

- Record your location as you measure water quality at various sites along a stream.
- Track location *vs.* sensor data

See page 105 for more information.

See also *Water Quality with Vernier* lab book on page 80.

$64 a

$95 b

$209 c

$79 d

Did you know?

All IB Group 4 experimental science courses now require students to use sensors for data logging in an experiment and software for graph plotting.

a. Vernier GPS Sensor

ORDER CODE **VGPS, $64**

The Vernier GPS (Global Positioning System) Sensor collects location data such as latitude, longitude, and altitude right on your LabQuest or computer.

- Record your location as you measure water quality at various sites along a stream.
- Track location *vs.* sensor data, such as acceleration in a car or train.

b. Soil Moisture Sensor

ORDER CODE **SMS-BTA, $95**

Uses capacitance to measure the water content of soil. Simply insert this rugged sensor in the soil to be tested and the volumetric water content of soil is reported in percent. Use it to conduct experiments in ecology, environmental science, agricultural science, horticulture, biology, and more.

c. Dissolved Oxygen Probe

ORDER CODE **DO-BTA, $209**

This popular sensor is used to determine the concentration of oxygen in aqueous solutions. More on page 102.

- Built-in temperature compensation and a fast response time.
- Includes a zero-oxygen solution, two caps fitted with membranes, a 100% calibration bottle, and electrode filling solution.

d. pH Sensor

ORDER CODE **PH-BTA, $79**

This high quality, individual calibrated, Ag-AgCl combination electrode has a range of 0 to 14 pH units. Included is a convenient soaking bottle with storage solution. pH Buffer Capsules (ORDER CODE PHB, $12) and pH Storage Solution (ORDER CODE PH-SS, $16) are also available. More on page 109.

AP*/IB† Environmental Science

It is recommended that the AP Environmental Studies program and the IB Environmental Systems and Societies program include a strong laboratory and field investigation component. The *Investigating Environmental Science through Inquiry* lab book includes experiments correlated to both AP and IB standards. Environmental topics include:

- Earth Systems and Resources—Air and Water
- Earth Systems and Resources—Soil
- The Living World
- Energy Resources and Consumption
- Pollution

MORE ONLINE

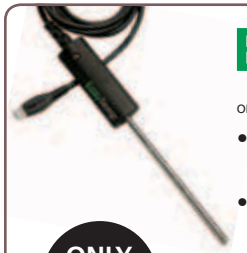
MATH



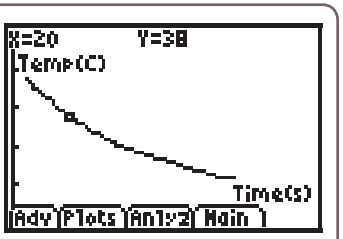
ONLY $38

VERNIER EasyTemp®

ORDER CODE **EZ-TMP, $38**

- Simplifies temperature data collection
- Plugs directly into your TI-84 Plus calculator or TI-Nspire handheld

More on page 95



$y = a \cdot b^x + c$

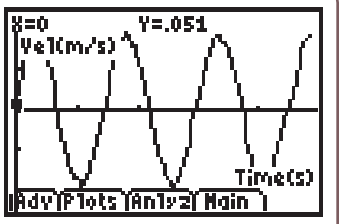
Exponential

TEXAS INSTRUMENTS CBR 2™

ORDER CODE **CBR2, $93**

- Real-time graphing of motion data
- Plugs directly into your TI graphing calculator

More on page 95



$y = a \cdot \sin(b(x - c)) + d$

Linear, parabolic, sinusoidal, and more

VERNIER EasyLink®

ORDER CODE **EZ-LINK, $59**

- Direct data collection for your TI-84 Plus calculator or TI-Nspire handheld
- Compatible with 43 Vernier sensors for even more flexibility (34 when used with TI-Nspire)

More on page 94

$y = \frac{k}{x}$

Linear, exponential, inverse, and much more

MORE ONLINE
Let us show you how EASY data collection can be:
www.vernier.com/math

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with an activity book. Aligned to state and national science and math standards, our books contain experiments for TI graphing calculators (except TI-Nspire) and computers.

2 CHOOSE YOUR INTERFACE

Vernier EasyLink – The least expensive way to collect data using a single sensor. See page 94 for more information.

Vernier LabPro – For use with compatible TI graphing calculators (except TI-Nspire) or computers. See pp. 88–89.

3 CHOOSE OR BUILD YOUR PACKAGE OF SENSORS

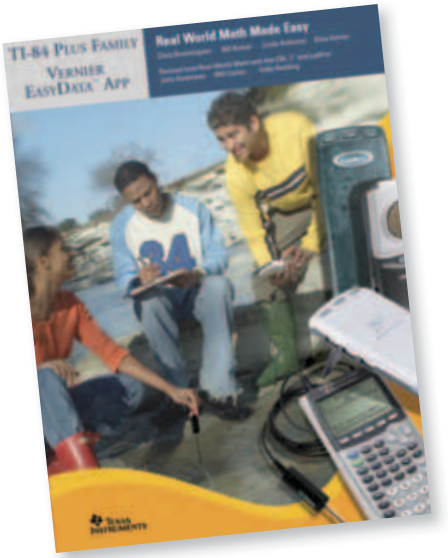
Choose from Vernier's recommended packages or build your own.

Our deluxe package contains all the sensors needed to do every activity in our math book.

Build custom packages online at **www.vernier.com/guide**

4 ADD A COPY OF LOGGER *PRO*

(Recommended) This award-winning software is the best value around! Logger *Pro* provides the easiest way to get data from a compatible calculator into the computer. See pp. 14–17 for details.



GREAT VALUE

Purchase the Lab Book

$25 ORDER CODE RWCALC

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book, you will receive:

- Essential teacher information.
- 31 ready-to-use student versions of calculator activities in print.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

***Real World Math Made Easy* activity book contains the following activities:**

☐ **USING A MOTION DETECTOR**
- Straight Line Distance Graphs
- Newton's Second Law *†
- The Linear Force Relation for a Rubber Band *†
- Position and Time for a Cart on a Ramp
- Height and Time for a Bouncing Ball
- Definition of Rate
- Interpreting Velocity Graphs
- Applications of the Distance Formula
- Exponential Pattern of Rebound Heights
- Pendulum Motion
- Damped Harmonic Motion
- Describing Data With Statistical Plots
- Solving a System of Linear Equations
- Plotting an Ellipse
- Parametric Plots
- Piecewise-Defined Functions
- Greatest Integer Functions

☐ **USING A TEMPERATURE PROBE**
- Mixing Liquids of Different Temperatures
- How Hot Objects Cool
- Describing Data with Statistics*

☐ **USING A VOLTAGE PROBE**
- Exponential Models

☐ **USING A LIGHT SENSOR**
- Distance and Intensity
- Periodic Phenomena*

☐ **USING A GAS PRESSURE SENSOR**
- Linear Relationship between Water Depth and Pressure
- Linear Rates of Pressure Increase
- The Inverse Relationship between Pressure and Volume

■ **USING A MICROPHONE**
- Sound Waveform Models*

■ **USING A FORCE SENSOR**
- Linear Relationship between Weight and Quantity
- Volume and Weight
- Newton's Second Law *
- The Linear Force Relation for a Rubber Band *

■ **USING A PH SENSOR**
- The Exponential pH Change
- An Application of the Logistic Function

* Experiment not supported by Easy Package † Requires Deluxe Package

$12 a

$79 b

$55 c

a. Voltage Probe, ORDER CODE VP-BTA, $12

The Voltage Probe can be used to study voltages produced by simple voltaic cells (like the lemon battery at the right), for simple electric circuit labs, or to do battery life studies.

Shown here with a Go!Link USB interface and Logger Lite software (included FREE with purchase). See page 12 for more information.

Go!Link, ORDER CODE GO-LINK, $61

---

b. Motion Detector, ORDER CODE MD-BTD, $79

The Motion Detector can be used to study the motion of a cart on a ramp or a ball tossed into the air. You can also use it to teach your students how graphs work by having them try to move in front of the motion detector to match a distance *vs.* time or velocity *vs.* time graph.

- Measure objects as close as 15 cm to the detector and as far away as 6 m.
- Pivoting head and rubber feet for ease of use

---

c. Light Sensor, ORDER CODE LS-BTA, $55

Our Light Sensor approximates the human eye in spectral response and can be used over three different illumination ranges, which you select with a switch. Use it for inverse square law experiments or for studying polarizers, reflectivity, or solar energy.

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book, you will receive:

- Essential teacher information.
- 35 ready-to-use student versions of Logger *Pro* experiments in print; LabQuest, computer, and calculator versions on CD.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

Physics with Vernier lab book contains the following experiments:

USING A MOTION DETECTOR
- Graph Matching
- Cart on a Ramp
- Determining *g* on an Incline
- Ball Toss*
- Air Resistance*
- Simple Harmonic Motion
- Energy of a Tossed Ball
- Energy in Simple Harmonic Motion*
- Momentum, Energy and Collisions
- Impulse and Momentum
- Back and Forth Motion

USING A FORCE SENSOR
- Newton's Second Law*
- Newton's Third Law*
- Static and Kinetic Friction
- Impulse and Momentum

USING A MICROPHONE
- Sound Waves and Beats
- Tones, Vowels and Telephones
- Mathematics of Music
- Speed of Sound

USING A VOLTAGE PROBE
- Capacitors*

USING PHOTOGATES
- Picket Fence Free Fall*
- Projectile Motion
- Atwood's Machine*
- Pendulum Periods

USING A TEMPERATURE PROBE
- Newton's Law of Cooling

USING AN ACCELEROMETER
- Bungee Jump Accelerations
- Centripetal Accelerations on a Turntable
- Accelerations in the Real World
- Newton's Second Law

USING CURRENT & VOLTAGE PROBES
- Ohm's Law
- Series and Parallel Circuits
- Electrical Energy

USING A MAGNETIC FIELD SENSOR
- The Magnetic Field in a Coil
- The Magnetic Field in a Slinky*
- The Magnetic Field of a Permanent Magnet

USING A LIGHT SENSOR
- Polarization of Light
- How Light Intensity Varies with Distance

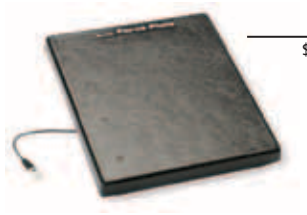
FOR TI CALCULATOR-BASED DATA COLLECTION: see page 94

You can substitute wireless force and acceleration sensors by going to **www.vernier.com/wirelessphysics**



a. Power Amplifier, ORDER CODE **PAMP, $199**

The Vernier Power Amplifier allows you to drive loads with +/-10 V and currents up to 1 A. Works with any waveform, including DC, sine, square, triangle, and sawtooth waveforms. The Power Amplifier can drive a variety of loads, including speakers, lamps, small DC motors, and RLC circuits. More on page 110.

b. NEW Power Amplifier Accessory Speaker

ORDER CODE **PAAS-PAMP, $99**

This kit includes a speaker and accessories used with the Vernier Power Amplifier to study mechanical waves and springs. The speaker contains a lightweight metal disc glued to the speaker cone. A drive post attached to the metal plate allows you to drive elastic materials such as strings and springs.

c. Rotary Motion Sensor

ORDER CODE **RMV-BTD, $169**

A new design with a lower price! Our Rotary Motion Sensor lets you monitor angular motion precisely and easily, and is direction sensitive. Use it to collect angular displacement, angular velocity, and angular acceleration data.

d. Rotary Motion Accessory Kit

ORDER CODE **AK-RMV, $110**

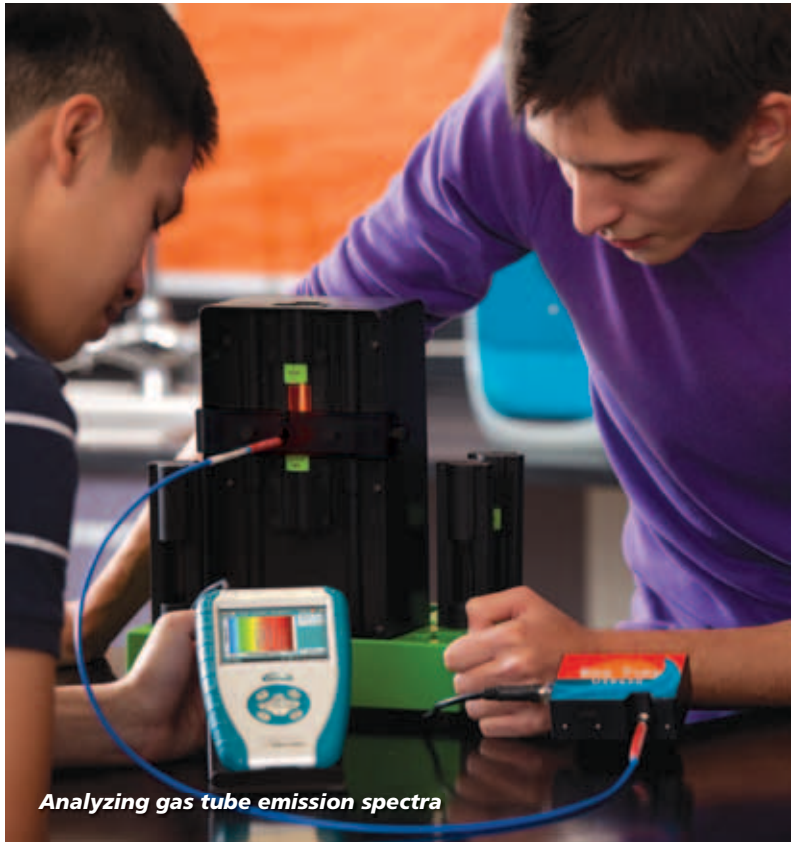
This accessory kit is used to study the motion of a physical pendulum; the rotational inertia of disks, rings, and point masses; and the conservation of angular momentum.

e. Force Plate, ORDER CODE **FP-BTA, $215**

The Force Plate is a large force sensor—tough enough to jump on. About the size and shape of a bathroom scale, the Force Plate has two ranges: one reading up to 3500 N, and the other to 800 N. Two handles are included for pushing or pulling. Additional pairs of handles are available (ORDER CODE FP-HAN, $15).

Experiment 32 from **Physics with Vernier, "Sound Waves and Beats"**

Exploring Newton's 3rd Law



Analyzing gas tube emission spectra

Nuclear Radiation with Vernier
by John Gastineau

$25 ORDER CODE NRV

This book contains six experiments for data collection with a radiation monitor including Distance and Radiation, Counting Statistics, Lifetime Measurement, Background Radiation Sources, Radiation Shielding, and Alpha, Beta, and Gamma.

f. Red Tide Emissions Spectrometer

ORDER CODE **ESRT-VIS, $1154**

The perfect tool to conduct emissions analysis and much more. It connects directly to your computer with a standard USB cable and gives precise measurements over a range of 380–950 nm. Use the Red Tide Emissions Spectrometer with a recommended Optical Fiber Assembly to add versatility and allow a greater range of analysis options. More on page 39.

See **www.vernier.com/spectroscopy** for details.

g. Optical Fiber

ORDER CODE **VIS-NIR, $138**

400 µm diameter VIS-NIR Optical Fiber. Delivers consistent results with minimal signal variance.

h. Digital Radiation Monitor

ORDER CODE **DRM-BTD, $254**

The Digital Radiation Monitor consists of a Geiger-Mueller tube and a digital rate meter mounted in a small, rugged, plastic case with a digital meter. The unit is battery operated and can be used with or without a computer for measurement of alpha, beta, and gamma radiation. It can be used to explore radiation statistics and to measure the rate of nuclear decay.

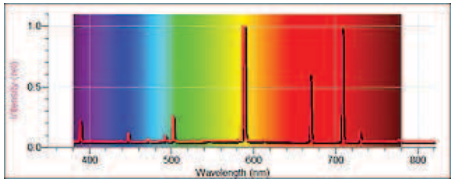
i. NEW Photogate Bar Tape Kit

ORDER CODE **TAPE-VPG, $17**

The Photogate Bar Tape Kit contains a flexible plastic tape called "Bar Tape" and a guide that allows the tape to be used with a Vernier Photogate. The tape can be attached to objects and pulled through the photogate. This allows you to perform experiments as you would with a ticker tape timer.

Looking for carts and tracks? See pp. 72–73

f $1,154

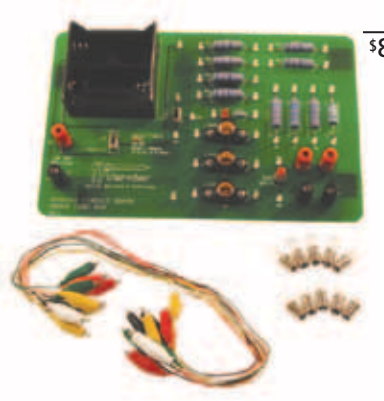


g $138

VIS-NIR Optical Fiber

h $254

i NEW $17



$89 (a)

$199 (b)

NEW $225 (c)

a. Vernier Circuit Board, ORDER CODE VCB, $89

The Vernier Circuit Board is a simple board that makes it easy to create circuits without a lot of loose components. Includes a resettable fuse, two powering options, resistors, capacitors, an LED, lamps, and binding posts to add your own components.

b. Extech Digital DC Power Supply

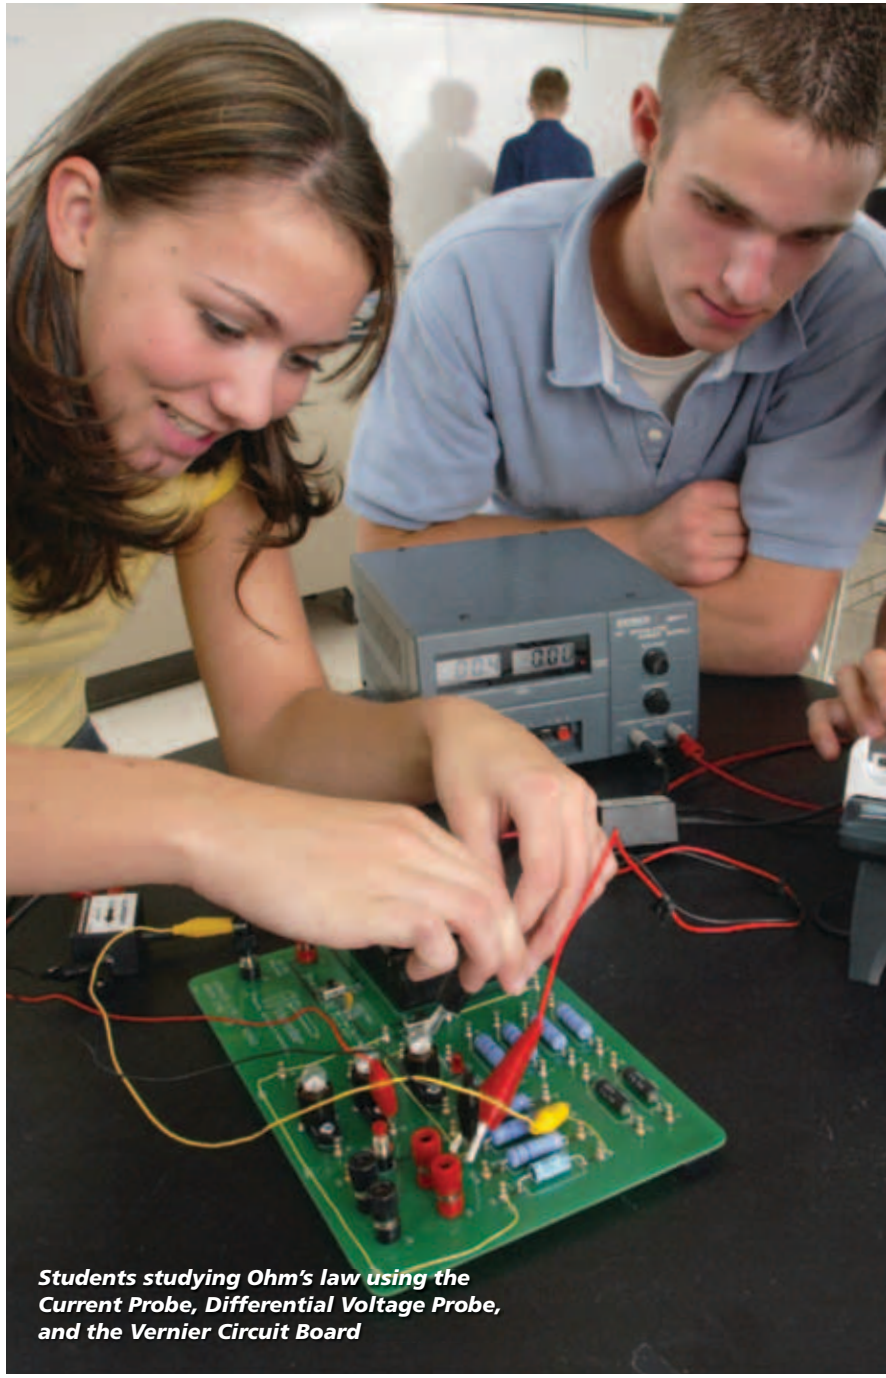
ORDER CODE EXPS, $199

The Extech Digital DC Power Supply is an excellent choice for the physics classroom. It has three outputs: adjustable 0–30 V at 0–3 A, fixed 5 V, and fixed 12 V. It provides constant current or constant voltage modes and has overload and short circuit protection. Binding post terminals are provided for the variable supply. Easy snap terminals are provided for the 5 V and 12 V outputs. The front panel contains digital voltage and current meters for the variable output, so you won't need additional metering in a typical experiment.

c. NEW Spectrum Tube Single Power Supply, ORDER CODE ST-SPS, $225

With ultra-safe design, this spectrum tube power supply will provide a simple means of viewing gas discharge spectral lines with any of our spectrometers. Unlike other designs, this system has no exposed high voltage. The gas tubes are permanently enclosed in plastic carriers that protect the tubes from breakage. There are no through-the-glass electrodes, so the tubes last far longer than older designs. The Power Supply will energize one tube at a time, and includes storage space for an additional six tubes. All tubes sold separately.

Spectrum Tube – Hydrogen	**ST-H, $36**
– Nitrogen	**ST-N, $36**
– Helium	**ST-HE, $36**
– Neon	**ST-NE, $36**
– Carbon Dioxide	**ST-CO2, $36**
– Air	**ST-AIR, $36**
– Argon	**ST-AR, $36**



Students studying Ohm's law using the Current Probe, Differential Voltage Probe, and the Vernier Circuit Board

A Den of Inquiry

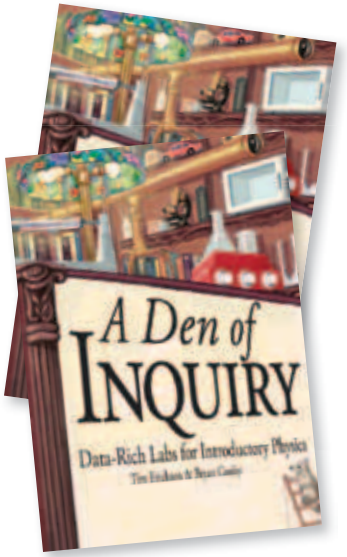
by Tim Erikson

Volume 1, ORDER CODE **DEN, $40**

Fifteen labs for introductory physics. These labs emphasize data analysis and mathematical modeling, but they do not require sensors. The book includes files and instructions for Logger *Pro* and for Fathom. Each lab includes teacher notes and black line masters.

Volume 2, ORDER CODE **DEN2, $40**

Sixteen sensor-based activities for introductory physics. Topics include kinematics, mechanics and energy; activities emphasize data analysis and modeling. Either Fathom 2.1 or Logger *Pro* software can be used. Each lab includes blackline masters for student handouts and extensive teacher notes, including extensions and options for making the activities more open-ended.



Fathom Dynamic Data™ Software

With Fathom, fitting functions to data is powerfully easy to do! Now compatible with Vernier sensors, Fathom gives students the tools to

- Collect real-time data quickly and easily
- Graph, summarize, and analyze the data—while the experiment is in progress and afterwards
- . Create mathematical models to explore physical phenomena in depth

Go to **www.vernier.com/fathom** for more information.

d. Charge Sensor

ORDER CODE **CRG-BTA, $75**

The Charge Sensor is used as an electronic electroscope. An extremely high impedance voltage sensor with a 0.01 µF input capacitor makes possible quantitative measurements in many electrostatic experiments. The sensor has three operating ranges and a zeroing switch to discharge the input capacitor. For detailed specifications see page 100.

e. NEW Electrostatics Kit

ORDER CODE **ESK-CRG, $109**

The Electrostatics Kit is an accessory for the Vernier Charge Sensor. This kit allows students to perform a range of experiments in electrostatics including the use of Faraday's Ice Pail, quantitative and qualitative measurement of charge, charging by friction, charging by contact and charging by induction. The kit includes

- Faraday pail and cage
- Grounding plane
- Grounding wires and wrist strap
- Charge producers and proof plane
- Wool, vinyl, nylon rod, PVC rod
- Cotton cloth

f. NEW High Voltage Electrostatics Kit

ORDER CODE **HVEK-CRG, $249**

The High Voltage Electrostatics Kit is an accessory for the Vernier Charge Sensor. Use it with a Faraday Pail and the Charge Sensor to investigate the distribution of charge on a sphere, transfer of charge on contact between two spheres and charging by induction. The kit includes an electrostatics voltage source (Output 750, 1500, 3000, 6000 VDC) and two conducting spheres. Extremely low output current makes this device safe for classroom use.

d $75

e NEW $109

f NEW $249

Vernier Dynamics Carts

- Perfect for kinematics and dynamics experiments.
- Easily attach a Dual-Range Force Sensor or our Wireless Dynamics Sensor System.
- Use them with our Motion Detector.
- Roll the cart down a ramp to study constant acceleration.
- Use two carts to study momentum conservation.
- With extremely low friction due to sealed bearings and machined wheels, our superior carts give very high quality data.
- Interchangeable magnetic and VELCRO® end caps make it possible to do many experiments.
- The Plunger Cart has a spring-loaded plunger for consistent collisions, while the Standard Cart is similar, but has no plunger.
- Vernier carts are compatible with other common carts and tracks.

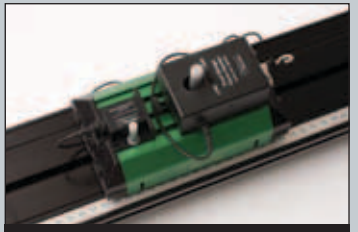
Experiments for Cart and Track

- Measuring *g* on an Incline
- Newton's Second Law
- Momentum, Energy, and Collisions
- Impulse and Momentum

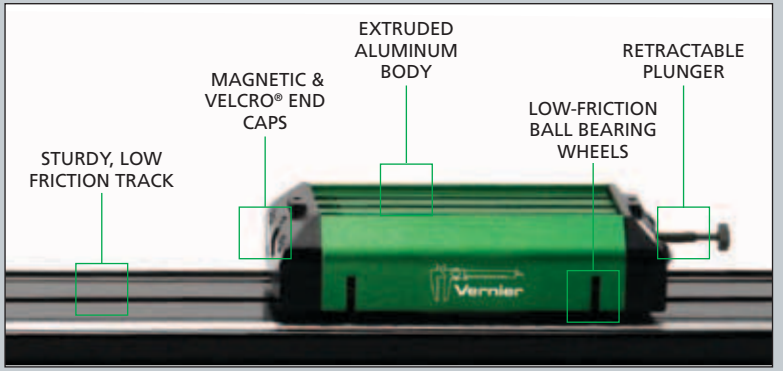
These experiments can be found in our lab book Physics with Vernier *(see page 66).*

Dynamics Cart with WDSS attached

For WDSS see page 75



Dual-Range Force Sensor and Accelerometer



Track-to-Track Coupler Connects two tracks

$30 ORDER CODE T2T-VDS

Optics Expansion Kit

$169 ORDER CODE OEK

Add the Vernier Optics Expansion Kit to your dynamics track to conduct optics experiments, such as image formation with lenses and light intensity *vs.* distance. You can even use the kit to build a basic telescope.

Vernier Optics Expansion Kit Includes:

- Three lens holders with bases
- 100 mm converging lens
- 200 mm converging lens
- -150 mm diverging lens
- Screen, holder, and base
- Combination luminous and point light source
- Light sensor holder
- Aperture screen
- Power Supply

Bumper and Launcher Kit

$89 ORDER CODE BLK

Contains accessories for experiments involving the Vernier Dual-Range Force Sensor, Vernier Wireless Dynamics System, and the Vernier Dynamics System. The accessories allow you to perform a wide range of experiments in kinematics and dynamics.

Vernier Bumper and Launcher Kit Includes:

- One track bracket
- One dual-magnet bumper
- One DFS end mount screw
- Two magnetic bumpers
- Two rubber bumpers
- Two hoop bumpers
- Two clay holders
- One small brick of clay

Vernier Dynamics System $269 ORDER CODE VDS

Use the Vernier Dynamics System to improve your kinematics and dynamics experiments. The Dynamics System is ideal for studying Newton's second law, acceleration on an inclined plane, momentum, and much more. Vernier sensors such as our Motion Detector, Dual-Range Force Sensor, Wireless Dynamics Sensor System, Photogate, and Accelerometer easily attach to the Dynamics System. Make the most of your track by adding the Vernier Optics Expansion Kit for studying optics. You can even couple two tracks together with our Track-to-Track Coupler.

Vernier Dynamics System Includes:

- Combination 1.2 m Dynamics Track/Optics Bench
- Standard Cart with Magnetic and VELCRO End Caps
- Plunger Cart with Magnetic and VELCRO End Caps
- Mass – 500 g
- Two Adjustable Two Foot Levelers
- Adjustable End Stop
- Motion Detector Bracket
- Two Photogate Brackets
- Rod Clamp

by Priscilla Laws

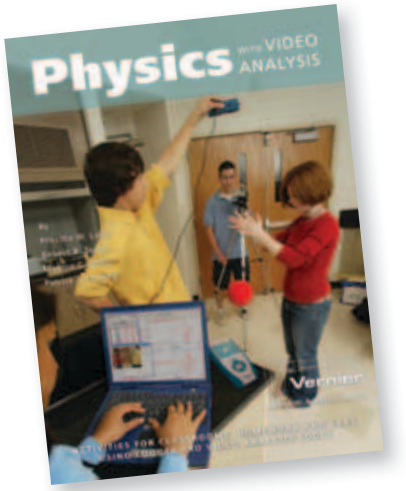
Explorations in Physics
by David P. Jackson, Priscilla W. Laws, and Scott V. Franklin

Understanding Physics
by Karen Cummings, Priscilla W. Laws, Edward F. Redish, and Patrick J. Cooney

Activity-Based Physics High School CD

ORDER CODE **ABP-CD, $200** ***(Five-Year License)***

Select portions of the *RealTime Physics, Workshop Physics,* and *Tools for Scientific Thinking* curricula have been adapted for high school use, including topics on mechanics, thermal physics, electricity and magnetism, wave motion, sound and nuclear radiation. Worksheets, exams, sample homework assignments, video materials, and teacher guides are included. Purchase includes a 5-year site license to modify and reprint materials at one school. *(Available for high school purchase only)*



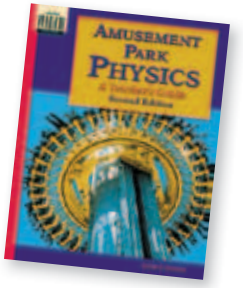
NEW *Physics with Video Analysis*

by Priscilla Laws, Robert Teese, Maxine Willis, and Patrick Cooney

$48 ORDER CODE **PVA**

The new *Physics with Video Analysis* book contains a wide selection of video analysis activities for introductory physics at either the high school or college level. Topics include kinematics, dynamics, circuits, sound, electrostatics, and more. Includes a CD with professionally made videos, student activities, solutions, and Logger *Pro* setup files.

MORE ONLINE
Free sample activities and videos are available now at **www.vernier.com/livephoto**



Amusement Park Physics

Amusement Park Physics, ORDER CODE **APP, $23**

by Nathan Unterman

This book provides a wealth of information about planning an amusement park study program. Included are student sheets for activities that can be performed at amusement parks or carnivals. Activities and sample data are provided for those who do not have access to an amusement park.

Download a free guide to using our equipment at amusement parks: **www.vernier.com/cmat/datapark.html**

Data Vest, ORDER CODE DV, $32

The Data Vest makes hands-free data collection at an amusement park or playground easy. The vest has a front pouch for the LabQuest, LabPro, CBL 2, or the Wireless Dynamics Sensor System. It has two inside pockets for the sensors, and side straps to hold the vest in place.

A Completely Wireless System

The Wireless Dynamics Sensor System combines a 3-axis accelerometer, force sensor, and altimeter into one unit that communicates wirelessly with your computer via Bluetooth®. You can also use it as a standalone data logger. It's more than just a wireless sensor; it's a complete data-collection system completely free of friction due to cables.

Wireless Dynamics Sensor System

ORDER CODE **WDSS, $249**

Includes rechargeable battery and charger, bumpers for collisions, hooks for mounting either end of the unit in different positions, mounting hardware for Vernier and other dynamics carts, and manual.

You will also need:

- Logger *Pro* 3.5 software (or newer)
- Windows XP SP2 (or newer) or Vista Macintosh OS X 10.3 (or newer)
- Bluetooth® wireless technology enabled computer (see **www.vernier.com/wdss** for supported devices)

Bluetooth USB Dongle Radio

ORDER CODE **BLUE-USB, $35**

Each computer used with a WDSS must have a Bluetooth radio. This convenient USB dongle adds Bluetooth capabilities to any Windows XP SP2, Vista, or Mac OS X 10.3 or newer computer that lacks Bluetooth.

Wireless Dynamics Sensor System

Altimeter
Record changes in altitude for roller-coaster physics.

3-Axis Accelerometer
Three orthogonally mounted sensors let you measure acceleration in all directions.

Data-Collection Status

Communication Status

On-Board Memory
Retains data even after the unit is turned off.

Multiple Mounting Options
Mount the device in almost any orientation using standard hardware.

Battery Charging Indicator

Simple, one-button operation allows you to start and stop data collection when away from the computer.

Additional Hook
Allows the device to be mounted in-line for tension and pendulum experiments.

Force Sensor
Custom load cell provides accurate, repeatable results.

$249 ORDER CODE **WDSS**

- Measures acceleration, force, and altitude
- Wireless real-time data collection
- Works as a standalone data logger

Human Physiology with Vernier lab book contains the following experiments:

USING A SURFACE TEMPERATURE SENSOR
- Warming Function of Nasal Passageways
- Effect of Vascularity on Skin Temperature Recovery

USING A BLOOD PRESSURE SENSOR
- Blood Pressure as a Vital Sign
- Blood Pressure and Exercise
- Diurnal Blood Pressure Variation
- Heart Rate and Blood Pressure as Vital Signs
- Heart Rate, Blood Pressure, and Exercise

USING A HEART RATE MONITOR
- Heart Rate as a Vital Sign
- Heart Rate and Exercise
- Heart Rate Response to Baroreceptor Feedback
- Effect of Coughing on Heart Rate
- Heart Rate and Blood Pressure as Vital Signs
- Heart Rate, Blood Pressure, and Exercise

USING A HAND DYNAMOMETER
- Grip Strength Comparison
- Grip Strength and Muscle Fatigue
- EMG and Muscle Fatigue

USING AN EKG SENSOR
- Analyzing the Heart with EKG
- Introduction to EMG
- Neuromuscular Reflexes (with Accelerometer)
- Neuromuscular Reflexes (without Accelerometer)
- Muscle Function Analysis
- EMG and Muscle Fatigue

USING A SPIROMETER
- Lung Volumes and Capacities
- Respiratory Response to Physiologic Challenges
- Analysis of Lung Function
- Oxygen and Aerobic Metabolism

USING AN O_2 GAS SENSOR
- Oxygen and Aerobic Metabolism
- Oxygen Extraction by the Lungs
- Effect of "Dead Space" on Oxygen Exchange

USING A 25-G ACCELEROMETER
- Neuromuscular Reflexes (with Accelerometer)

Did you know?

CO_2 Gas Sensor, ORDER CODE **CO2-BTA, $249** The CO_2 Gas Sensor can be used to measure human respiration. The high range can measure up to 100,000 ppm, while the low range, with a maximum of 10,000 ppm, still gives the precision you need for smaller changes in CO_2 gas concentration. The CO_2 Gas Sensor makes a great addition to your human physiology labs.

EKG Sensor	EKG-BTA	$147	$147
Hand-Grip Heart Rate Monitor	HGH-BTA	$119	$119
Surface Temperature Sensor	STS-BTA	$23	$23
Blood Pressure Sensor	BPS-BTA	$105	$105
Hand Dynamometer	HD-BTA	$99	$99
Spirometer	SPR-BTA		$199
O_2 Gas Sensor	O2-BTA		$188
Package Price		**$822**	**$1,209**

SPECIAL OFFER: BUY 8 DELUXE PACKAGES AT $1,153 EACH AND **SAVE $448!**

You will also need:

Human Physiology with Vernier **lab book**
ORDER CODE **HP-A, $48** See previous page.

Logger *Pro* 3 software, ORDER CODE **LP, $189**
Buy just one copy—site license for ALL school and students' personal computers is included! See pp. 14–17 for details.

VERNIER LABQUEST MINI

Computer Only

LabQuest Mini Interface & Sensors	CODE	Starter Package LM-HP-ST	Deluxe Package LM-HP-DX
Vernier LabQuest Mini Interface	LQ-MINI	$149	$149
EKG Sensor	EKG-BTA	$147	$147
Hand-Grip Heart Rate Monitor	HGH-BTA	$119	$119
Surface Temperature Sensor	STS-BTA	$23	$23
Blood Pressure Sensor	BPS-BTA	$105	$105
Hand Dynamometer	HD-BTA	$99	$99
Spirometer	SPR-BTA		$199
O_2 Gas Sensor	O2-BTA		$188
Package Price		**$642**	**$1,029**

SPECIAL OFFER: BUY 8 DELUXE PACKAGES AT $998 EACH AND **SAVE $248!**

You will also need:

Human Physiology with Vernier **lab book**
ORDER CODE **HP-A, $48** See previous page.

Logger *Pro* 3 software, ORDER CODE **LP, $189**
Buy just one copy—site license for ALL school and students' personal computers is included! See pp. 14–17 for details.

Hand Dynamometer

ORDER CODE **HD-BTA, $99**

Our strain-gage based isometric dynamometer can be used to measure grip strength or finger pinch strength. For more details on this sensor, see page 105.

Spirometer

ORDER CODE **SPR-BTA, $199**

Monitor inspiratory and expiratory air flow and make lung volume measurements. For more details on this sensor, see page 113.

Force Plate

ORDER CODE **FP-BTA, $215**

The Force Plate is a large force sensor—tough enough to jump on. Use it to study balance and biomechanics. For more details on this sensor, see page 104.

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with Vernier lab books. Aligned to state and national science standards, our lab books contain experiments for LabQuest, computers, and TI graphing calculators.

2 CHOOSE YOUR INTERFACE

Vernier LabQuest – LabQuest is our color, touch-screen interface. Use it as a standalone device or as a computer interface. More details on pp. 3–9.

LabQuest Mini – LabQuest Mini is a low-cost computer solution with five sensor ports. More details on pp. 10–11.

3 CHOOSE YOUR SENSORS

Choose from Vernier's recommended packages or build your own.

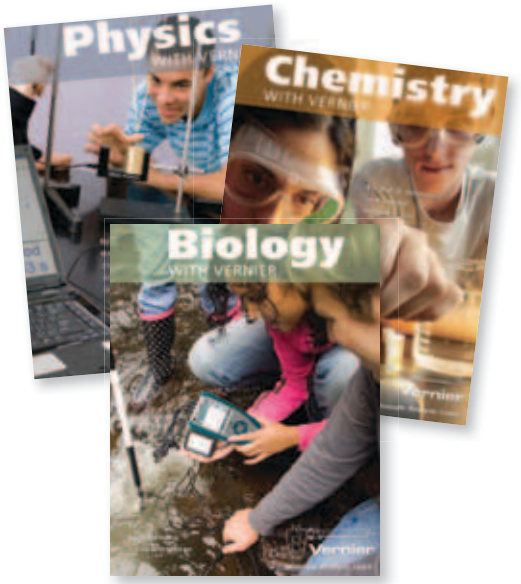
Our science department package includes the most frequently used sensors for a variety of science courses to support your entire department.

For a complete list of sensors by subject:

Biology pp. 19–28
Chemistry pp. 29–41
Earth Science pp. 42–45
Environmental Science pp. 54–56
Math pp. 57–59
Middle School pp. 60–61
Physical Science pp. 62–64
Physics pp. 67–75
Water Quality pp. 80–81

4 ADD A COPY OF LOGGER *PRO*

This award-winning software is the best value around! Includes a site license for all computers in your school or your college department, as well as students' personal computers. See pp. 14–17 for details.



GREAT VALUE

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information.
- Ready-to-use student versions of Logger *Pro* experiments in print; LabQuest, computer, and calculator versions on CD, unless otherwise noted.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

See pp. 82–87 for more information on all of our lab books.

Why Use Probeware in Science?

Hands-on science using Vernier technology gets students excited about science and deepens their understanding of complex concepts. It gives students the tools to analyze data and think like real scientists.

Request our **White Paper** by emailing us at **whitepaper@vernier.com**

Science Department LabQuest and LabQuest Mini Packages

Purchase one package per lab group (2–4 students) OR BUILD YOUR OWN PACKAGE from the list of recommended sensors below.

VERNIER LABQUEST

Standalone or Computer

LabQuest Interface & Sensors	CODE	Deluxe Package LQ-SCI-DX
Vernier LabQuest Interface	LABQ	$329
Stainless Steel Temperature Probe	TMP-BTA	$29
Light Sensor	LS-BTA	$55
Voltage Probe	VP-BTA	$12
Motion Detector	MD-BTD	$79
Dual-Range Force Sensor	DFS-BTA	$109
Microphone	MCA-BTA	$39
Low-g Accelerometer	LGA-BTA	$89
Magnetic Field Sensor	MG-BTA	$58
Gas Pressure Sensor	GPS-BTA	$83
pH Sensor	PH-BTA	$79
Conductivity Probe	CON-BTA	$95
Colorimeter	COL-BTA	$115
Dissolved Oxygen Probe	DO-BTA	$209
CO_2 Gas Sensor	CO2-BTA	$249
Hand-Grip Heart Rate Monitor	HGH-BTA	$119
Package Price		**$1,748**

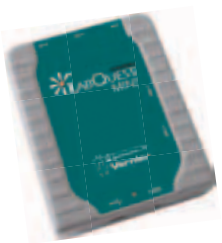
SPECIAL OFFER: BUY 8 DELUXE PACKAGES AT $1,675 EACH AND **SAVE $584!**

You will also need:

Lab books, see pp. 82–87.

Logger *Pro* 3 software, ORDER CODE **LP, $189**
Buy just one copy—site license for ALL school and students' personal computers is included! See pp. 14–17 for details.

VERNIER LABQUEST MINI



Computer Only

LabQuest Mini Interface & Sensors	CODE	Deluxe Package LM-SCI-DX
Vernier LabQuest Mini Interface	LQ-MINI	$149
Stainless Steel Temperature Probe	TMP-BTA	$29
Light Sensor	LS-BTA	$55
Voltage Probe	VP-BTA	$12
Motion Detector	MD-BTD	$79
Dual-Range Force Sensor	DFS-BTA	$109
Microphone	MCA-BTA	$39
Low-g Accelerometer	LGA-BTA	$89
Magnetic Field Sensor	MG-BTA	$58
Gas Pressure Sensor	GPS-BTA	$83
pH Sensor	PH-BTA	$79
Conductivity Probe	CON-BTA	$95
Colorimeter	COL-BTA	$115
Dissolved Oxygen Probe	DO-BTA	$209
CO_2 Gas Sensor	CO2-BTA	$249
Hand-Grip Heart Rate Monitor	HGH-BTA	$119
Package Price		**$1,568**

SPECIAL OFFER: BUY 8 DELUXE PACKAGES AT $1,521 EACH AND **SAVE $376!**

You will also need:

Lab books, see pp. 82–87.

NEW! Student Editions Available
www.vernier.com/studenteditions

Vernier lab books are loaded with teacher tips, sample graphs, and more. When you buy the lab book you will receive:

- Essential teacher information.
- 16 ready-to-use student versions of Logger *Pro* experiments in print; LabQuest, computer, and calculator versions on CD.
- A generous site license. Buy one book and duplicate labs for your class.
- Easily edit labs to meet your personal teaching style using Microsoft® Word® files for all versions of the experiments on CD.
- Suggested answers, sample data, and graphs.
- Complete equipment and supplies list.

Features listed above are only available when you purchase the lab book. They are not available in the downloadable evaluation PDF.

DOWNLOAD evaluation PDFs for all labs at **www.vernier.com/labs**

Water Quality with Vernier lab book contains the following water quality tests:

☐ ☐ **USING A DISSOLVED OXYGEN SENSOR**
- Dissolved Oxygen
- Biochemical Oxygen Demand

☐ ☐ **USING A TEMPERATURE PROBE**
- Temperature

☐ ☐ **USING A PH SENSOR**
- pH
- Alkalinity

☐ ☐ **USING A TURBIDITY SENSOR**
- Turbidity

☐ ☐ **USING A CONDUCTIVITY PROBE**
- Total Dissolved Solids
- Chloride and Salinity

☐ ☐ **USING A COLORIMETER**
- Phosphates, Ortho- and Total
- Nitrate

☐ ☐ **USING A FLOW RATE SENSOR**
- Flow Rate and Stream Discharge

☐ ☐ **USING ION-SELECTIVE ELECTRODES****
- Nitrate
- Ammonium Nitrogen
- Calcium and Water Hardness
- Chloride and Salinity

WATER TESTS REQUIRING NO SENSOR
- Total Solids
- Fecal Coliform
- Total Water Hardness

WATER-QUALITY INDEX TESTS
- Temperature
- pH
- Turbidity
- Total Solids
- Dissolved Oxygen
- Biochemical Oxygen Demand
- Phosphates, Ortho- and Total
- Fecal Coliform
- Nitrate

☐ STARTER PACKAGES ☐ DELUXE PACKAGES

** Ion-Selective Electrodes require good chemical technique and careful calibration to obtain accurate results. They are not recommended for middle school or elementary students.

AP Many of the experiments in our water quality lab book are the perfect complement to labs for AP* Environmental Science. See **www.vernier.com/ap**

* AP and Advanced Placement Program are registered trademarks of the College Entrance Examination Board, which was not involved in the production of and does not endorse this product.

GLOBE® and Vernier

Use Vernier sensors to collect GLOBE data! The following Vernier sensors meet GLOBE specifications:

- Dissolved Oxygen Probe
- pH Sensor
- Stainless Steel Temperature Probe
- Conductivity Probe
- Barometer
- Relative Humidity Sensor
- Turbidity Sensor
- Salinity Sensor
- Nitrate Ion-Selective Electrode
- Soil Moisture Sensor

To learn more about Vernier and GLOBE, see **www.vernier.com/globe**

Water Quality LabQuest Packages

Purchase one package per lab group (2–4 students) or BUILD YOUR OWN PACKAGE from the list of recommended sensors below.

Standalone or Computer

LabQuest Interface & Sensors	CODE	Starter Package LQ-WQ-STR	Deluxe Package LQ-WQ-DLX
Vernier LabQuest Interface	LABQ	$329	$329

Buy just one copy—site license for ALL school and students' personal computers is included! See pp. 14–17 for details.

More Products for Water Quality Testing

Salinity Sensor, ORDER CODE **SAL-BTA, $92**
For measuring TDS or salinity in sea or brackish water

Extra-Long Temperature Probe
ORDER CODE **TPL-BTA, $72**
30-meter cable to measure at depth

Water Depth Sampler, ORDER CODE **WDS, $71**
To collect samples from as deep as 15 meters

LabQuest Lanyard, ORDER CODE **LQ-LAN, $5**
To secure LabQuest around students' necks

Vernier EasyLink, ORDER CODE **EZ-LINK, $59**
For use with TI calculators

Collecting water quality data with TI graphing calculators? See **www.vernier.com/easylink**

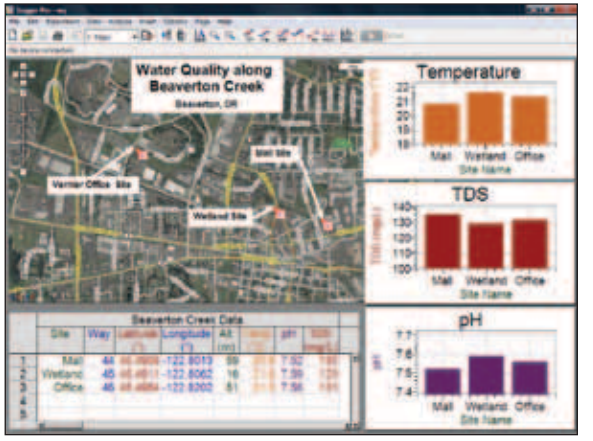
$64 ORDER CODE VGPS

Vernier GPS Sensor

The Vernier GPS (Global Positioning System) Sensor collects location data such as latitude, longitude, and altitude right on your LabQuest or computer.

- Record your location as you measure water quality at various sites along a stream.
- Data (sensor and GPS) can be exported to GIS software or Google Maps.

See page 105 for more information



Use Logger Pro *to map GPS data and water quality sensor data.*

Enhance Your Curriculum with Vernier Lab Books

Buy just one copy per classroom, photocopy the labs, or print them from the included CD.

Each book includes a CD with word-processing files of the student instructions for data collection using Logger *Pro* (computer), LabQuest App (LabQuest as a standalone device), and EasyData and DataMate (TI graphing calculators).

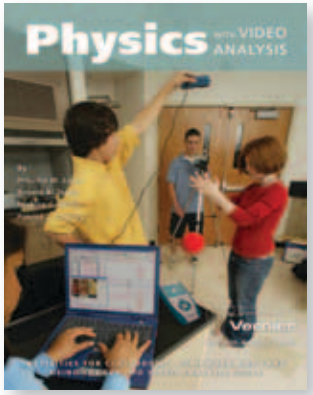
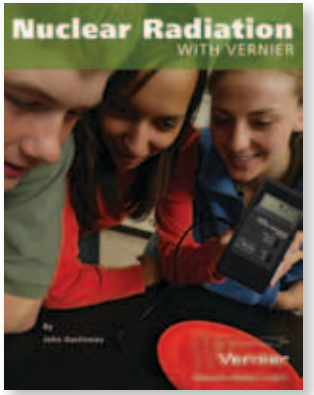
(b)

(c) **NEW**

(d)



(e) **NEW**



(f)

a. *Chemistry with Vernier,* ORDER CODE **CWV, $48**

Highly recommended for first-year chemistry.

This book contains 36 experiments in thermochemistry, gas laws, acid-base reactions, equilibrium, electrochemistry, electrolytes, states of matter, and more. See page 30 for more information.

b. *Advanced Chemistry with Vernier,* ORDER CODE **CHEM-A, $48**

Highly recommended for second-year or advanced chemistry.

This book contains 35 advanced chemistry experiments designed for use with Vernier probeware. The first 22 experiments have a 1-to-1 correlation with the 22 experiments recommended by AP for AP* Chemistry courses. See page 32 for more information.

c. NEW *Investigating Chemistry through Inquiry,* ORDER CODE **CHEM-I, $48**

Great resource for those teaching inquiry-based chemistry.

This book contains 25 inquiry-based chemistry investigations. It includes topics such as thermochemistry, acids and bases, stoichiometry, chemical kinetics, and properties of solutions. See page 37 for more information.

d. *Physics with Vernier,* ORDER CODE **PWV, $48**

Highly recommended for first-year physics or advanced physics.

This book contains 35 experiments in mechanics, sound, light, electricity, and magnetism. See page 66 for more information.

e. NEW *Physics with Video Analysis,* ORDER CODE **PVA, $48**

The new *Physics with Video Analysis* book contains a wide selection of video analysis activities using Logger *Pro* for introductory physics. Topics include kinematics, dynamics, circuits, sound, electrostatics, and more. Includes a CD with professionally made videos, student activities, solutions, and Logger *Pro* setup files. See page 74.

f. *Nuclear Radiation with Vernier,* ORDER CODE **NRV, $25**

This book contains six experiments for data collection with a radiation monitor including Distance and Radiation, Counting Statistics, Lifetime Measurement, Background Radiation Sources, Radiation Shielding, and Alpha, Beta, and Gamma. See page 36 for more information.

*AP and Advance Placement Program are registered trademarks of the College Entrance Examination board, which was not involved in the production of and does not endorse this product.

MORE ONLINE
FREE evaluation labs available at **www.vernier.com/labs**

Did you know?

You can customize the lab instructions on your LabQuest using My LabQuest Library. See page 7 for details.

a. *Biology with Vernier,* ORDER CODE **BWV, $48**

Highly recommended for first-year biology.

This book contains 31 experiments in cell respiration, photosynthesis, membrane diffusion, osmosis, human physiology, transpiration, fermentation, and other important biology concepts. See page 20 for more information.

b. REVISED *Advanced Biology with Vernier,* ORDER CODE **BIO-A, $48**

Highly recommended for second-year or advanced biology.

This new book contains all 12 recommended AP* Biology labs. Additional advanced-level labs make it appropriate for introductory college biology courses, as well. See page 22 for more information.

c. *Human Physiology with Vernier,* ORDER CODE **HP-A, $48**

This book, for data collection on computers and LabQuest only, contains 24 human physiology experiments. The experiments are designed to encourage students to think about the physiology of various human organ systems. See page 76 for more information.

d. *Investigating Environmental Science through Inquiry,* ORDER CODE **ESI, $48**

Highly recommended for those teaching inquiry-based environmental science.

This book contains 34 inquiry-based investigations. It covers issues that prompt students' interest in the effects of man-made environmental changes. Includes correlations for AP and IB environmental science. Student labs are not platform specific. See page 54 for more information.

e. *Water Quality with Vernier,* ORDER CODE **WQV, $48**

This book contains 16 water quality tests, including pH, total dissolved solids, dissolved oxygen, BOD, flow rate, turbidity, nitrates, and phosphates. All nine tests in the Water Quality Index (WQI) are supported. See page 80 for more information.

NOW AVAILABLE – Student Editions of our Lab Books

Have you always wanted your students to have their own copies of our lab books? Our most popular lab books are now available as student editions. These print-on-demand lab books include:

- Student pages for all experiments in the corresponding Teacher Editions
- Table of contents
- Sensor chart
- Your choice of printed Logger *Pro* (computer) or LabQuest App (LabQuest standalone) instructions
- Coil bound

The following student editions are available:

Advanced Biology with Vernier - Logger *Pro*, **BIOA-S-LP**
Advanced Biology with Vernier - LabQuest App, **BIOA-S-LQ**
Biology with Vernier - Logger *Pro*, **BWV-S-LP**
Biology with Vernier - LabQuest App, **BWV-S-LQ**
Advanced Chemistry with Vernier - Logger *Pro*, **CHEMA-S-LP**
Advanced Chemistry with Vernier - LabQuest App, **CHEMA-S-LQ**
Chemistry with Vernier - Logger *Pro*, **CWV-S-LP**
Chemistry with Vernier - LabQuest App, **CWV-S-LQ**
Human Physiology with Vernier - Logger *Pro*, **HPA-S-LP**
Human Physiology with Vernier - LabQuest App, **HPA-S-LQ**
Physics with Vernier - Logger *Pro*, **PWV-S-LP**
Physics with Vernier - LabQuest App, **PWV-S-LQ**
Water Quality with Vernier - Logger *Pro*, **WQV-S-LP**
Water Quality with Vernier - LabQuest App, **WQV-S-LQ**

Helping You Meet Content Standards

Vernier understands that meeting curriculum standards is an important part of today's teaching. As state and federal requirements change, we are committed to providing you with the most current information. You will find the following alignments to standards on our web site, **www.vernier.com/standards**, for all lab books published by Vernier:

- Science standards for all 50 U.S. states
- Provincial standards for Canada
- NCTM (National Council for Teachers of Mathematics)
- AP and IB
- NSES (National Science Education Standards)
- ISTE (International Society for Technology Educators)

a. *Middle School Science with Vernier,* ORDER CODE **MSV, $48**

This book is written specifically for students in grades 6–8. It contains 38 experiments in Earth science, life science, and physical science. See page 60 for more information.

b. *Forensics with Vernier,* ORDER CODE **FWV, $30**

Based on the book *Forensics: Connecting Science Investigations with TI Data Collection Activities* (see page 91), this book is for teachers at the high school level who wish to introduce their students to forensics using engaging and realistic laboratory activities with Vernier probeware. The book contains 14 lab activities dealing with various aspects of forensic science.

c. *Earth Science with Vernier,* ORDER CODE **ESV, $48**

This book contains 33 experiments and six projects. Topics include geology, soil analysis, water quality, hydrology, oceanography, meteorology, and energy. See page 42 for more information.

d. *Physical Science with Vernier,* ORDER CODE **PSV, $48**

This book contains 40 experiments for physical science (middle school through grade 10). These experiments are perfect for introductory physical science and integrated science classes. See page 62 for more information.

e. *STEM with Vernier® and LEGO® MINDSTORMS® NXT*
ORDER CODE **STEM, $35**

This book includes 14 environmental lab activities and 4 design-and-build robotics projects using pH, Conductivity, UV, and Soil Moisture Sensors coupled with the LEGO MINDSTORMS NXT intelligent interface. Includes a CD with MINDSTORMS NXT sample programs, movie clips, and LEGO Digital Designer files. See page 47 for more information.

f. NEW *STEM 2 with Vernier® and LEGO® MINDSTORMS® NXT*
ORDER CODE **STEM2, $35**

This is our second book of projects and activities for engineering eduction and includes 12 lab activities and 8 design-and-build robotics projects. It covers topics in physical science and engineering, including mechanics, pressure, electricity, and magnetism. Includes a CD with MINDSTORMS NXT sample programs, movie clips, and LEGO Digital Designer files. See page 46 for more information.

a. *Ciencias con lo Mejor de Vernier,* ORDER CODE **CMV-LP, $48**

We took 42 of our best experiments from five subject areas and translated them into Spanish. Contents of the lab book include:

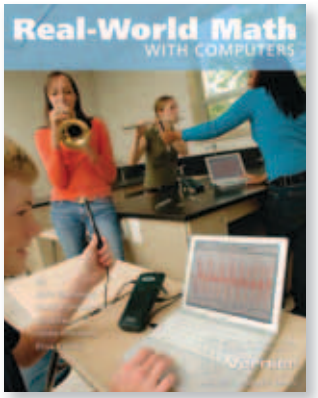
- 1 Introducción a la Adquisición de Datos experiment
- 9 Biología (Biology/Life Science) experiments
- 9 Química (Chemistry) experiments
- 9 Ciencias de la Tierra (Earth Science) experiments
- 9 Física (Physics) experiments
- 5 Calidad del Agua (Water Quality) tests

b. *Real-World Math with Computers,* ORDER CODE **RWC-LP, $48**

c. *Real World Math Made Easy,* ORDER CODE **RWCALC, $25**

These manuals contain 29 or more activities that explore real-world applications of math concepts from algebra through calculus. Activities cover topics such as linear, quadratic, and periodic functions, statistics, systems of equations, and many more.

(a)



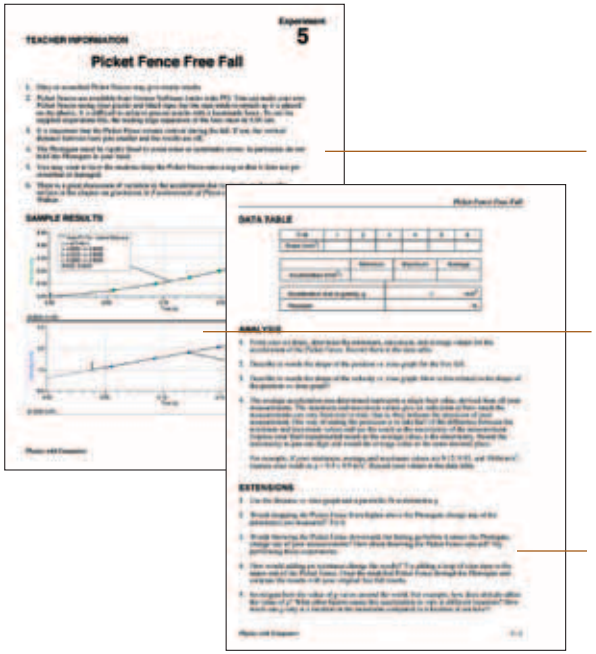
(b)

(c)

***CD includes easy-to-edit Word files** for the student experiments, and instructions for LabQuest, computers, and calculators.*

Lab Book Features

From Physics with Vernier *lab book*



Preliminary questions promote inquiry-based experiments

Procedures give ***detailed instructions***

Detailed teacher information *helps experiments run smoothly*

Background information *reinforces the scientific concepts behind the experiment and helps enrich the laboratory experience*

Sample data and graphs *let instructors see expected results*

Clear illustrations *help students visualize the experiment*

Concise objectives *specify desired student performance*

Extensions *provide suggestions for further investigation*

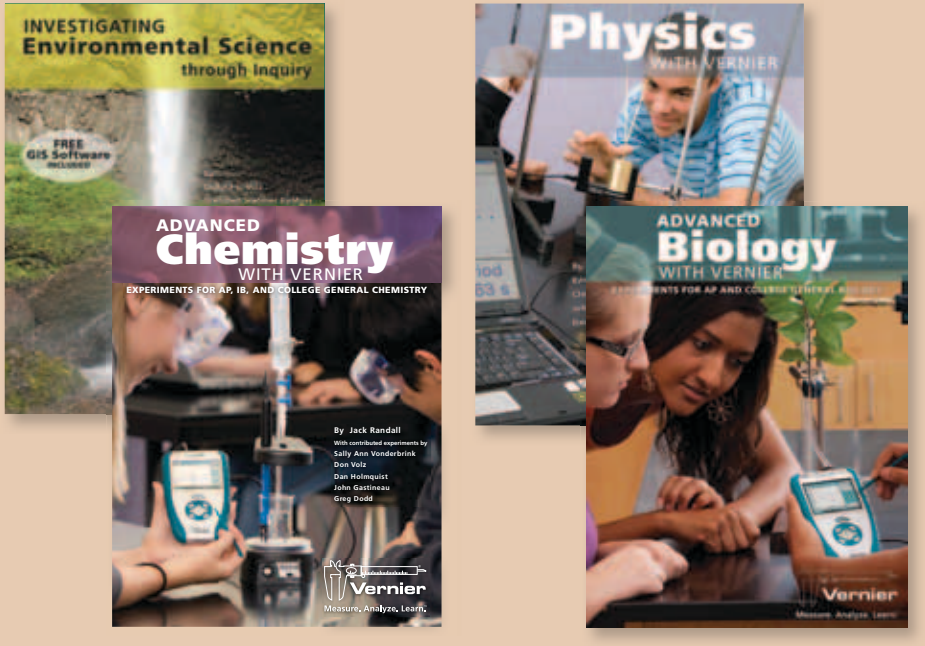
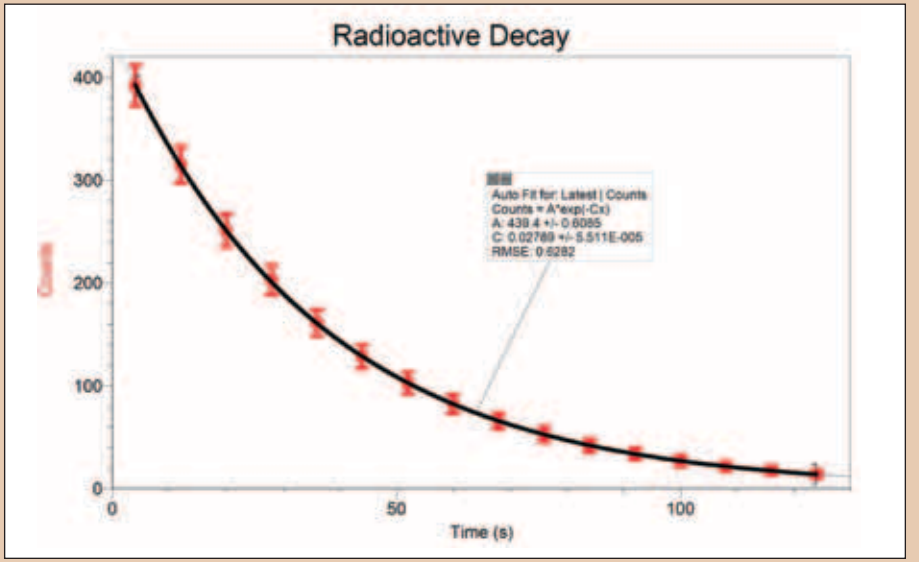
Your Complete Solution for AP* and IB† Science

Curriculum



- Correlations to AP and IB standards for biology, chemistry, physics, and environmental science
- Editable Word files for all student pages, so you can customize the labs to meet your standards
- ICT support for the IB group 4 sciences
- Questions promote higher-order thinking skills
- Lab extensions encourage inquiry investigations

Software



Logger *Pro* 3, ORDER CODE **LP, $189,** One CD for Mac OS X and Windows

- Manual configuration mode allows students to set all data-collection parameters
- Error bars
- Log and semi-log graphs
- Modeling
- Custom curve fits
- Double y-graphs
- Gel analysis
- Peak integration on GC data
- Export data to Google Maps or GIS
- Spectrometer data analysis

See pp. 14–17 for details.

New IB† Standards All IB Group 4 experimental science courses now require students to use sensors for data logging in an experiment and software for graph plotting. For IB correlations, visit **www.vernier.com/ib**

*AP and Advanced Placement Program are registered trademarks of the College Entrance Examination Board, which was not involved in the production of and does not endorse this product.

†The IB Diploma Program is an official program of the International Baccalaureate Organization (IBO) which authorizes schools to offer it. The material available here has been developed independently of the IBO and is not endorsed by it.

Additional information on data-collection packages for AP and IB science can be found on the following pages:

Advanced Biology – pp. 22–23
Advanced Chemistry – pp. 32–33
Environmental Science – pp. 54–55
Physics – pp. 66–67

VERNIER LabPro®

Versatile Solution for Calculator and Computer Data Collection

$220 ORDER CODE LABPRO

Three different ways to collect data! You can use LabPro with a computer, Texas Instruments graphing calculator, or on its own as a remote data collector.

- Multi-channel interface
- **55 Vernier sensors** can be connected to the LabPro
- Six data-collection channels allow you to use multiple sensors at once
- Samples up to 50,000 readings per second

Included with LabPro: LabPro unit, power adapter, USB computer cable, calculator cable, calculator cradle, DataMate calculator program, user's manual, voltage probe

Technology & Learning Winner 2004 Award of Excellence

AAPT Most Innovative New Product Award

Media & Methods Awards Portfolio Winner 2004

LabPro Features

COMPATIBILITY

- Windows or Macintosh computers via USB with Logger *Pro* software
- TI graphing calculators: All current TI graphing calculators except TI-Nspire and TI-Nspire CAS

SIX DATA-COLLECTION CHANNELS

- Four channels for 48 different sensors, including temperature, dissolved oxygen, gas pressure, pH, force, and more
- Two channels for motion detectors, photogates, radiation monitor, rotary motion sensor, drop counter, and digital control unit.

SENSOR COMPATIBILITY

- Supports our auto-ID sensors or can be used with our older sensors using the appropriate adapters.

UPGRADEABLE

- LabPro's flash memory means that new features can easily be added as they become available. Simply download and install the new operating system from our web site…**FREE!**

SAMPLING

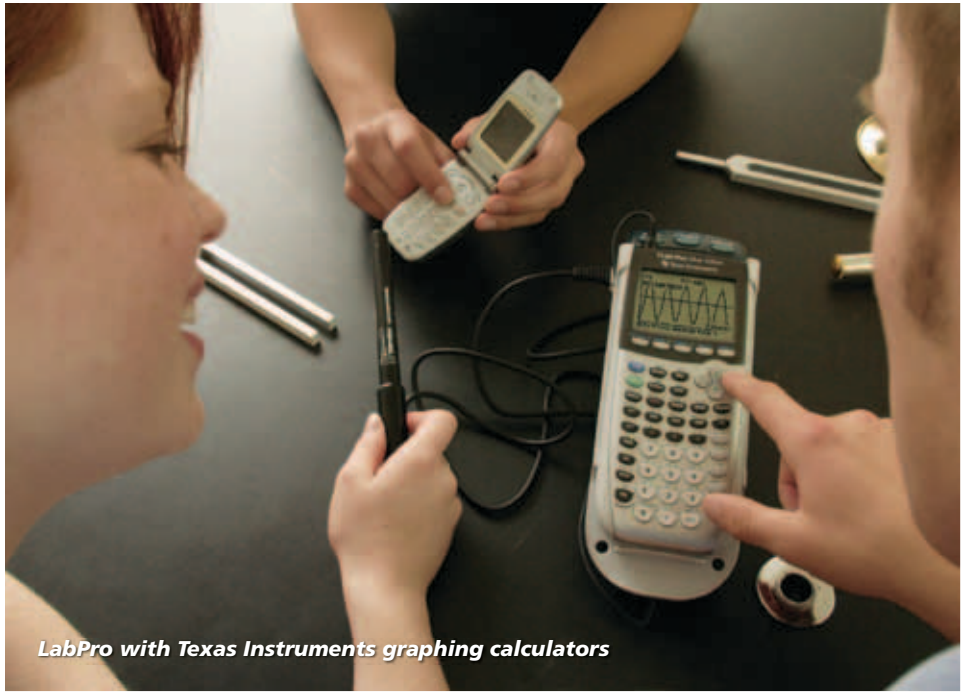
- Samples up to 50,000 readings per second
- 12-bit A/D conversion
- Internally stores 12,000 data points

DIGITAL LINES

- 8 TTL input/output lines (4 on each DIG/SONIC port)

ANALOG OUTPUT

- 1 channel, ±4 volts, 100 mA (with function generator)



Collecting and analyzing sound data using a TI-84 running EasyData, a LabPro, and a microphone

A diprotic pH titration using a LabPro, pH sensor, Vernier drop counter, and a Vernier stir station.

1 IT ALL STARTS WITH CURRICULUM

Want to save time? Start with a Vernier lab book. Aligned to state and national science standards, our lab books contain experiments for TI graphing calculators, LabQuest, and computers. See below for more on our popular lab books.

2 CHOOSE A CALCULATOR

Not sure which TI graphing calculator is right for you? Check out our recommended list of calculators on pp. 92.

3 CHOOSE YOUR INTERFACE

Vernier LabPro – Collect data with 52 sensors and TI-calculators. See page 94.

CBL 2 – Collect data with 52 available sensors. More at **www.vernier.com/cbl2** See page 94.

Vernier EasyLink – The least expensive way to collect data using a single sensor. See page 94.

4 CHOOSE YOUR SENSORS

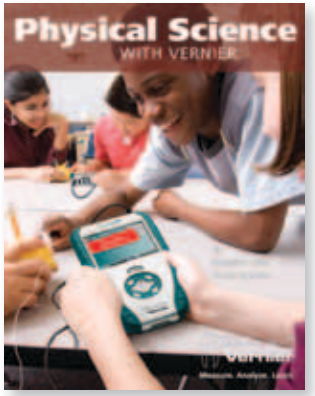
Choose from Vernier's recommended packages or build your own.

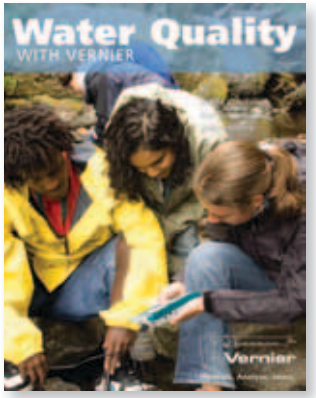
Biology, page 21
Chemistry, page 31
Middle School, page 61
Math, page 59
Physical Science, page 63
Physics, page 67
Science Department, page 79
Water Quality, page 81

5 ADD A COPY OF LOGGER *PRO*

(Recommended) This award-winning software is the best value around! Logger *Pro* provides the easiest way to get data from the calculator into the computer. See page 97 for details.

Lab Books for CBL 2 and LabPro with Calculators





Our lab books include complete instructions for all TI graphing calculator options (except TI-Nspire), including LabPro, CBL 2, EasyTemp, EasyLink, and CBR 2.

Each book includes a CD that contains Microsoft® Word® versions of all labs, unless otherwise noted. Simply open the Word files and print the labs.

Additional Workbooks

a. ***EasyData Activities: Modeling Algebraic Functions with Data Collection***
by Marilyn Parker, ORDER CODE **TI-MAF, $15**

With an emphasis on easy, this manual explores algebra concepts using the TI-84 Plus family of graphing calculators. Updates of old favorite activities give instructions for the EasyData App using sensors that connect to the calculator USB port (CBR 2, EasyLink, and EasyTemp). The appendices provide guidance for beginning users.

---

b. ***Math and Science in Motion: Activities for the Middle School***
by Chris Brueningsen, Elisa Kerner, and Bill Bower, ORDER CODE **TI-MCBR, $14**

This manual contains 12 activities for the TI-82, TI-83, or TI-84 families of calculators with the CBR or CBR 2. Students explore graphs of distance *vs.* time as they move toward and away from the Motion Detector. Students also study bouncing objects, acceleration due to gravity, and pendulum motion.

---

c. ***Forensics: Connecting Science Investigations with TI Data Collections Activities***
by Jacklyn Bonneau, ORDER CODE **TI-FOR, $25**

Texas Instruments' forensic lab manual allows students to investigate crime-scene science using the TI-84 Plus family of calculators.

---

d. ***Modeling Motion: High School Math Activities with the CBR***
by Linda Antinone, Sam Gough and Jill Gough, ORDER CODE **TI-HCBR, $14**

Modeling Motion contains 15 activities using the CBR or CBR 2 with the TI-82, TI-83, or TI-84 families of calculators. Activities in algebra, precalculus, and physics include linear, quadratic, and exponential regression and projectile motion.

---

e. ***Activities for the Middle Grades with the CBL 2 and the TI-73***
by Debbie Crawford, Ray Leonard, and Cathy Roberts, ORDER CODE **TI-MGS, $20**

This book from Texas Instruments contains 22 middle school science investigations that provide hands-on data collection with a variety of sensors. Physical science, life science, Earth science, and space science activities are included.

---

f. ***Adventures in Data Collection with the TI-73 Explorer***
by Debbie Crawford, Ray Leonard, and Cathy Roberts, ORDER CODE **TI-ADC, $14**

Finding hidden treasure, kayaking, and racing cars motivate investigations in middle grades math and science. These 12 activities investigate motion, temperature, and more. The book includes optional tips for using the TI-Navigator system.

Real World Math Made Easy

ORDER CODE **RWCALC, $25**

This book contains 31 activities that explore real-world applications of math concepts using TI-84 Plus graphing calculators and Vernier sensors. Concepts from algebra through calculus are covered.

The printed text is written for the EasyData App. The CD provided with the book contains the word-processing files for other calculators. (Does not support TI-Nspire or TI-Nspire CAS.)

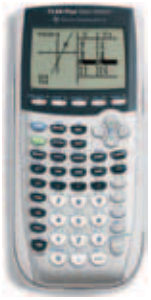
TI Graphing Calculators

TI graphing calculators are valuable tools in math and science. For middle school, we recommend the TI-73 Explorer or TI-84 Plus family of calculators. For high school science or engineering, we recommend the TI-84 Plus family of calculators. For high school math, we recommend the TI-84 or the TI-Nspire family of calculators. These calculators can be purchased individually or in convenient teacher packs of 10 calculators.

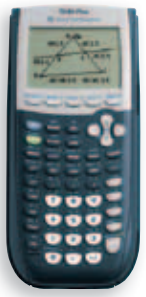


TI-84 Plus Silver Edition

ORDER CODE **TI-84PSE, $129**

Recommended for High School. It comes with a USB port for data collection with our Easy products and for connectivity to a computer.

- More than 20 pre-loaded Apps, including EasyData, Cabri™ Jr., and Periodic Table
- 2.5 times the speed and 9 times the memory of the TI-83 Plus



TI-84 Plus

ORDER CODE **TI-84PL, $108**

Recommended for High School. A lower cost alternative to the TI-84 Plus Silver Edition. It comes with a USB port for data collection with our Easy products and for connectivity to a computer.

- Over ten pre-loaded Apps includes EasyData and Cabri™ Jr.
- 2.5 times the speed and 3 times the memory of the TI-83 Plus

Teacher Packs for the TI-84 Plus

Teacher packs for the TI-84 Plus and TI-84 Plus Silver Edition calculators are available. Each teacher pack includes 10 calculators, 40 batteries, 5 unit-to-unit USB cables, 5 computer USB cables, a calculator poster and transparency, and a manual. These calculators have a bright yellow back and slide case and the words "School Property" on the front of the calculator.

TI-84 EZ Spot Teacher Pack

ORDER CODE **TI-84SPOTTP, $1,080**

TI-84 Plus Silver Edition EZ Spot Teacher Pack

ORDER CODE **TI-84SESPTP, $1,290**

TI-83 Plus Graphing Calculator

ORDER CODE **TI-83PL, $98**

Low-cost choice for use in high school science and math courses. The TI-83 Plus contains Flash ROM technology.

TI-83 Plus Teacher Pack

ORDER CODE **TI-83PLTP, $980**

A teacher pack for the TI-83 Plus calculator is available. Each teacher pack includes 10 calculators, 40 batteries, 5 unit-to-unit cables, a USB TI-Connectivity cable, a calculator poster and transparency, and a manual.

TI-73 Explorer Graphing Calculator

ORDER CODE **TI-73EX, $66**

Recommended for Middle School. A simple keypad makes it easier for younger students to use. The TI-73 Explorer is electronically upgradable.

TI-73 Explorer Teacher Pack

ORDER CODE **TI-73EXTP, $660**

A teacher pack for the TI-73 Explorer calculator is available. Each teacher pack includes 10 calculators, 40 batteries, 5 unit-to-unit cables, a USB TI-Connectivity cable, a calculator poster and transparency, and a manual.

Check out our Easy products for TI-84 Plus calculators and TI-Nspire handhelds. See pp. 94–95.

MORE ONLINE

For more information on real-world data with a calculator go to **www.vernier.com/calc**

TI-Nspire™ Handheld and Software for Math

The TI-Nspire product line includes handhelds and software that provide teachers with flexibility and versatility to meet different needs in the math classroom. These learning tools allow students to:

- See algebraic, graphical, geometric, numeric, and written representations.
- Link different representations of a problem.
- Use built-in interactive geometry.
- Enter and review expressions and formulas as seen in a textbook.
- Explore topics from algebra to calculus.
- Collect real-world data with Vernier sensors.

Two different handhelds, TI-Nspire and TI-Nspire CAS, are available. TI-Nspire includes a TI-84 Plus keypad that can be used to replace the standard keypad that comes with the handheld. This facilitates the transition from the TI-83 Plus and TI-84 Plus families of calculators to TI-Nspire.

The TI-Nspire CAS handheld includes built-in CAS (Computer Algebra System) capabilities, which enables students to explore and manipulate mathematical expressions in symbolic form.

Computer versions of TI-Nspire software and TI-Nspire CAS software are available.

Real World Data Collection with TI-Nspire

Collect sensor data with 36 sensors.

Go to **www.vernier.com/ti-nspire-licenses**

TI-Nspire Products

TI-Nspire Calculator, ORDER CODE **TI-NS, $136**
Includes both the TI-Nspire handheld and a TI-84 keypad.

TI-Nspire Teacher Bundle, ORDER CODE **TI-NS-TB, $212**
Includes both the TI-Nspire handheld, TI-84 keypad, and a single license of TI-Nspire Teacher Edition software.

TI-Nspire Teacher Pack, ORDER CODE **TI-NS-TPK, $1,360**
Includes TI-Nspire EZ Spot handhelds with the words "School Property" on both the TI-Nspire keypad and TI-84 Plus keypad. The package includes 10 TI-Nspire EZ Spot units, 10 TI-84 Plus keypads, and associated support materials.

TI-Nspire Computer Software (student version)
Single License, ORDER CODE **TI-NSSW-1, $76**
TI-Nspire computer software and the TI-Nspire learning handheld share the same set of functionality, so you and your class can use either as a standalone learning tool.

5 License Pack, ORDER CODE **TI-NSSW-5, $380**
10 License Pack, ORDER CODE **TI-NSSW-10, $760**

TI-Nspire CAS Products

TI-Nspire CAS Calculator, ORDER CODE **TI-NSCAS, $139**

TI-Nspire CAS Teacher Bundle
ORDER CODE **TI-NSCAS-TB, $217**
The Teacher Bundle includes both the TI-Nspire CAS handheld and a single license of TI-Nspire CAS Teacher Edition software.

TI-Nspire CAS Teacher Pack
ORDER CODE **TI-NSCAS-TPK, $1,390**
The teacher pack includes 10 TI-Nspire CAS handhelds and associated support materials.

TI-Nspire CAS Computer Software (student version)
Single License, ORDER CODE **TI-NSCASSW-1, $78**
TI-Nspire CAS Computer Software is designed for Algebra through Calculus. It contains Computer Algebra System functionality.

Interfaces for TI Graphing Calculators

We offer several options for data collection for different budgets and classroom setups.
To help you decide which interface is right for you, we've included brief descriptions of each interface and an overview comparison chart to distinguish their strengths.

VERNIER LabPro®

$220 ORDER CODE LABPRO

The Vernier LabPro Interface is our full-featured, data-collection interface offering everything that you need for data collection with a TI graphing calculator.

LabPro can also be connected to a computer for additional data collection options.

For LabPro sensor packages go to **www.vernier.com/pkgs**

TEXAS INSTRUMENTS CBL 2

$166 ORDER CODE CBL2

The CBL 2 is an easy-to-use, powerful, and inexpensive data-collection tool. The CBL 2 System includes the CBL 2 interface, a Stainless Steel Temperature Probe, TI Light Probe, Voltage Probe, calculator cradle, link cable, batteries, user's guide, and a TI resource CD.

52 Vernier sensors can be connected to the CBL 2.
For CBL 2 sensor packages go to **www.vernier.com/cbl2**

VERNIER EasyLink®

$59 ORDER CODE EZ-LINK

With the Vernier EasyLink, data collection with a TI graphing calculator is easier and more affordable.

EasyLink is a single-channel interface that plugs into the USB port of a compatible TI graphing calculator. It supports any one of **43 Vernier sensors** (34 when used with TI-Nspire).

Priced at only $59, EasyLink is an affordable way to get started with calculator-based data collection!

WHAT INTERFACE IS RIGHT FOR ME?

	LabPro	CBL 2	EasyLink
Calculator Compatibility	All TI graphing calculators except the TI-82, TI-85, and TI-Nspire CAS	All TI graphing calculators except the TI-82, TI-85, and TI-Nspire CAS	TI-84 Plus, TI-84 Plus Silver Edition, TI-Npsire, and TI-Nspire CAS
Channels	4 analog and 2 digital/sonic	3 analog and 1 digital/sonic	1 analog
Number of compatible sensors (See page 100 for a complete list.)	55 sensors *(52 with Calculators)*	52 sensors	43 sensors *(34 with TI-Nspire)*
Use with Motion Detectors, Photogates	Yes	Yes	No *(For motion, CBR 2 can be purchased separately)*

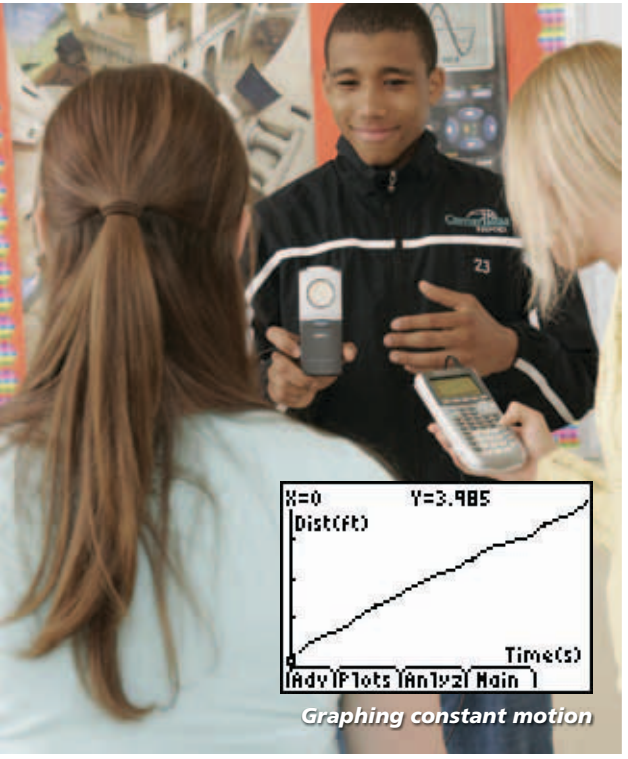
Compatible with Logger *Pro* software on a computer	Yes	No	Yes *(with a separate adapter)* ORDER CODE MINI-USB, $5
Cost	$220	$166	$59



Graphing constant motion

Exponential cooling curve

a. EasyTemp, ORDER CODE EZ-TMP, $38

The Vernier EasyTemp is inexpensive and easy to use! What more can you ask for? Plug Vernier EasyTemp into the USB port on a compatible TI graphing calculator. The data-collection application automatically launches, and you are ready to collect data! This stainless-steel probe is durable for classroom use and covers a temperature range of –20°C to 110°C.

b. CBR 2, ORDER CODE CBR2, $93

If you teach math, physical science or physics, consider the CBR 2. The CBR 2 collects distance, velocity, and acceleration data. It connects directly to a TI calculator. When the CBR 2 is connected to the USB port of compatible TI graphing calculator, the data-collection application automatically launches, and you are ready to collect data.

TI-Navigator™ Classroom Learning Systems

The TI-Navigator is a classroom learning system that combines Texas Instruments graphing calculators or TI-Nspire handhelds and your classroom PC to create a wireless classroom network. Teachers can use the system to assess understanding of key concepts, monitor student progress, and differentiate instruction. The included software supports automatically grading and archiving student work.

See **www.vernier.com/ti-navigator** for more information

c. For TI 83/84 or TI-73 Users

32-User Standard TI-Navigator System, ORDER CODE **TI-NAV-SD, $3,700**

16-User Starter TI-Navigator System, ORDER CODE **TI-NAV-STR, $2,280**

4-User TI-Navigation System Add-on‡, ORDER CODE **TI-NAV-IND, $430**

‡ Add-on pieces require the purchase of a Standard or Starter TI-Navigator System.

d. NEW For TI-Nspire™ or TI-Nspire CAS Users

30-User TI-Nspire Navigator™ System, ORDER CODE **TI-NAV-NS30**
Introductory Price*: **$2,580.**

15-User TI-Nspire Navigator System, ORDER CODE **TI-NAV-NS15**
Introductory Price*: **$1,930.**

5-User TI-Nspire Navigator Add-On†, ORDER CODE **TI-NAV-NS+5**
Introductory Price*: **$380.**

Projecting Calculator Screens

a. TI-SmartView™ Emulator Software

ORDER CODE **TI-SV, $135** *(Single-user license)*

TI-SmartView lets you project an interactive representation of a TI-84 Plus calculator to your entire class. You can use TI-SmartView to project multiple representations simultaneously (graphs, window settings, tables), display key press history, and capture multiple screen shots. TI-SmartView is ideal for use with interactive whiteboards. TI-SmartView can be used with Vernier LabPro®, TI CBL 2™, or CBR 2™ data collection devices. This capability requires a TI USB Connectivity Kit (not included).

b. ViewScreen™ Systems

The TI ViewScreen system makes it possible to project the calculator display with an overhead projector. It comes with a projection panel for the overhead projector and a modified calculator that attaches to the projection panel. If you already have a ViewScreen panel, you can purchase ViewScreen calculators by themselves.

ViewScreen Packages *(includes a ViewScreen Calculator)*

TI-73 Explorer ViewScreen
ORDER CODE **TI-73EXVS, $300**

TI-84 Plus Silver Edition ViewScreen
ORDER CODE **TI-84SEVS, $326**

For TI-Nspire or TI-Nspire CAS, you simply need to purchase a ViewScreen panel. A modified calculator is not needed.

TI-Nspire ViewScreen *(calculator not included)*
TI-Nspire ViewScreen panel
ORDER CODE **TI-NSVSH, $191**

c. TI-Presenter™, ORDER CODE TI-PRE, $235

Easily display the image of your calculator screen on your TV or a computer projector. The TI-Presenter works with all models of ViewScreen calculators. ViewScreen calculators are not included and must be purchased separately.

Connecting TI Graphing Calculators and Computers

To connect a TI graphing calculator to a computer, you need a TI Connectivity cable and computer software.

Logger *Pro*® 3 Software

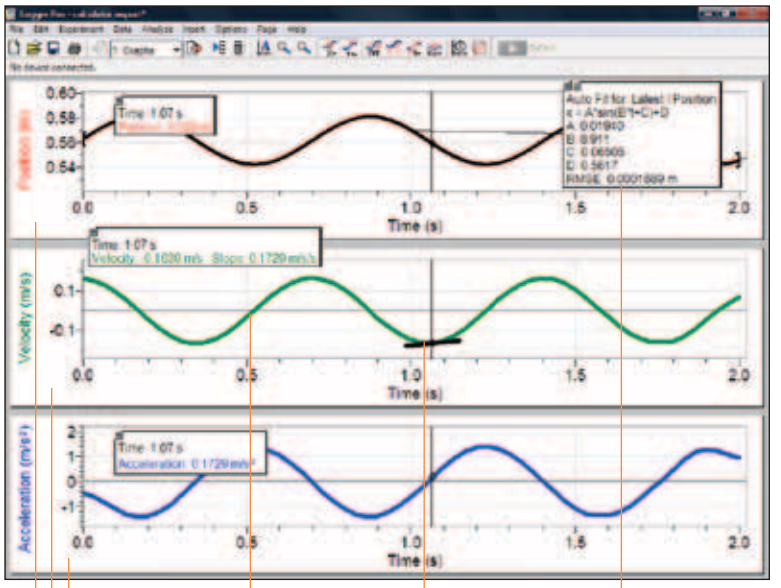
An inexpensive, easy-to-learn program for collecting, analyzing, and displaying data. Important features of Logger *Pro* include

- Transfer data from the calculator to the computer using a TI Connectivity Cable. TI-Nspire and TI-Nspire CAS are not supported.
- Create and print graphs, data tables, text, FFTs, and histograms.
- Manually enter data.
- Perform manual and automatic curve fits.
- Calculate statistics, tangents, integrals, and interpolations.
- Incorporate videos with data collection and analysis.
- Includes site license for ALL computers in your school or college department, including students' personal computers

Logger *Pro* 3, ORDER CODE **LP, $189**

Upgrade from earlier version of Logger *Pro* to Logger *Pro* 3, ORDER CODE **ULP, $70**

Student 5-Pack (5 additional CDs)
ORDER CODE **LP-ST5, $10**



Display more data than a calculator

Import data from your calculator

Tangent tool for finding slope

Manual and automatic curve fits

2004

TI Connect™

The TI Connect software supports calculator file transfer between your computer and calculator, including applications, programs, and data. This free software also allows you to capture screen images. This program is found on the CD included with many TI calculators as well as the TI USB Connectivity Kit. System requirements and compatibility can be found at **http://education.ti.com/ticonnect**

TI USB Connectivity Kit

ORDER CODE **GLC-USB, $17**

In order to connect your TI calculator to a computer, you will need a TI Connectivity Cable. TI-84 Plus, TI-84 Plus Silver Edition, TI-89 Titanium, TI-Nspire, and TI-Nspire CAS calculators come with a connectivity cable. For other calculators, you will need the TI USB Connectivity Kit. The kit includes the TI Connect software and a USB Connectivity Cable that can be used with Windows or Macintosh computers.

The Vernier Sensor Advantage

Outstanding Performance

Vernier sensors are designed specifically for education and held to high standards for quality and durability. With 29 years of experience developing technology for education, we design our sensors for active, hands-on experiments. Vernier sensors are rugged, classroom-proven technology that are well supported and easy to use. The sensors provide consistent, high-quality results for the demands of the classroom.

Connect & Collect

AUTO ID SENSOR

Just connect and you're ready to collect. All Vernier sensors on the following pages are automatically detected and set up for data collection when used with LabQuest, LabQuest Mini, LabPro, CBL 2, Go!Link, or EasyLink (exception DCU on page 102). It's student-friendly technology designed for ease of use.

Curriculum Aligned to State Standards

Vernier sensors are supported by over 400 detailed, engaging experiments written by teachers, scientists, and technology experts. See how data-collection technology aligns to your curriculum at **www.vernier.com/standards**

Generous Warranty

Buy with confidence. Most Vernier sensors are covered by a 5-year warranty. In Vernier's 29 years of business, we have rarely charged a customer for a repair, no matter how old the equipment.

Accelerometers

Low-g, 25-g and 3-Axis

We have three accelerometers designed for different uses. These small devices can be mounted on objects to study motion. All are individually calibrated.

3-Axis Accelerometer

ORDER CODE **3D-BTA, $99**

Use this for studying the complex motion of an amusement park ride, a bungee jump, or simply a toss in the air.

RANGE: -50 to +50 m/s² **TYPICAL ACCURACY:** ±0.1 m/s²

Low-g Accelerometer, ORDER CODE LGA-BTA, $89

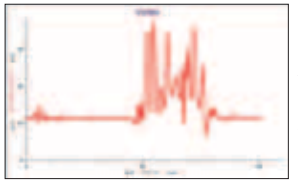
This is the best choice for most experiments. Use it for studying the one-dimensional motion of a car (real and toy), elevator, pendulum bob, or amusement park ride.

RANGE: -50 to +50 m/s² **TYPICAL ACCURACY:** ±0.1 m/s²

25-g Accelerometer, ORDER CODE ACC-BTA, $92

This is great for studying one-dimensional collisions or any motion with larger accelerations.

RANGE: -250 to +250 m/s² **TYPICAL ACCURACY:** ±1 m/s²



Accelerations during the Vortex amusement park ride

See also WDSS on page 116.

GREAT WAYS TO USE THESE SENSORS!

PHYSICS
- Bungee jump accelerations
- Newton's second law
- Centripetal acceleration on a turntable
- Acceleration on a merry-go-round

HUMAN PHYSIOLOGY
- Neuromuscular reflexes

INNOVATIVE USE
- Accelerations on the halfpipe
- Accelerations in snowboarding

Barometer

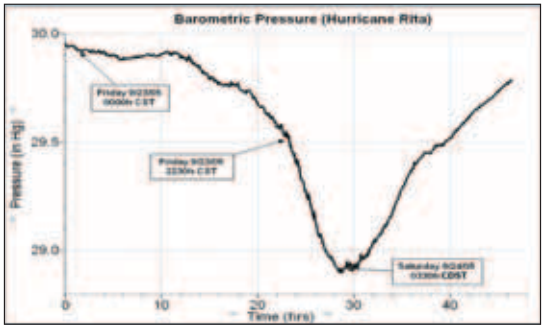
$71 ORDER CODE **BAR-BTA**

Our Barometer can be used for weather studies or for lab experiments involving pressures close to normal air pressure.

RANGE: 25.0 to 31.5 in Hg 81 to 106 kPa
0.80 to 1.05 atm 600 to 800 mm Hg

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.003 in Hg

10-bit (CBL, CBL 2, NXT Adapter): 0.01 in Hg



Atmospheric pressure data collected during Hurricane Rita in 2005

GREAT WAYS TO USE THIS SENSOR!

EARTH SCIENCE
- Barometric pressure
- Local weather study

INNOVATIVE USE
- Study the barometric pressure of storms
- Use it as an altimeter
- Study Bernoulli's principle

Blood Pressure Sensor

$105 ORDER CODE BPS-BTA

The Blood Pressure Sensor is a noninvasive sensor designed to measure human blood pressure.

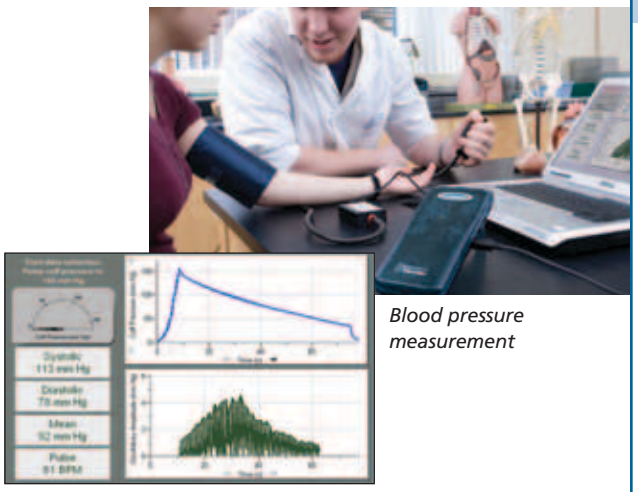
- Measures systolic and diastolic blood pressure utilizing the oscillometric technique.
- Includes a standard adult size adjustable cuff (27 cm to 39 cm), pump bulb, and pressure transducer.

Additional cuff sizes are available for best results on small or large arms. Each includes cuff, pump, and valve.

- Small Cuff, 18 cm to 27 cm, ORDER CODE CUFF-SM, $32.
- Large Cuff, 35 cm to 51 cm, ORDER CODE CUFF-LG, $35.

PRESSURE RANGE: 20 mm Hg to 250 mm Hg

TYPICAL ACCURACY: ±3 mm Hg



Blood pressure measurement

GREAT WAYS TO USE THIS SENSOR!

HUMAN PHYSIOLOGY

- Blood pressure as a vital sign
- Effect of exercise on blood pressure
- Diurnal blood pressure variation
- Heart rate and blood pressure as vital signs
- Heart rate, blood pressure, and exercise

Charge Sensor

$75 ORDER CODE CRG-BTA

Use the Charge Sensor as an electronic electroscope to obtain quantitative measurements when studying charging by induction, friction, or contact.

- A 0.01 µF input capacitor makes it possible for this extremely high impedance voltage sensor to be used in many electrostatic experiments.
- Range switch allows you to adjust sensitivity.
- Zero switch discharges the input capacitor between runs.

RANGES: ±0.5 V (+/- 5 nC)
±2 V (+/- 20 nC)
±10 V (+/- 100 nC)

Typical bias current = 0.005 pA
Input capacitance: 0.01 µF

NEW Electrostatics Kit
ORDER CODE **ESK-CRG, $109**

The Electrostatics Kit is an accessory for the Vernier Charge Sensor. The kit includes a faraday pail and cage, grounding plane, grounding wires and wrist strap, charge producers and proof plane, wool, vinyl, nylon rod, PVC rod, and a cotton cloth. See page 71.

NEW High Voltage Electrostatics Kit
ORDER CODE **HVEK-CRG, $249**

The Electrostatics Kit is an accessory for the Vernier Charge Sensor. The kit includes an electrostatics voltage source (output 750, 1500, 3000, 6000 V DC) and two conducting spheres. Extremely low output current makes this device safe for classroom use. See page 71.

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USE

- Use as electronic electroscope
- Charging by induction, by friction, and by contact
- Measure charge polarity

More innovative uses from teachers at www.vernier.com/innovate

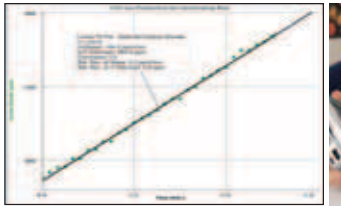
CO_2 Gas Sensor

$249 ORDER CODE CO2-BTA

The CO_2 Gas Sensor measures gaseous carbon dioxide in two ranges—0 to 10,000 ppm and 0 to 100,000 ppm.

- You can explore human respiratory changes in CO_2 levels based on exercise with the high range.
- The lower range offers more sensitivity and a wider interval for cellular respiration and photosynthetic metabolism studies.

RANGE: Low 0–10,000 ppm
High 0–100,000 ppm



Measuring CO_2 levels of germinating peas

BioChambers

BioChambers provide a way for both CO_2 Gas and O_2 Gas sensors to be used at the same time in a closed system.

BioChamber 2000, 2000 mL
ORDER CODE **BC-2000, $19**

BioChamber 250, 250 mL
ORDER CODE **BC-250, $6**

GREAT WAYS TO USE THIS SENSOR!

BIOLOGY

- Cell respiration in peas
- Respiration of sugars by yeast
- Effect of temperature on cold-blooded organisms
- Photosynthesis and respiration
- Levels of CO_2 in human respiration
- Measure CO_2 along with O_2 in respiration and photosynthesis

ENVIRONMENTAL SCIENCE

- Investigating indoor CO_2 concentrations

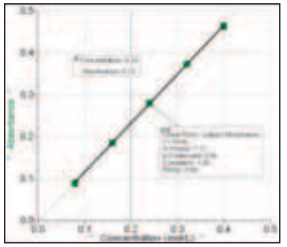
Colorimeter

$115 ORDER CODE COL-BTA

This 4-wavelength Colorimeter features one-button automatic calibration. Fifteen 3.5 mL cuvettes are included. A package of 100 replacement cuvettes (with 20 lids) is available (ORDER CODE CUV, $15).

WAVELENGTHS: 430 nm 470 nm 565 nm 635 nm

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.04 %T
10-bit (CBL, CBL 2, NXT Adapter): 0.16 %T



Beer's law experiment

Cuvette Rack

ORDER CODE CUV-RACK, $9

No more spills! Holds 10 standard cuvettes.

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY
- Beer's law: determining the concentration of unknown substances
- Kinetics: rate and order of a chemical reaction
- Rate determination and activation energy
- Chemical equilibrium: Finding a constant, K_c
- Rate law determination of the crystal violet reaction

BIOLOGY
- Photosynthesis
- The effect of alcohol on biological membranes
- Population dynamics

WATER QUALITY
- Ortho- and total-phosphates concentration

FORENSICS
- Identifying an unknown ink by its light absorbance characteristics

Conductivity Probe

$95 ORDER CODE CON-BTA

This probe measures the electrical conductivity of water. It is an important part of chemistry, biology, and water quality studies.

AUTOMATIC TEMPERATURE COMPENSATION: 5°C – 35°C

LOW RANGE:
0–200 µS/cm
(0–100 mg/L TDS)

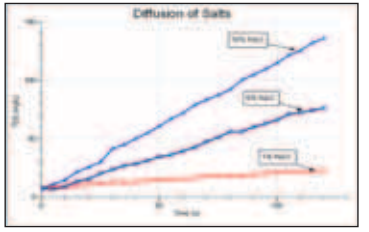
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.1 µS/cm
10-bit (CBL, CBL 2, NXT Adapter): 0.4 µS/cm

MEDIUM RANGE:
0–2000 µS/cm
(0–1000 mg/L TDS)

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 1 µS/cm
10-bit (CBL, CBL 2, NXT Adapter): 4 µS/cm

HIGH RANGE:
0–20000 µS/cm
(0–10000 mg/L TDS)

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 10 µS/cm
10-bit (CBL, CBL 2, NXT Adapter): 40 µS/cm



Diffusion through membranes

GREAT WAYS TO USE THIS SENSOR!

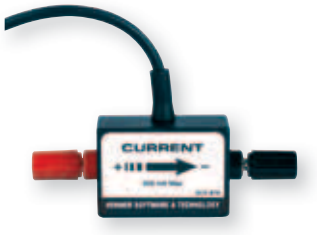
BIOLOGY
- Diffusion of ions through membranes
- Monitor changes in ion levels in aquatic systems
- Limitations of cell size: surface area to volume

MIDDLE SCHOOL
- Water hardness study
- Diffusion: how fast?

CHEMISTRY
- Investigate ionic and molecular compounds, strong and weak acids
- Conductimetric titrations
- Investigate ionic concentrations and conductivity levels

WATER QUALITY
- Total dissolved solids

PHYSICAL SCIENCE
- Acid strengths



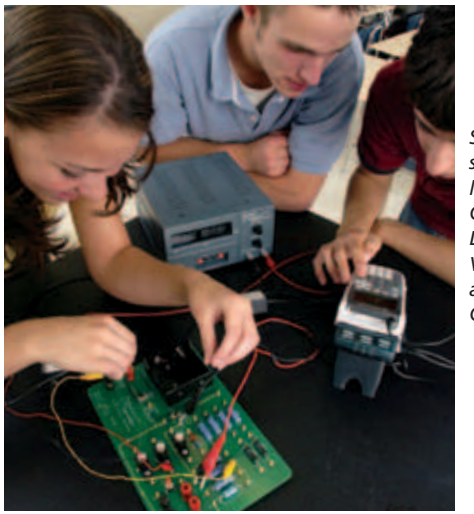
Current Probe

$39 ORDER CODE DCP-BTA

Use the Current Probe to measure currents in low-voltage AC and DC circuits. With a range of ±0.6 A, this probe is ideal for use in most battery and bulb circuits. Use multiple sensors to explore series and parallel circuits. It can also be used in electrochemistry experiments.

RANGE: -0.6 to +0.6 A **SENSE RESISTOR:** 0.1 Ω

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.3 mA
10-bit (CBL, CBL 2, NXT Adapter): 1.25 mA



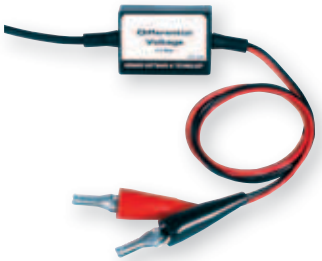
Students studying Ohm's law using the Current Probe, Differential Voltage Probe, and the Vernier Circuit Board

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Ohm's law
- Series and parallel circuits
- Electrical energy

CHEMISTRY
- Electroplating
- Determining Avogadro's number

ENVIRONMENTAL SCIENCE
- Solar energy: photovoltaic cells
- Wind energy



Differential Voltage Probe

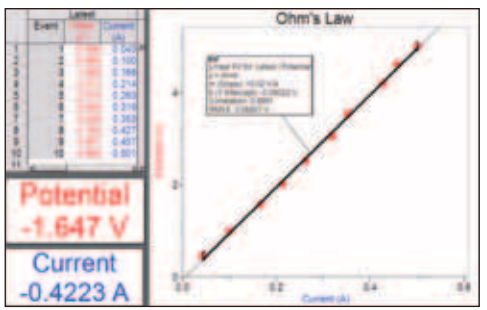
$39 ORDER CODE DVP-BTA

The Differential Voltage Probe is designed for exploring basic principles of electricity, including studying series and parallel circuits.

- Ideal for use in most battery and bulb circuits.
- Can be used to study low-voltage AC and DC circuits.
- Combine with a Current Probe to explore Ohm's law, phase relationships, and much more.

This sensor differs from our Voltage Probe (ORDER CODE VP-BTA, $12) in that neither of the clips are grounded, making it possible to use two probes in the same circuit simultaneously.

RANGE: -6.0 to +6.0 V **INPUT IMPEDANCE:** 10 MΩ
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 3.1 mV
10-bit (CBL, CBL 2, NXT Adapter): 12.5 mV



Logger Pro graph showing Ohm's law using the Current Probe, Differential Voltage Probe, and the Vernier Circuit Board

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Ohm's law
- Series and parallel circuits
- Electrical energy
- Capacitors

PHYSICAL SCIENCE
- Battery and bulb investigations

Digital Control Unit

$61 ORDER CODE DCU-BTD

The Digital Control Unit (DCU) makes it easy to use the digital ports on SensorDAQ, LabQuest, LabQuest Mini, LabPro, or CBL 2 for exciting, do-it-yourself projects.

- Write simple programs to control motors, lamps, LEDs, buzzers, and other DC devices.
- Develop elaborate projects to control robots or automated scientific apparatuses in combination with other sensors.

Provides up to 600 mA of current.

The Digital Control Unit used to make an automated tea brewer

Includes:

- A manual with project ideas
- Explanations of how to write DCU programs in LabVIEW using SensorDAQ
- Wiring diagrams
- Sample programs included on CD
- A cable for connecting electrical devices that you build
- Explanation of DCU programming using our LabPro interface and LabVIEW®, or TI graphing calculator programs

DCU Power Supply, ORDER CODE **IPS, $12**

Note: The Digital Control Unit does not work with LabQuest App at this time, but will work with LabQuest and Logger *Pro* 3.7 and newer.

GREAT WAYS TO USE THIS SENSOR!

ENGINEERING
- Pulse a speaker to generate sound
- Make an alarm system
- Make a robot
- Create temperature-controlled environments
- Moving displays
- Flash lamps on LEDs

Dissolved Oxygen Probe

$209 ORDER CODE DO-BTA

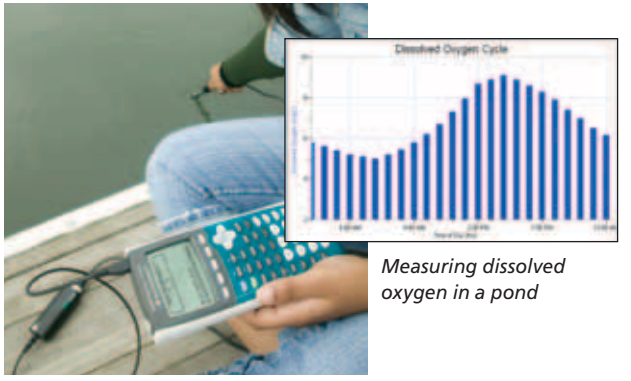
Use the Dissolved Oxygen Probe to determine the concentration of oxygen in aqueous solutions.

- Built-in temperature compensation and a fast response time.
- Includes zero-oxygen solution, two caps fitted with membranes, a 100% calibration bottle, and electrode filling solution. Replacement membrane caps are available (ORDER CODE MEM, $13).

AUTOMATIC TEMPERATURE COMPENSATION: 5°C to 35°C

RANGE: 0 to 14 mg/L

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.007 mg/L
10-bit (CBL, CBL 2, NXT Adapter): 0.028 mg/L



Measuring dissolved oxygen in a pond

GREAT WAYS TO USE THIS SENSOR!

BIOLOGY
- Interdependence of plants and animals
- Aerobic respiration
- Dissolved oxygen *vs.* time
- Watershed testing
- Physical profile of a lake
- Primary productivity

WATER QUALITY
- Dissolved oxygen concentration
- Biochemical oxygen demand (BOD)

ENVIRONMENTAL SCIENCE
- Long term water monitoring
- Investigating dissolved oxygen

Drop Counter

$99 ORDER CODE VDC-BTD

Use the Drop Counter with our pH Sensor, Conductivity Probe, or ORP Sensor to easily perform conductimetric or potentiometric titrations.

- Precisely records the number of drops of titrant added during a titration, which is automatically converted into volume.
- Includes a cable, Microstirrer (shown below), dispensing vessel, and reagent reservoir.

A Microstirrer is included with the Drop Counter. Additional Microstirrers are available (ORDER CODE MSTIR, $9).

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY

- Acid-based titration
- Standardizing a solution of sodium hydroxide
- Oxidation-reduction titration
- Investigating indicators
- Conductimetric titration and gravimetric determination of a precipitate
- Potentiometric titration of hydrogen peroxide

Dual-Range Force Sensor

$109 ORDER CODE DFS-BTA

Our Dual-Range Force Sensor can be easily mounted on a ring stand or dynamics cart or used as a replacement for a hand-held spring scale. It has two ranges: ±10 N and ±50 N and resolution of 0.01 N and 0.05 N, respectively.

Dual-Range Force Sensor Accessories

NEW Bumper and Launcher Kit

ORDER CODE **BLK, $89**

See page 73 for more information.

Air Track Adapter

ORDER CODE **ATA-DFS, $55**

Allows the Dual-Range Force Sensor to be mounted on the end of an air track for collision studies. Compatible with most air tracks. Includes two magnetic bumpers.

Force Table Adapter

ORDER CODE **FTA-DFS, $29**

Use your Dual-Range Force Sensor with your force table for resolution of vectors experiments. Includes mounting clamp.

Mass For Dynamics Cart

ORDER CODE **MASS, $12**

This 500 g steel block is a great accessory for Newton's second law labs. It attaches to a dynamics cart and leaves room for both a Dual-Range Force Sensor and an Accelerometer.

GREAT WAYS TO USE THESE SENSORS!

PHYSICS

- Newton's second law
- Newton's third law
- Static and kinetic friction
- Impulse and momentum

PHYSICAL SCIENCE

- Frictional forces
- Pulleys

MIDDLE SCHOOL

- Friction
- First-class levers

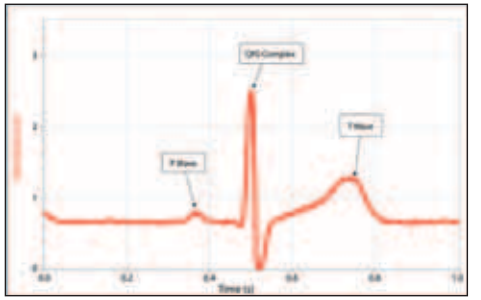
EKG Sensor

$147 ORDER CODE EKG-BTA

Use the EKG Sensor to measure electrical signals produced during muscle contractions.

- Make standard 3-lead EKG tracings to record electrical activity in the heart.
- Collect surface EMG recordings to study contractions in muscles in your arm, leg, or jaw.

Each sensor includes a package of 100 disposable electrodes. Additional packages of 100 electrodes are available (ORDER CODE ELEC, $12).



EKG graph demonstrating the contraction and repolarization of the heart's chambers

GREAT WAYS TO USE THIS SENSOR!

HUMAN PHYSIOLOGY

- Analyzing the heart with EKG
- Introduction to EMG
- Neuromuscular reflexes
- Muscle function analysis
- EMG and muscle fatigue

BIOLOGY

- Monitoring EKG

INNOVATIVE USE

- Monitor the heart rate of crawfish

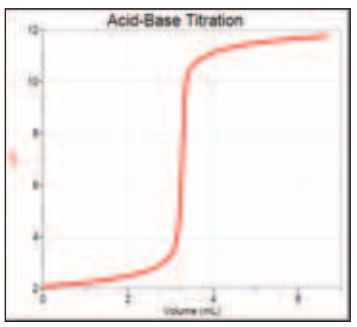
NEW DESIGN
Electrode Amplifier
$40 ORDER CODE EA-BTA

This newly designed sensor is a mV/pH/ORP amplifier that accepts an electrode with a standard BNC connector. It amplifies a –450 mV to +1100 mV signal to a 0 to 5 V range.

It can be used with any of the following:

- Vernier Replacement pH Electrode (ORDER CODE 7120B, $37)
- Most third-party pH electrodes (with BNC connectors)
- Other high output impedance electrodes
- Most third-party ORP electrodes (with BNC connectors)

See page 109 for our pH Sensor option.



Acid-base titration curve

Buy with Confidence

Vernier's 5-year warranty gives you a superior level of buying confidence. In fact, in Vernier's 29 years of business, we have rarely charged a customer for a repair, no matter how old the equipment!

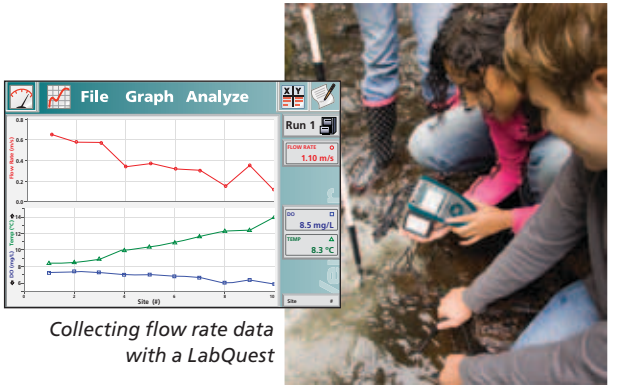
Flow Rate Sensor
$129 ORDER CODE FLO-BTA

Use the Flow Rate Sensor to easily measure stream velocity for environmental or Earth science studies. Flow rate data can be used to calculate the discharge value for the stream or determine the sediment transport of the stream.

- Separates into four sections for easy transport and convenient storage.
- Equipped with a 5 m cable, so your data-collection equipment can stay on shore.
- Includes 3 riser rods, which enable the impeller to be placed at fixed depths.

RANGE: 0 to 4 m/s

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.0012 m/s
10-bit (CBL, CBL 2, NXT Adapter): 0.005 m/s



Collecting flow rate data with a LabQuest

GREAT WAYS TO USE THIS SENSOR!

WATER QUALITY

- Measure stream flow rates
- Investigate sediment transport
- Determine stream discharge values

Force Plate
$215 ORDER CODE FP-BTA

The Force Plate is a large force sensor—tough enough to jump on. About the size and shape of a bathroom scale, the Force Plate has two ranges, one reading up to 3500 N and the other to 800 N. Two handles are included for pushing or pulling. Additional pairs of handles are available (ORDER CODE FP-HAN, $15).

RANGE: -800 to 3500 N and -200 to 800 N

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 1.2 N or 0.3 N
10-bit (CBL, CBL 2, NXT Adapter): 4.8 N or 1.2 N

Studying Newton's third law

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USES

- Study the dynamics of jumping and walking
- Study how the normal force on your feet changes during an elevator ride
- Try pushing a car across the parking lot
- Use two Force Plates to study Newton's third law

Gas Pressure Sensor

$83 ORDER CODE GPS-BTA

The Gas Pressure Sensor has sufficient resolution and range to work for many subject areas:

Chemistry

- Wide enough range for Boyle's law experiments.
- Sufficient resolution for vapor-pressure or pressure-temperature experiments.

Biology

- Use the included airtight tubing clamps for transpiration experiments.
- Perform respiration experiments in small containers using included fittings.

Includes the Pressure Sensor Accessories Kit (shown above). For replacement parts, see page 117.

RANGE: 0 to 210 kPa (0 to 2.1 atm or 0 to 1600 mm Hg)

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go! Link, SensorDAQ): 0.05 kPa (0.0005 atm or 0.40 mm Hg)
10-bit (CBL or CBL 2, NXT Adapter): 0.2 kPa (0.002 atm or 1.6 mm Hg)

GREAT WAYS TO USE THIS SENSOR!

BIOLOGY
- Transpiration
- Enzyme action: testing catalase activity
- Sugar fermentation

MATH
- Under pressure: the inverse relationship between pressure and volume

PHYSICAL SCIENCE
- Gas pressure and volume
- Gas temperature and pressure

CHEMISTRY
- Boyle's law
- Pressure-temperature
- Volume-temperature relationship in gases
- Vapor pressure of liquids
- Ideal gas law investigation

MIDDLE SCHOOL
- Get a grip!
- Fun with pressure

Global Positioning Systems (GPS)

Vernier GPS Sensor

$64 ORDER CODE VGPS

The Vernier Global Positioning System (GPS) Sensor collects latitude, longitude, and altitude, right on your LabQuest or computer.

- See a real-time graphs of latitude *vs*. longitude, or export the data to various mapping programs, including Google Maps or ArcGIS.
- Connects directly to the USB port on a computer or LabQuest

Use GPS to enhance data collection:

- Performing water quality tests at multiple sites? Record your location as you make measurements, and then map the data using Logger *Pro*.
- Studying acceleration in a car or train? Collect location information along with acceleration data and display a color-coded map.

GARMIN

eTrex Venture HC

$199 ORDER CODE GAR-VENTHC

Attach this Garmin GPS unit to your LabQuest or to a computer running Logger *Pro* to collect location data in real time or to upload waypoints and tracks. USB cable included.

- A high-sensitivity GPS receiver for peak performance in any environment.
- 256-color, sunlight-readable display makes it easy to distinguish map details—even in bright sunlight.

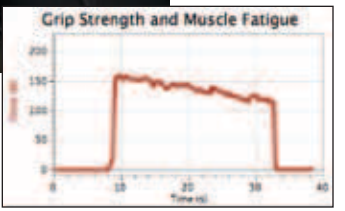
Hand Dynamometer

$99 ORDER CODE HD-BTA

Our strain-gage based isometric dynamometer can be used to measure grip strength or finger pinch strength. The Hand Dynamometer can be used alone or in combination with EMG recordings for detailed studies of muscular activity. Measurements can be made in newtons or kilograms of force.

FORCE RANGE: 0–600 N **TYPICAL ACCURACY:** ±0.06 N

Measuring grip strength



GREAT WAYS TO USE THIS SENSOR!

HUMAN PHYSIOLOGY
- Grip strength comparison
- Grip strength and muscle fatigue
- EMG and muscle strength
- Measure pinch strength in fingers

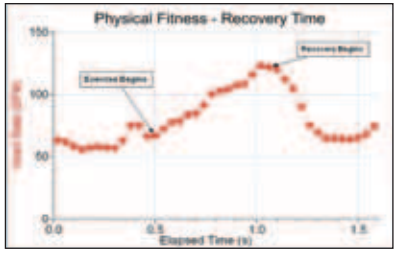
Hand-Grip Heart Rate Monitor

$119 ORDER CODE HGH-BTA

The Hand-Grip Heart Rate Monitor is ideal for continuously monitoring heart rate before, during, and after exercise or while a person is stationary.

- Hand grips do not require electrodes or clips.
- Easily shared between students.

Hand grips detect electrical pulses generated by the heart, wirelessly transmit a signal to the receiver module, and the individual's pulse or heart rate is calculated.



Recovery rate determined by monitoring heart rate

Chest Belt Transmitter

ORDER CODE CBT, $48

You can use our Chest Belt Transmitter in conjunction with the Hand-Grip Heart Rate Monitor's receiver for a hands-free option of measuring heart rate.

GREAT WAYS TO USE THESE SENSORS!

HUMAN PHYSIOLOGY
- Heart rate as a vital sign
- Heart rate and exercise
- Heart rate and blood pressure as vital signs
- Effect of coughing on heart rate
- Response to baroreceptor feedback

MIDDLE SCHOOL
- Heart rate and body position
- Heart rate and exercise

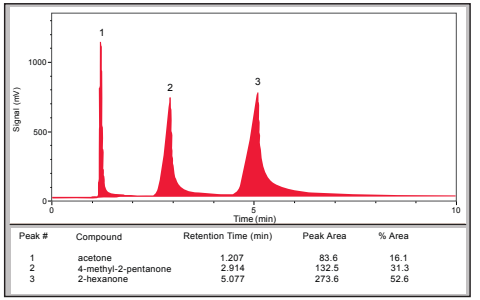
BIOLOGY
- Heart rate and physical fitness
- Ventilation and heart rate

NEW DESIGN Instrumentation Amplifier

$59 ORDER CODE INA-BTA

This newly designed sensor includes auto-ID functionality for each of the six ranges. New input bandwidth of 10 kHz allows the capture of higher frequency signals. The Instrumentation Amplifier monitors voltages from 20 mV to 1 V (DC or AC). It has several switch settings to allow you to select the best gain. It is typically used to amplify the chart recorder or analog output of any instrument, such as a third-party gas chromatograph.

RANGE SETTINGS: 0-20 mV, 0-200 mV, 0-1 V, ±20 mV, ±200 mV, ±1 V



Data collected using an Instrumentation Amplifier attached to a third-party gas chromatograph.

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USE
- Investigating resistivity
- Use to amplify signals from third-party laboratory instruments
- Use to replace a strip-chart recorder for recording instrument data

Ion-Selective Electrodes

$179 ORDER CODE SEE BELOW

Our Ion-Selective Electrodes (ISEs) are for monitoring four environmentally important ions: Nitrate (NO_3^-), Chloride (Cl^-), Calcium (Ca^{2+}), and Ammonium (NH_4^+).

- The Nitrate, Calcium, and Ammonium ISEs are combination-style, non-refillable, and gel-filled. The Chloride ISE is a solid state device; it does not have a replacement module.
- Vernier ISE membranes, like all other PVC ISE membranes, have a limited life expectancy. However, the replaceable module of Vernier ISEs allows you to simply discard the used membrane module, and replace it with a new one. For information about replacement modules, see page 117.
- Included with each ISE are two calibration standards and a short-term soaking bottle. To purchase additional standards, see page 117.

AMMONIUM ISE:
RANGE: 0.1 to 18,000 mg/L or ppm
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link): 0.7% of reading
10-bit (CBL, CBL 2): 2.8% of reading

CHLORIDE ISE:
RANGE: 1.8 to 35,000 mg/L or ppm
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link): 0.7% of reading
10-bit (CBL, CBL 2): 2.8% of reading

CALCIUM ISE:
RANGE: 0.2 to 40,000 mg/L or ppm
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link): 1.4% of reading
10-bit (CBL, CBL 2): 5.6% of reading

NITRATE ISE:
RANGE: 0.1 to 14,000 mg/L or ppm
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link): 0.7% of reading
10-bit (CBL, CBL 2): 2.8% of reading

Nitrate ISE
ORDER CODE NO3-BTA, $179

Calcium ISE
ORDER CODE CA-BTA, $179

Chloride ISE
ORDER CODE CL-BTA, $179

Ammonium ISE
ORDER CODE NH4-BTA, $179

Ion-Selective Electrodes require good chemical technique and careful calibration to obtain accurate results. They are not recommended for middle school students.

GREAT WAYS TO USE THESE SENSORS!

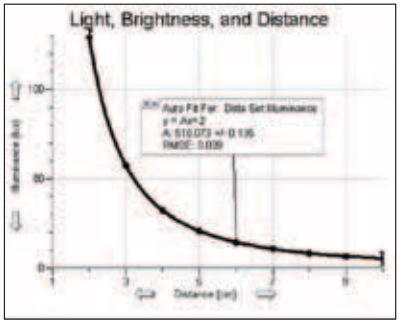
WATER QUALITY
- Calcium and water hardness
- Chloride and salinity
- Monitor ammonium concentration
- Monitor nitrate concentration

Light Sensor

$55 ORDER CODE LS-BTA

Our Light Sensor approximates the human eye in spectral response and can be used over three different illumination ranges, which you select with a switch. Use it for inverse-square law experiments, or for studying polarizers, reflectivity, or solar energy.

LOW RANGE:	MEDIUM RANGE:	HIGH RANGE:
0 to 600 lux	0 to 6000 lux	0 to 150,000 lux



Inverse square law of light

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Polarization of light
- Inverse square law

PHYSICAL SCIENCE
- Reflectivity of light
- Polaroid filters
- How bright is the light?

MATH
- Inverse square relationship
- Periodic phenomena

MIDDLE SCHOOL
- Reflectivity of light
- Schoolyard study

EARTH SCIENCE
- Reflection and absorption of light
- Photovoltaic cells
- Measuring particulates

Magnetic Field Sensor

$58 ORDER CODE MG-BTA

Use the Magnetic Field Sensor to study the field around permanent magnets, coils, and electrical devices.
- Sensitive enough to measure the Earth's magnetic field.
- Rotating tip allows you to measure both transverse and longitudinal magnetic fields.

LOW SENSITIVITY:	HIGH SENSITIVITY:
RANGE: -6.4 to +6.4 millitesla (mT)	**RANGE:** -0.32 to +0.32 mT

Measuring the magnetic field in a coil

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- The magnetic field in a coil
- The magnetic field in a slinky
- The magnetic field of a permanent magnet

PHYSICAL SCIENCE
- Electromagnets

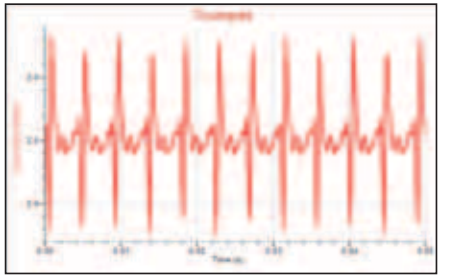
MIDDLE SCHOOL
- Mapping a magnetic field

EARTH SCIENCE
- Exploring magnetism
- Where is north?
- Searching for iron ore

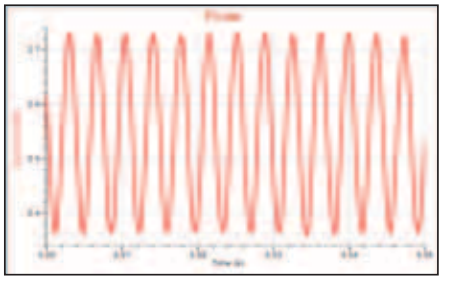
Microphone

$39 ORDER CODE MCA-BTA

Our Microphone can be used to display and study the waveforms of sounds from voices and musical instruments. It is also great for speed of sound experiments.



Waveform of a trumpet



Waveform of a flute

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Sound waves and beats
- Tones, vowels and telephones
- Investigate musical scales
- Speed of sound

MATH
- Sound waveform modeling

FORENSICS
- Identify the musical notes that make up the combination to a safe

NEW Mini GC

$1,749 ORDER CODE GC-MINI

The Vernier Mini GC gas chromatograph, lets students separate and identify compounds using newly patented technology that allows air to be used as a carrier gas. Analysis and peak integration may be performed using either LabQuest as a standalone device or with Logger *Pro* software on a computer.

FAMILIES OF COMPOUNDS THAT CAN BE USED IN THE MINI GC:
Alcohols, aldehydes, aromatic hydrocarbons, carboxylic acids, chlorinated hydrocarbons

MEMS DETECTOR:
The unique Seacoast Science MEMS Chemi-Capacitive Detector is state-of-the-art technology that allows air to be used as a carrier gas (three existing patents and one patent pending).

COLUMN:
High-quality Restek MXT-1 stainless steel capillary column (11 meter)

TEMPERATURE REGULATION:
Software-controlled temperature regulation from 30–120°C

COLUMN TEMPERATURE RAMP:
- Maximum of 10°C/minute
- Short warm-up time: <10 minute max for most labs

PRESSURE REGULATION:
Software-controlled pressure regulation from 1–21 kPa above ambient

INJECTION:
- Comes with one high-quality 1 µL Hamilton syringe, 7.3 cm stainless needle with non-coring beveled tip and needle guard, 3.8 cm injectable length
- Injection is direct from syringe to column
- 2 extra septa included with purchase (>150 injections/septa)
- Liquid injection volume: 0.01 to 0.50 µL

More details on pp. 34–35.

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY
- Using a gas chromatograph: identifying unknown compounds
- Verification of esterification
- Quantifying substances in a mixture
- Fractional distillation
- Investigating gas chromatography

Motion Detectors

Motion Detector

$79 ORDER CODE MD-BTD

The Motion Detector uses ultrasound to measure the position of carts, balls, people, and other objects.
- Measure objects as close as 15 cm and as far away as 6 m.
- Sensitivity switch reduces noise and produces higher quality data for studying dynamics carts on tracks.
- Attaches easily to the Vernier Dynamics System.
- Pivoting head allows for flexibility in the experiment setup.
- Can be used with LabQuest, LabQuest Mini, LabPro, and CBL 2.

RANGE:	RESOLUTION:	SENSITIVITY:
0.15 to +6 meters	1 mm	2 settings

Go! Motion

$99 ORDER CODE GO-MOT

The Go!Motion has the same features as our Motion Detector but connects directly to your computer or LabQuest by USB—no other equipment is needed. See page 95 for details.

RANGE:	RESOLUTION:	SENSITIVITY:
0.15 to +6 meters	1 mm	2 settings

Motion Detector Clamp

ORDER CODE MD-CLAMP, $7

The Motion Detector Clamp attaches to the back of the Motion Detector or Go! Motion. The clamp can be attached to a variety of objects, such as table tops and ring stands.

O_2 Gas Sensor

$188 ORDER CODE O2-BTA

The O_2 Gas Sensor measures oxygen concentration in air. The wide measurement range allows it to be used to study human and cellular respiration.
- Perform or complement many experiments conducted using the CO_2 Gas Sensor.
- Temperature compensated for use in different environments.
- Includes a 250 mL bottle that can be used to study the rusting of iron or as a respiration chamber for monitoring plants and insects.

RANGE: 0 to 27% (0 to 270 ppt)
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.01%
10-bit (CBL, CBL 2, NXT Adapter): 0.04%

BioChambers

BioChambers provide a way for both CO_2 Gas and O_2 Gas sensors to be used at the same time in a closed system.

BioChamber 2000, 2000 mL
ORDER CODE BC-2000, $19

BioChamber 250, 250 mL
ORDER CODE BC-250, $6

GREAT WAYS TO USE THIS SENSOR!

BIOLOGY
- Enzyme action: testing catalase activity
- Cell respiration in peas
- Effect of temperature on cold-blooded organisms
- Oxygen gas and human respiration
- Photosynthesis and respiration
- Measure O_2 along with CO_2 in photosynthesis and respiration

HUMAN PHYSIOLOGY
- Oxygen and aerobic metabolism
- Oxygen and extraction by the lungs
- Effect of "dead space" on oxygen availability

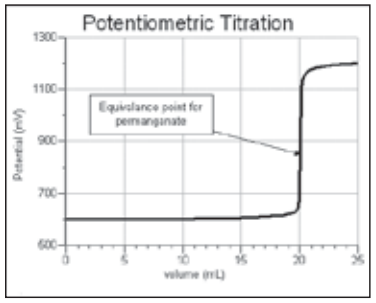
ORP Sensor

$79 ORDER CODE ORP-BTA

The Oxidation-Reduction Potential (ORP) Sensor lets you measure the ability of a solution to act as an oxidizing or reducing agent.

- Measure the oxidizing ability of chlorine in swimming pools or determine when the equivalence point has been reached in an oxidation-reduction reaction.
- Amplifier included.

RANGE: -450 to 1100 mV
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go! Link): 0.5 mV
10-bit (CBL, CBL 2, NXT Adapter): 2 mV



ORP mV vs. volume data for the titration of hydrogen peroxide solution with potassium permanganate

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY

- An oxidation-reduction titration: the reaction of Fe^{2+} and Ce^{4+}
- Potentiometric titration of hydrogen peroxide and permanganate
- Measure oxidizing potential of chlorine in swimming pools

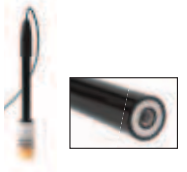
pH Sensor

$79 ORDER CODE PH-BTA

Our general purpose pH Sensor is an Ag-AgCl combination electrode. It can be used across disciplines, including chemistry, biology, middle school science, and environmental science.

- Includes a convenient soaking bottle and storage solution.
- Individually calibrated, with a range from 0 to 14 pH units.
- pH Buffer Capsules (ORDER CODE PHB, $12) and pH Storage Solution (ORDER CODE PH-SS, $16) are available.

RANGE: 0 to 14 pH units
RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.005 pH units
10-bit (CBL, CBL 2, NXT Adapter): 0.02 pH units



NEW Tris-Compatible Flat pH Sensor

$99 ORDER CODE FPH-BTA

This new specialty pH Sensor uses a double-junction electrode, making it compatible with Tris buffers and solutions containing proteins. The flat glass shape also makes it ideal for measuring the pH of semisolids such as food or soil.

GREAT WAYS TO USE THE pH SENSOR!

PH SENSOR (not Tris-Compatible):

CHEMISTRY

- Titration curves of strong and weak acids and bases
- Acid-base titration
- Titration of a diprotic acid: identifying an unknown
- Acid dissociation constant, K_a
- Microscale acid-base titration
- Investigating indicators
- Investigating buffers

MATH

- The exponential pH change
- An application of the logistic function

PHYSICAL SCIENCE

- Household acids and bases
- Acid rain

BIOLOGY

- Interdependence of plants and animals
- Watershed testing
- Physical profile of a lake

EARTH SCIENCE

- Soil pH
- Soil and acid rate
- Water treatment

Photogate and Accessories

Photogate

$45 ORDER CODE VPG-BTD

Use the Vernier Photogate to study free fall, rolling objects, collisions, and pendulums.

- Use the built-in laser detector to create a photogate through which you could drive a truck.
- Connect up to four gates in a chain.
- Includes an accessory rod for attachment to a ring stand or for adding the Ultra Pulley Attachment.

Photogate Accessories

Ultra Pulley Attachment

ORDER CODE SPA, $24

Add an Ultra Pulley to your Photogate to monitor motion as a string passes over the pulley or as the pulley rolls along a table.

Picket Fence

ORDER CODE PF, $7

Our Picket Fence has 8 opaque bars silk-screened at intervals of 5 cm directly onto clear plastic. These devices are especially good for dropping through a photogate to study free fall.

Cart Picket Fence

ORDER CODE PF-CART, $6

Attaches to Vernier Dynamics Carts.

See the next page for additional accessories.

GREAT WAYS TO USE THIS SENSOR!

PHYSICS

- Determining the acceleration due to gravity
- Determining the speed of a rolling object
- Measure acceleration in an Atwood's machine
- Measure pendulum periods

Photogate and Accessories

Laser Pointer

ORDER CODE **LASER, $19**

This Class IIIa (<5 mW) laser pointer can be used with the Vernier Photogate to produce a gate that is wider than the normal 7.5 cm spacing, making it possible to measure the speed of an automobile or of a person running. The laser case is made of aircraft aluminum, and uses two AAA batteries (included). The wavelength of the light is 650 nm.

Laser Pointer Stand

ORDER CODE **STAND, $14**

This light-weight tripod is a perfect support for the laser described above, which has a 1.1 cm outside diameter. The stand features fold-out legs and a clip attached to the adjustable ball. A socket head assembly securely holds the laser in place. This assembly allows you to accurately point the laser at the photogate. A VELCRO® strap, integrated into one of the tripod legs, allows you to attach the laser to objects, such as ring stands and railings.

Pulley Bracket

ORDER CODE **B-SPA, $12**

The Pulley Bracket attaches an Ultra Pulley to the end of a Vernier Dynamics Track.

NEW Photogate Bar Tape Kit

ORDER CODE **TAPE-VPG, $17**

The Photogate Bar Tape Kit contains a flexible plastic tape called "Bar Tape" and a guide that allows the tape to be used with a Vernier Photogate. The tape can be attached to objects and pulled through the photogate. This allows you to perform experiments much like what you would do with a "ticker tape timer."

Power Amplifier

$199 ORDER CODE **PAMP**

The Vernier Power Amplifier allows you to drive loads with +/-10 V and currents up to 1 A. Works with any waveform, including DC, sine, square, triangle, and sawtooth waveforms. The Power Amplifier can drive a variety of loads, including speakers, lamps, small DC motors, and RLC circuits.

- Utilizes internal feedback for accurate AC waveforms and DC levels.
- Can provide a steady, linearly controlled DC output for driving loads like DC motors, and precise AC waveforms for driving things like speakers.
- Current limited to protect against overload and shorting.
- Current monitor function allows you to log real-time load current.
- Class A-B Push-Pull Amplifier provides low distortion with good efficiency.
- Works with LabQuest, LabPro, and SensorDAQ

OUTPUT VOLTAGE SWING (AMPLITUDE): ±10 V
MAX. OUTPUT CURRENT: 1 A
FREQUENCY RESPONSE: DC-20 kHz (-3db @ 20 kHz, flat to ~15 kHz)
OUTPUT IMPEDANCE: <1 Ω

NEW Power Amplifier Accessory Speaker

ORDER CODE **PAAS-PAMP, $99**

This kit includes a speaker and accessories used with the Vernier Power Amplifier to study mechanical waves and springs. The speaker contains a light weight metal disc glued to the speaker cone. A drive post attached to the metal plate allows you to drive elastic materials such as strings and springs.

GREAT WAYS TO USE THIS SENSOR!

PHYSICS

- Produce standing wave patterns by vibrating one end of a string
- Investigate longitudinal resonance by oscillating a spring with a mass attached
- Study how resistance changes with heat by supplying a low frequency waveform to a incandescent lamp
- Study RC and RLC circuits

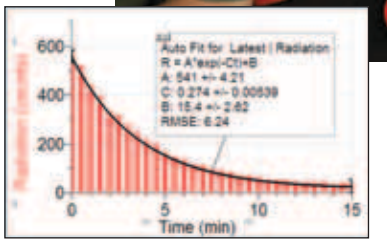
Radiation Monitor (Digital)

ALPHA, BETA, GAMMA

$254 ORDER CODE **DRM-BTD**

The Digital Radiation Monitor consists of a Geiger-Mueller tube and a digital rate meter mounted in a small, rugged, plastic case. The unit is battery operated and can be used with or without a computer for measurement of alpha, beta, and gamma radiation. It can be used to explore radiation statistics, measure the rate of nuclear decay, and monitor radon progeny.

Using the Digital Radiation Monitor to study low-level radiation from old Fiestaware®



Radioactive decay

GREAT WAYS TO USE THIS SENSOR!

PHYSICS

NUCLEAR RADIATION

- Distance and radiation
- Lifetime measurement
- Counting statistics
- Background radiation sources

CHEMISTRY

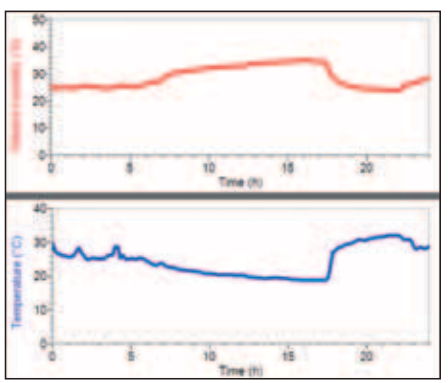
- Alpha, beta, and gamma
- Radiation shielding
- Determining the half-life of an isotope

Relative Humidity Sensor

$69 ORDER CODE RH-BTA

The Relative Humidity Sensor contains an integrated circuit that can be used to monitor relative humidity over the range of 0 to 95% (±5%). Use this sensor for weather studies, monitoring greenhouses, or for determining days when static electrical discharges could be a problem.

RANGE: 0 to 95%
TYPICAL ACCURACY: ±5%



Indoor relative humidity and temperature for a 24-hour period at Vernier

GREAT WAYS TO USE THIS SENSOR!

EARTH SCIENCE
- Air temperature and relative humidity

ENVIRONMENTAL SCIENCE
- A local weather study
- Ecocolumn investigations

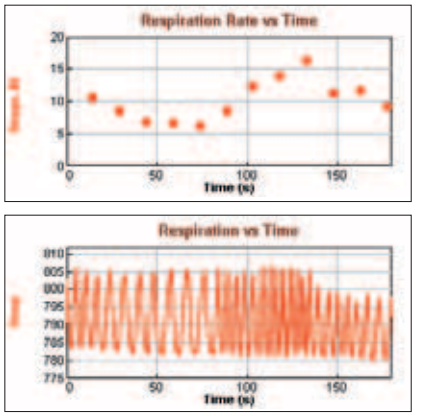
INNOVATIVE USES
- Relative humidity in caves
- Monitoring indoor relative humidity for health

Respiration Monitor Belt

$63 ORDER CODE RMB

(Requires GPS-BTA)

The Respiration Monitor Belt is used with our Gas Pressure Sensor (see below) to measure human respiration. Simply strap the belt around your chest and pump air into the belt with the hand bulb. You can then monitor the pressure associated with the expansion and contraction of your chest during breathing.



Monitoring respiration rate

Gas Pressure Sensor

ORDER CODE **GPS-BTA, $83**

This sensor is required for use with the Respiration Monitor Belt above. Details on page 105.

GREAT WAYS TO USE THIS SENSOR!

HUMAN PHYSIOLOGY
- Studying human respiration

BIOLOGY
- Control of human respiration

Rotary Motion Sensor

$169 ORDER CODE RMV-BTD

The Rotary Motion Sensor lets you monitor angular motion precisely and easily.

- Collect angular displacement, angular velocity, and angular acceleration data.
- Direction sensitive.
- Measure linear position to a fraction of a millimeter.

STANDARD RESOLUTION: 1.0° (angular velocity up to 30 rev/s)
HIGH RESOLUTION: 0.25° (angular velocity up to 7.5 rev/s)

Rotational Motion Accessory Kit

ORDER CODE **AK-RMV, $110**

This accessory kit is used to study the motion of a physical pendulum; the rotational inertia of disks, rings, and point masses; and the conservation angular momentum. The kit includes:

- Two 8.9 cm diameter, 0.6 cm thick solid aluminum disks
- One steel disk with 2.9 cm central hole
- One plastic hub to hold the steel disk on the 3-step pulley
- One 38 cm hollow aluminum rod
- One Ultra Pulley
- One Ultra Pulley Swivel Mount, which allows the pulley to be mounted on the Rotary Motion Sensor

For more details, visit **www.vernier.com/ak-rmv**

Rotary Motion Motor Kit

ORDER CODE **MK-RMV, $12**

This kit includes a small electric motor with pulley, rubber band belt, motor clip, and mounting screw. The motor can be attached to the Rotary Motion Sensor, and be used as an analog tachometer, or generator. You can also perform experiments that investigate motor efficiency in different conditions. For more details, visit **www.vernier.com/mk-rmv**

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Atwood's machine experiments
- Measuring moments of inertia
- Torque experiments
- Physical pendulum
- Conservation of angular momentum

Salinity Sensor

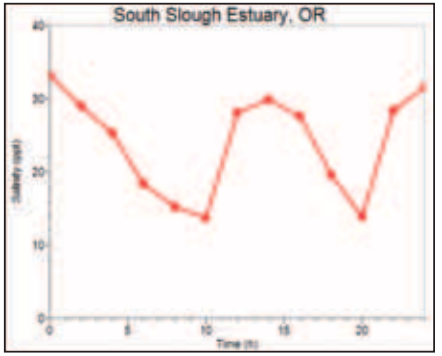
$92 ORDER CODE SAL-BTA

The Salinity Sensor easily and precisely measures the total dissolved salt content in ocean or brackish water.

- Measure water with a wide variety of salinities, from brackish water to ocean water, and even hyper-saline environments.
- Study how salinity affects buoyancy, or monitor salinity values in estuaries where fresh water mixes with salty ocean water.

RANGE: 0 to 50 ppt

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.02 ppt
10-bit (CBL, CBL 2, NXT Adapter): 0.08 ppt



Measuring salinity in an estuary

GREAT WAYS TO USE THIS SENSOR!

ENVIRONMENTAL SCIENCE
- Studying salinity in an estuary
- Measure salinity in ocean or brackish water

INNOVATIVE USES
- GIS mapping enhances salinity
- Investigating salinity levels
- Ionic and molecular compounds
- Find the relationship between conductivity and concentration

Soil Moisture Sensor

$95 ORDER CODE SMS-BTA

The Soil Moisture Sensor uses capacitance to measure the water content of soil. Simply insert this rugged sensor into the soil to be tested, and the volumetric water content of soil is reported in percent. Use it to conduct experiments in ecology, environmental science, agricultural science, horticulture, biology, and more.

RANGE: 0 to 100%

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.1%
10-bit (CBL, CBL 2, NXT Adapter): 0.4%

Monitoring changes in soil moisture in ecocolumns

GREAT WAYS TO USE THIS SENSOR!

EARTH SCIENCE
- Measure the loss of soil moisture over time due to evaporation and plant uptake
- Evaluate optimum soil moisture contents for various species of plants
- Monitor soil moisture content to control irrigation in greenhouses

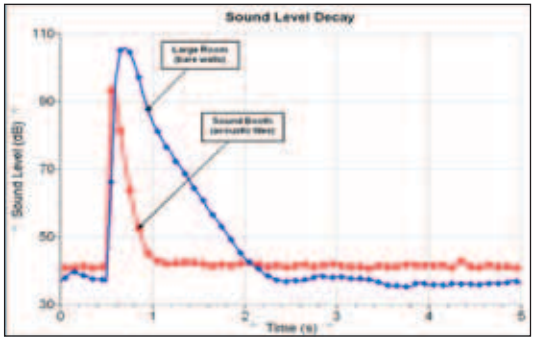
ENVIRONMENTAL SCIENCE
- Manage garden soil moisture
- Ecocolumn investigations
- Pollution study

Sound Level Meter

$165 ORDER CODE SLM-BTA

The Sound Level Meter is used to measure sound level in decibels (dB). An output port on the meter records sound level data. A switch on the meter is used to select dBA or dBC weighting. The Sound Level Meter also has an LCD panel, which allows you to use it as a standalone device. A dB range switch and a response switch provide flexibility in the standalone mode.

RANGE: 35 to 130 dB
ACCURACY: 1.5 dB at 94 dB
FREQUENCY RESPONSE: 31.5 to 8,000 Hz



Sound level decay in two rooms

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USES
- Study reverberation times
- Investigating airport noise
- Investigate room acoustics
- Measuring sound levels at a pep rally
- Investigate traffic noise
- Use for environmental noise studies

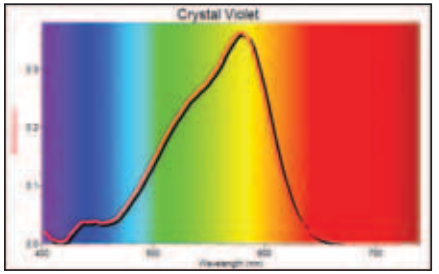
NEW AND IMPROVED
SpectroVis® Plus Spectrophotometer

$449 ORDER CODE SVIS-PL

The SpectroVis Plus has been improved with a wider range, higher resolution, and the addition of fluorescence. Details on pp. 40–41.

RANGE: 380-950 nm
Fluorescence excitation centered at 405 nm and 500 nm

RESOLUTION:
~2.5 nm optical resolution, 570 wavelengths, 1 nm reporting intervals



Absorbance spectrum of crystal violet

SpectroVis® Optical Fiber

ORDER CODE **SVIS-FIBER, $69**

Turn your SpectroVis spectrophotometer into an emissions spectrometer using the SpectroVis Optical Fiber insert. See **www.vernier.com/spectroscopy/accessories.html** for more information.

For more on spectrometers, see pp. 39-41.

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY
- Beer's law
- Kinetics studies
- Determine chemical composition based on absorption spectra

PHYSICS
- Emission spectra of gases
- Emission spectra of lamps

BIOLOGY
- Visible spectrum of chlorophyll
- Photosynthesis

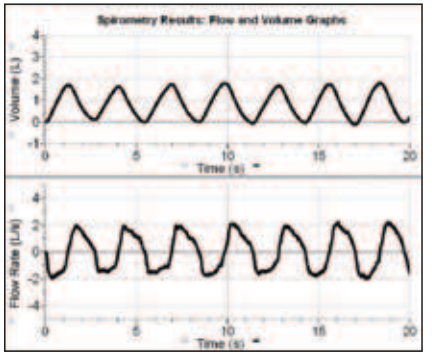
Spirometer

$199 ORDER CODE SPR-BTA

Use the Spirometer to perform a variety of tests related to air flow and lung volume.

- Designed to measure human respiration at rest and during moderate activity.
- Includes a removable flow head (22 mm ID/30 mm OD) for easy cleaning and sterilization, in addition to 5 disposable mouthpieces, 1 disposable bacterial filter, and 2 nose clips.

FLOW RANGE: ±600 L/min **DEAD SPACE:** 93 mL



Measuring lung volume

GREAT WAYS TO USE THIS SENSOR!

HUMAN PHYSIOLOGY
- Lung volumes and capacities
- Respiratory response to physiologic challenges
- Analysis of lung function
- Oxygen and aerobic metabolism

Spirometer Replacement Parts

Disposable Bacterial Filter
(pkg. of 10)

ORDER CODE **SPR-FIL, $30**

Use of the disposable microbacterial filter significantly reduces how often you will need to sterilize your spirometer's flow head. The filter's 30 mm ID opening allows for an easy, air-tight fit to the flow head.

Disposable Mouthpiece
(pkg. of 30)

ORDER CODE **SPR-MP, $10**

For a more sterile environment, use the cardboard mouthpieces to help eliminate the spreading of contagious material between students.

Noseclip *(pkg. of 10)*

ORDER CODE **SPR-NOSE, $10**

These plastic, foam-padded noseclips help increase the precision of your spirometry results by eliminating the escape of air through the nostrils during testing.

Extra Spirometer Flow Head

ORDER CODE **SPR-FLOW, $60**

An extra flow head eliminates equipment downtime while sterilizing your original flow head. The flow head consists of a polycarbonate outer body with a stainless-steel inner mesh.

Temperature Probes

Stainless Steel Temperature Probe

$29 ORDER CODE TMP-BTA

This rugged and durable temperature probe has a sealed stainless steel shaft and tip that can be used in organic liquids, salt solutions, acids, and bases.

RANGE: -40 to 135°C

12-bit Resolution (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ):
0.17°C (-40 to 0°C)
0.03°C (0 to 40°C)
0.1°C (40 to 100°C)
0.25°C (100 to 135°C)

10-bit Resolution (CBL, CBL 2, NXT Adapter):
0.68°C (-40 to 0°C)
0.12°C (0 to 40°C)
0.4°C (40 to 100°C)
1.0°C (100 to 135°C)

Extra-Long Temperature Probe

$72 ORDER CODE TPL-BTA

This probe has a 30-meter (100 ft) cable. It is designed for remote, outdoor temperature sensing or for measuring temperature at various depths in lakes and streams.

RANGE: -50 to +150°C

12-bit Resolution (LabQuest, LabQuest Mini, LabPro, Go!Link): 0.07°C
10-bit Resolution (CBL, CBL 2): 0.3°C

For USB temperature probes, see page 13.

GREAT WAYS TO USE THE STAINLESS STEEL TEMP PROBE!

CHEMISTRY
- Endothermic and exothermic reactions
- Freezing and melting of water
- Heat of fusion of ice
- Pressure-temperature relationship in gases
- Evaporation and intermolecular attractions

MIDDLE SCHOOL
- Heating of land and water
- The greenhouse effect
- Absorption of radiant energy

PHYSICS
- Newton's law of cooling

BIOLOGY
- Energy in food
- Biodiversity and ecosystems
- Aerobic respiration
- Dissolved oxygen *vs.* temperature

PHYSICAL SCIENCE
- Boiling temperature of water
- Freezing temperature of water
- Insulation

IMPROVED DESIGN Surface Temperature Sensor

$23 ORDER CODE STS-BTA

Featuring an exposed thermistor that results in an extremely rapid response time, the Surface Temperature Sensor is ideal for situations in which low thermal mass or flexibility is required, or for a skin temperature measurement. This new design allows for use in air and water.

RANGE: -25 to 125°C

12-bit Resolution (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ):
0.08°C (-25 to 0°C)
0.03°C (0 to 40°C)
0.1°C (40 to 100°C)
0.25°C (100 to 125°C)

10-bit Resolution (CBL, CBL 2, NXT Adapter):
0.3°C (-25 to 0°C)
0.12°C (0 to 40°C)
0.4°C (40 to 100°C)
1.0°C (100 to 125°C)

Infrared Thermometer

$159 ORDER CODE IRT-BTA

The Infrared Thermometer is a non-contact, fast-responding temperature measuring device. The sensor works by measuring the infrared radiation emitted by objects. You simply point the sensor at the object and read its temperature.

RANGE: -20 to 400°C

ACCURACY: ±3% of reading or ±3°C, whichever is greater at 18 to 28°C ambient operating temperature

EMISSIVITY: preset 0.95

GREAT WAYS TO USE THESE SENSORS!

SURFACE TEMPERATURE SENSOR:

HUMAN PHYSIOLOGY
- Warming function of nasal passageways
- Effect of vascularity on skin temperature recovery

INNOVATIVE USES
- Study the temperature variation in a room

INFRARED THERMOMETER SENSOR:

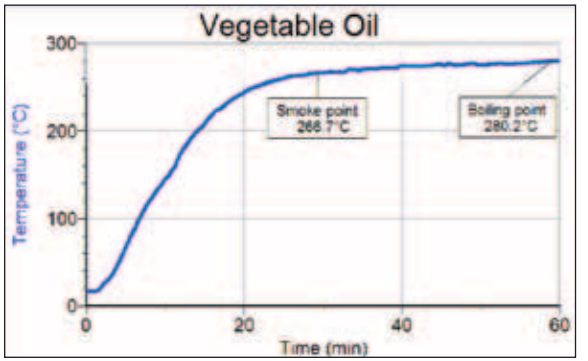
INNOVATIVE USES
- Measure the temperature of hard-to-reach objects
- Investigate skin temperature
- Compare the temperature of your palm, forearm, or foot
- Compare the temperature of cars parked in the sun

Wide-Range Temperature Probe

$64 ORDER CODE WRT-BTA

This temperature probe features a temperature range of -20°C to 330°C, which allows for melting point determinations of most organic compounds.
- Sealed, stainless-steel shaft can be used in organic liquids, salt solutions, acids, and bases.
- Long enough to extend into flasks and other common glassware.
- Narrow diameter allows it to fit snugly in openings designed for thermometers.

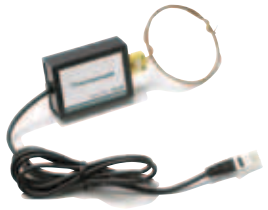
RANGE SETTINGS: -20 to 330°C
ACCURACY: ±0.1°C throughout the temperature range
12-bit Resolution: 0.1°C



Temperature of vegetable oil using a Wide-Range Temperature Probe

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY
- Fractional distillation
- Melting temperature of organic compounds
- Determining enthalpy of a chemical reaction
- Synthesis and analysis of aspirin



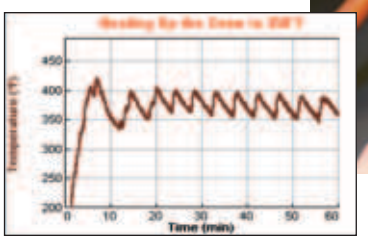
Thermocouple

$59 ORDER CODE TCA-BTA

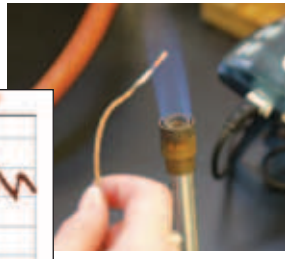
The Thermocouple uses type-K thermocouple wire to measure temperatures between -200˚C and 1400˚C.

- Measure liquid nitrogen temperatures at -196˚C and flame temperatures up to 1400˚C.
- Internal ice-point compensation means you do not need to place a reference wire in an ice-water bath.
- Individually calibrated.

RANGE:	TYPICAL ACCURACY:
-200 to 1400°C	0 to 900°C: ±2°C -200 to 0°C: ±5°C 900 to 1400°C: ±15°C



Temperature cycles of an oven using a Thermocouple



Taking temperature of an open flame

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USES

- Compare the temperature at different parts of a flame
- Compare the temperature of different flames
- Temperature cycles of an oven
- Monitor temperature of liquid nitrogen or dry ice
- Determine the melting point of copper or other solids

Turbidity Sensor

$112 ORDER CODE TRB-BTA

Use the Turbidity Sensor to measure the turbidity of freshwater or seawater samples in NTU (the standard unit used by most water collection agencies and organizations).

- Small, sleek design and simple setup make it easy to use at the collection site or in the classroom.
- Monitor precipitate formation or algae and yeast populations in chemistry and biology classes.
- Includes high-quality Hach StablCal™ 100 NTU standard for quick calibration and a high-grade glass cuvette for your water sample.

RANGE: 0 to 200 NTU

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link): 0.25 NTU
10-bit (CBL, CBL 2, NXT Adapter): 1.0 NTU

Measuring turbidity of a stream sample

GREAT WAYS TO USE THIS SENSOR!

WATER QUALITY
- Monitor water clarity

ENVIRONMENTAL SCIENCE
- Long term water monitoring
- Pollution study

EARTH SCIENCE
- Water quality: turbidity
- Water treatment

UVA and UVB Sensors

$106 ORDER CODE UVA-BTA

$107 ORDER CODE UVB-BTA

We have two different sensors for measuring the intensity of ultraviolet radiation. One responds primarily to UVA radiation (320 – 375 nm), and another responds primarily to UVB radiation (290 – 320 nm). UVB radiation is commonly associated with sunburns, cataracts, and skin cancer. UVA radiation, while responsible for suntans, is also a cause of premature aging of the skin and some types of skin cancer. Which sensor you use will depend upon the particular experiment you want to perform.

UVA SENSOR
Great for use with UV lamps.

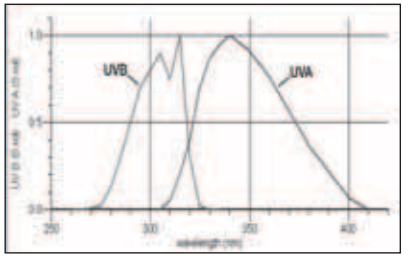
RANGE: 0 – 18,000 mW/m²
Wavelength sensitivity region approximately 320 – 375 nm
UV peak sensitivity: one volt per 3940 mW/m² at 340 nm

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 5 mW/m²
10-bit (CBL, CBL 2, NXT Adapter): 20 mW/m

UVB SENSOR
Great for use in the sun. Recommended for our lab books.

RANGE: 0 – 900 mW/m²
Wavelength sensitivity region approximately 290 – 320 nm
UV peak sensitivity: one volt per 204 mW/m² at 315 nm

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, Go!Link, SensorDAQ): 0.3 mW/m²
10-bit (CBL, CBL 2, NXT Adapter): 1 mW/m



Spectral response of the UV Sensors

GREAT WAYS TO USE THESE SENSORS!

EARTH SCIENCE
- Compare absorption in glasses
- Comparing sunscreens
- UV light and clothing

ENVIRONMENTAL SCIENCE
- Collect local weather data
- UV investigations

Voltage Probe

$12 ORDER CODE VP-BTA

This Voltage Probe can be used to measure the potential in direct-current or alternating-current circuits. In chemistry, physical science, or middle school science classes, the Voltage Probe can be used to measure voltages developed in a variety of electrochemical (voltaic) cells.

RANGE: -10 to +10 V

RESOLUTION:
12-bit (LabQuest, LabQuest Mini, LabPro, SensorDAQ): 0.005 V (5 mV)
10-bit (CBL, CBL 2): 0.020 V (20 mV)

"Lemon Juice" experiment from Middle School Science with Vernier

GREAT WAYS TO USE THIS SENSOR!

CHEMISTRY
- Establishing a table of reduction potentials: micro-voltaic cell
- Lead storage batteries

PHYSICS
- Capacitor charging

MIDDLE SCHOOL
- Fruit and metal voltaic cells

EARTH SCIENCE
- Photovoltaic cells
- Wind power

PHYSICAL SCIENCE
- Lead storage batteries

MATH
- Exponential models

NEW Watts Up Pro

$145 ORDER CODE WU-PRO

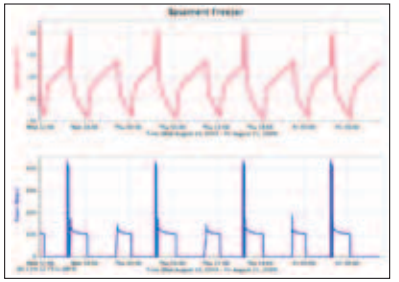
Watts Up Pro measures real-time energy use of common electrical devices. Find out which costs more: running a hairdryer for 10 minutes, or leaving on a lamp all afternoon? Measures potential, current, power, and cumulative cost.

- Connects to the USB port on your computer or LabQuest—no other devices needed.
- Use at the same time as a LabQuest, LabQuest Mini, LabPro, or Go!Link to monitor electricity usage in combination with other data, such as temperature, light, and relative humidity.
- The LCD panel on Watts Up Pro allows it to be used as a standalone device.

VOLTAGE: 120 V

MINIMUM MEASURABLE POWER: 0.5 watts

ACCURACY: ±1.5%, + 3 counts of the displayed value



Measuring temperature and power consumption in a basement freezer

GREAT WAYS TO USE THIS SENSOR!

INNOVATIVE USES
- Long-term monitoring of devices
- How can I save money?
- Investigate phantom load
- Compare energy use of different types of light bulbs
- Study energy use of different devices
- Analyze energy use of different wattage light bulbs

Wireless Dynamics Sensor System (WDSS)

$249 ORDER CODE WDSS

The WDSS combines a 3-axis accelerometer, force sensor, and altimeter into one unit that communicates wirelessly with your computer via Bluetooth®.

- Use it with your Bluetooth-enabled computer and Logger *Pro* to collect data free of friction due to cables.
- Internal data storage capacity allows you to use it as a standalone data logger. Great for roller coaster physics.

(Requires a Bluetooth-enabled computer and Logger Pro *software. See page 117 for Bluetooth Dongle.)*

WDSS accessories on next page.

INTERNAL DATA STORAGE CAPACITY: 240,000 points
MAXIMUM SAMPLING RATE: 1000 samples/s

FORCE	**RANGE:** ±50 N **RESOLUTION:** 0.006 N (<10 N) 0.03 N (>10 N)
ACCELEROMETERS *(for each axis)*	**RANGE:** ±50 m/s² (±5 g) **RESOLUTION:** 0.04 m/s²
ALTIMETER	**ALTITUDE CHANGE RANGE:** +/-200 m **RESOLUTION:** 1 m

Acceleration on a swing

GREAT WAYS TO USE THIS SENSOR!

PHYSICS
- Roller coaster accelerations
- Skateboarding
- Newton's second law
- Newton's third law
- Centripetal acceleration on a turntable or a merry-go-round
- Force and acceleration in simple harmonic motion

WDSS Accessories

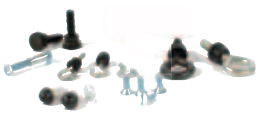
WDSS Rechargeable Battery

ORDER CODE **WDSS-BAT, $18**

The WDSS comes with a rechargeable battery. This battery is needed only if your rechargeable battery wears out or if you would like to have a spare on hand.

WDSS Accessory Kit

ORDER CODE **WDSS-ACC, $17**



These accessories are all included with a WDSS. This kit includes the most common pieces that might be misplaced.

- 6-inch aluminum rod with 1/4-20 stud
- Mounting plate for PASCO carts
- 3/4" 1/4-20 black screw
- #6-32 black nylon thumb nut
- 5/8" #10-24 binder bolt
- 1" #10-24 hex head bolt
- 1/4-20 eye bolt
- 1/4-20 black nylon thumb nut
- 1/2" #10-32 flat head screw (2)
- #6-32 threaded rubber bumper
- #6-32 hook
- 1/2" #6-32 aluminum standoff

Bluetooth USB Dongle Radio

ORDER CODE **BLUE-USB, $35**

Each computer used with a WDSS must have a Bluetooth radio. This convenient USB dongle adds Bluetooth capabilities to any Windows XP SP2, Vista, or Mac OS X 10.3 or newer computer that lacks Bluetooth.

ISE MODULES AND STANDARDS

Ion-Selective Electrodes require good chemical technique and careful calibration to obtain accurate results. They are not recommended for middle school or elementary students.

ISE Replacement Modules are available for Ammonium, Calcium, and Nitrate Ion-Selective Electrodes (see order codes in chart on right). Chloride does not need a replacement module.

Important: ***We recommend that you do not purchase ISE replacement modules too far in advance of their expected time of use; degradation occurs while replacement modules are stored on the shelf.***

SENSOR ACCESSORIES AND REPLACEMENT PARTS

PART NAME	ORDER CODE	PRICE
Blood Pressure Sensor		
Small Blood Pressure Cuff	CUFF-SM	$32
Large Blood Pressure Cuff	CUFF-LG	$35
Charge Sensor		
Electrostatics Kit	ESK-CRG	$109
High Voltage Electrostatics Kit	HVEK-CRG	$249

LabQuest Accessories

a. NEW LabQuest Charging Station
ORDER CODE **LQ-CRG, $99**

With four charging slots, the LabQuest Charging Station lets you charge and store your interfaces. The compact design uses desk space efficiently.

b. LabQuest Stand, ORDER CODE LQ-STN, $12

The portability of LabQuest allows it to be used in a variety of locations such as a work bench or at a desk. This stand allows you to set the LabQuest at different angles, which can improve the viewing angle. The stand also lifts the LabQuest off the workspace, which reduces the possibility of damage due to spills.

c. LabQuest Lanyard
ORDER CODE **LQ-LAN, $5**

The lanyard connects to the back of the LabQuest to secure it around your students' neck while they are in the field. It can also be attached to a calculator cradle and used with a LabPro or CBL 2. Best of all, you don't have to worry about students dropping their interface during field studies!

d. NEW WiFi USB Adapter
ORDER CODE **WIFI-USB, $59**

Add wireless connectivity to your LabQuest with the Vernier WiFi USB Adapter.
See **www.vernier.com/labqwifi** for details.

LABQUEST ACCESSORIES/CABLES/POWER SUPPLIES

PART NAME	ORDER CODE	PRICE
LabQuest Charging Station	LQ-CRG	$99
LabQuest Computer Cable	LQ-CB-USB	$5
LabQuest Power Supply	LQ-PS	$11
LabQuest Tether (Quantity 5)	LQ-TETH-5	$5
LabQuest Lanyard	LQ-LAN	$5
LabQuest Battery	LQ-BAT	$19
LabQuest 2GB SD Card	LQ-SD2	$12
LabQuest Stand	LQ-STN	$12
LabQuest Stylus (Quantity 5)	LQ-STYL-5	$5
LabQuest International Power Supply	LQ-PS-INTL	$16
LabQuest WiFi USB Adapter	WIFI-USB	$59

Do You Have Older Sensors?

ADAPTERS FOR OLDER VERNIER SENSORS

SENSOR	ADAPTER/CABLE	PRICE
Analog "-DIN" Sensor	DIN-BTA	$5
Motion Detector *(with removable cable)*	MDC-BTD *(cable)*	$5
ULI Motion Detector *(older, non-removable cable)*	CBL-RJ11	$5
Radiation Monitor *(older model)*	RAD-BTD *(cable)*	$5
Rotary Motion Sensor *(older model)*	ROT-BTD	$5
Vernier Photogate *(with removable cable)*	PG-BTD *(cable)*	$5

DIN-to-BTA Adapter

DIN-to-BTA Adapter, ORDER CODE **DIN-BTA, $5**

BTA-to-DIN Adapter, ORDER CODE **BTA-DIN, $5**

Our older analog sensors have a round "DIN" 5-pin plug. Our new sensors have a "BT" (British Telecom) connector. Do you have an older-style DIN sensor with a round 5-pin plug that you want to plug into a LabQuest, LabQuest Mini, LabPro, Go!Link, or CBL 2? You need a DIN-to-BTA adapter (pictured here). The sensor will not auto ID, but it will work just fine.

CABLES / ADAPTERS / POWER SUPPLIES

PART NAME	ORDER CODE	PRICE
AC Adapter *(for LabQuest or LabQuest Mini)*	LQ-PS	$11
AC Adapter *(for LabPro, CBL 2, or CBL)*	IPS	$12
Analog Sensor Extension Cable *(2 m)*	EXT-BTA	$12
Digital Sensor Extension Cable *(2 m)*	EXT-BTD	$12
Analog Protoboard Connector	BTA-ELV	$10
Digital Protoboard Connector	BTD-ELV	$10
Calculator-to-Calculator Link Cable	TI-CLC	$5
Short Calculator Link Cable	TI-SLC	$5
Go!Motion to Computer Cable	GMC-USB	$5
LabPro→USB Cable *(Mac or PC)*	CB-USB	$5
LabPro/CBL 2 Analog Cable	CB-BTA	$5
LabPro/CBL 2 Digital Cable	CB-BTD	$5
Mini-to-Standard USB Adapter	MINI-USB	$5
Motion Detector Cable *(LabQuest, LabPro or CBL)*	MDC-BTD	$5
Standard-to-Mini USB Adapter	USB-MINI	$5

PROFESSIONAL DEVELOPMENT

Dave Vernier leads a workshop for a group of physics teachers

About Our Trainers

Vernier's Professional Training Staff includes:

- 33 current or former classroom science and math teachers, all of whom have used Vernier equipment and software in their own classes.
- Teachers who, as a group, possess a total of 902 years of teaching experience, encompassing all subject areas and grade levels.
- Educators with prestigious teaching awards in their respective states and teaching subject areas, including seven Presidential Awardees, two Woodrow Wilson Dreyfus Master Teachers, three Tandy Technology Scholars, one Radio Shack Technology Awardee, one GTE Gift Awardee, one Excellence in Pre-College Physics Teaching Awardee, a variety of science educator of the year recipients in Arizona, Delaware, Kentucky, Maryland, New York, Oregon, South Dakota, Virginia, Washington and Wisconsin, and many other awards.
- Authors of more than 60 science books and lab manuals (including many of our own Vernier lab books).

Improving Teacher Effectiveness

Data-collection training gives teachers the skills to teach with the latest in sensor technology. All teachers will conclude their Vernier training with a certificate of completion indicating the number of hours spent in training. For more information on probeware and student achievement, see page 124.

Graduate Education Credit Available

Need to Earn Credit?

Attend one of our workshops that is four hours or longer, and you will have the opportunity to earn two (quarter) Graduate Science credit hours through the Portland State University Center for Science Education (approximate cost $170, payable to PSU). For more information on this professional development option, see **www.vernier.com/pd/graduatecredit.html**

Many states will offer Continuing Education Credit or clock hours for attendance at workshops held at professional conventions or at in-service training. We are happy to provide documentation of your attendance at any of our hands-on or demonstration workshops, hundreds of which are offered throughout the country each year. For more details, contact us at **pd@vernier.com**

FREE Hands-On, Data-Collection Workshops

LabQuest | Computer Data Collection

Join us for one of our free, 4-hour, hands-on workshops to learn how to integrate our computer and handheld, data-collection technology into your chemistry, biology, physics, middle school science, physical science, and Earth science curriculum. The workshops include lunch or dinner and lab handouts on CD. Contact us or visit our web site for up-to-date information and registration.

This is a great opportunity for teachers who

- Want to evaluate our award-winning, data-collection technology.
- Are new to data collection.
- Need a refresher course on their Vernier equipment.
- Want to learn from the experts.

One-Day Summer Workshops

LabQuest | Computer Data Collection

Join us for a day to learn how to integrate our data-collection technology into your chemistry, biology, physics, middle school science, physical science, and Earth science curriculum. These 6-hour, hands-on workshops include lunch and lab handouts on CD. The cost of the workshop is $99.

Registration form: **www.vernier.com/workshop/summer.html**

Two-Day Subject-Specific Institutes

HIGH SCHOOL

JUNE	JULY
San Antonio, TX	Chicago, IL

2 DAY

Physics

These 2-day, hands-on institutes give novice and experienced users an opportunity to explore the use of technology in the teaching of physics. The activities will be built around the use of Vernier sensors and software. Three major areas of exploration will be provided: One will focus on the features of Logger *Pro* software that are especially useful to physics teachers; e.g., the analysis of movies and the addition of vectors to graphs and movies. The second area will explore a variety of data-collection options; i.e., computers, LabQuest, wireless, and remote. The third area will give participants an opportunity to use each Vernier physics sensor in at least one traditional experiment, inquiry activity, or lab practical. The $199 registration fee includes a free copy of *Physics with Vernier.* For more information, go to **www.vernier.com/workshop/physics.html**

Biology/AP* Biology

These 2-day Biology/AP Biology Summer Institutes will feature hands-on training integrating technology into your biology and AP Biology classes. A variety of experiments will be offered, including many of the AP Biology lab activities recommended by The College Board. You will use LabQuest or a computer to collect and analyze data from classics like cell respiration, diffusion, and more. You will also be able to perform DNA gel electrophoresis and analyze the results using Logger *Pro* software. The $199 registration fee includes a free copy of *Advanced Biology with Vernier*. For more information, go to **www.vernier.com/workshop/apbiology.html**

AP* Chemistry

Vernier and Flinn Scientific will co-host these AP Chemistry hands-on technology institutes. During these two-day summer workshops, teachers will do many of the 22 experiments recommended by The College Board. These experiments will center around Vernier and Flinn equipment, supplies, and kits, and are from the Vernier-Flinn lab book, *Advanced Chemistry with Vernier*. The $199 registration fee includes a free copy of *Advanced Chemistry with Vernier*. For more information, go to **www.vernier.com/workshop/apchemistry.html**

* AP and Advanced Placement Program are registered trademarks of the College Entrance Examination Board, which was not involved in the production of and does not endorse this product.

COLLEGE

AUGUST
Washington, DC

2 DAY

College Physics

The 2-day College Physics Institute will survey all data-collection and video tools offered by Vernier. Participants will learn both basic and advanced skills in Logger *Pro*, including configuring graphs, performing custom curve fits, setting up calculated columns and customized data-collection modes. Video capture and analysis will be emphasized. Data collection will use LabQuest, LabQuest Mini, and wireless force sensors. All common physics sensors will be available, including rotary motion kits and optics devices. The $199 registration fee includes a copy of *Physics with Video Analysis.*

College Biology

In this 2-day, hands-on institute, participants will conduct a series of laboratory exercises that are designed for general biology at the college level. Areas of focus will include cellular respiration, enzyme kinetics, photosynthesis, and transpiration. Biotechnology topics will be presented by our partners, Bio-Rad Laboratories. In addition, new experiments will be offered that explore fluorescence spectroscopy and basic protein biochemistry using our new SpectroVis Plus Spectrometer/Fluorometer. Both basic and advanced training in Logger *Pro* and the use of LabQuest will be provided. Specific emphasis will be placed on how to conduct guided-inquiry based laboratory exercises at the college level. The $199 registration fee includes a copy of *Advanced Biology with Vernier.*

College Chemistry

Vernier and Flinn Scientific team up to present this College Chemistry Institute. As a participant, you will have the opportunity to conduct up to twelve different experiments in the two-day session. You will investigate many important topics in chemistry, including thermodynamics, kinetics, acid-base reactivity, and equilibrium. Your practice with data collection and analysis via computer and LabQuest will lead to an increased understanding of the sensors and software, as well as open your eyes to new and interesting ideas for hands-on activities in your laboratory. In addition, special experiments will be offered that explore spectroscopy and gas chromatography. The $199 registration fee includes a copy of *Advanced Chemistry with Vernier.*

FREE Hands-On Training at Conferences

Vernier will offer hands-on workshops at each of these conferences. For a full listing of our conference exhibits, check our web site at **www.vernier.com/workshop**

Vernier Workshop in Portland

We can conduct a one-day workshop at our office specially designed for you. The workshop can be training only (no charge) or it can include equipment as part of the cost. More information can be found at **www.vernier.com/workshop**

Vernier Workshop at Your School

We can come to your school to do a one-day, hands-on workshop using your Vernier equipment. This workshop can be computer or handheld-based data collection, in any science subject. The fee is $1300, which includes travel expenses. More information and an on-site workshop application can be found on our web site at **www.vernier.com/workshop**

Webinars

NEW FOR 2010!

Starting in January, we will be holding free, one-hour training events online. The presenter will give a tour of Vernier products and answer questions. You can follow along with your own equipment or simply watch and learn. Sessions are broadcast live on the web. All you need is a broadband internet connection and a phone line. Recorded versions will also be available for download. To see a schedule of upcoming events, visit the training section of our web site at **www.vernier.com/webinars**

LivePhoto Physics Workshops

This multiple day workshop is for college and university faculty and instructional staff. The five-day workshop will be held in Portland, OR in July. For more information, go to **http://livephoto.rit.edu/workshops**

Additional Workshops

For information on independent workshops that provide great instruction in the use of Vernier products, go to **www.vernier.com/workshop/independent.html**

GENERAL INFO

Why Choose Vernier?
Products and service that set us apart

Developed by Teachers, for Teachers
We understand the concerns of teachers, and we work hard to make your job easier. Our product development and technical support staff have over 100 years of teaching experience. We understand your concerns because we've been there.

Versatility that Translates into Savings
Vernier gives you more freedom of choice than any other probeware company. We offer state-of-the-art technology with the Vernier LabQuest. We offer a wide array of low-cost solutions with our Go! products and our new LabQuest Mini. And we offer the Vernier LabPro, which can be used with computers or TI graphing calculators.

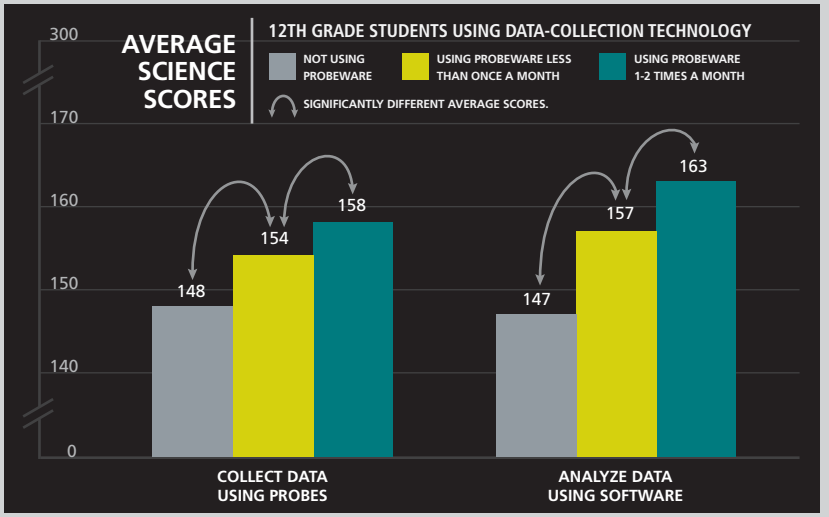
Generous Warranty that Lets You Buy with Confidence
Vernier's 5-year warranty gives you a superior level of buying confidence. In fact, in Vernier's 29 years of business, we have rarely charged a customer for a repair, no matter how old the equipment!

Logger *Pro* 3 Site License Offers Tremendous Value
Purchase our award-winning Logger *Pro* 3 software, and you are entitled to install the program on every computer in your school or college department AND give it to your students to use on their home computers. Excited? There's more.

Logger *Pro* 3 contains all the functions of Graphical Analysis software, including calculator-import and manual-entry data analysis features. That translates into the lowest total cost of software ownership in the education market, with access for every educator and student in your school. No other company offers such a generous site license policy. That's value!

Extraordinary Customer Service and Technical Support

When you call Vernier, you'll talk to a former teacher, a lab book author, or a technical expert. You'll speak with people who are passionate about education, science, and helping students succeed. What's the best part? You won't ever talk to sales representatives—just educators and people committed to extraordinary customer service for teachers.



Source: The 2000 NAEP Science Assessment. This study of 49,000 U.S. students shows that students who used probeware to collect and analyze data scored significantly higher on tests than those who did not.

Go to **www.vernier.com/research** for more details

New to Data Collection?

Why Should I Use Data-Collection Technology?

Data collection and analysis helps teachers increase students' critical thinking skills through hands-on learning. Students achieve higher test scores when probeware is included in engaging curricular activities.

Data-collection technology:

- Improves student understanding of science concepts.
- Frees class time for student engagement in higher-order thinking skills, such as analysis, synthesis, and evaluation.
- Supports STEM education and priorities outlined under ARRA and Race to the Top.
- Enables students to perform many new experiments with measurements not previously obtainable in the classroom.
- Increases test scores in science.
- Is recommended by national organizations, including NSTA, ISTE, ASTE, and IB.
- Encourages inquiry-based lab activities.
- Supports National Science Education Standards.

Request a White Paper on Probeware in Science

Hands-on science using Vernier technology gets students excited about science and deepens their understanding of complex concepts. It gives students the tools to analyze data and think like real scientists. For more on Probeware in Science, request our White Paper by e-mailing us at **whitepaper@vernier.com**

"Technology is needed…not just to give students exposure to the technology or to satisfy parents; technology greatly improves learning and supports science education standards that are difficult to teach without using technology."

Metcalf, S. J., & Tinker, R. 2003

TEEMSS: Technology Enhanced Elementary and Middle School Science, Annual Meeting of the National Association for Research in Science Teaching, March 23-26, 2003, Philadelphia

Vernier Grant Writing Guide

Looking to fund a state-of-the art science lab? Vernier has gathered a variety of resources to keep you informed with up-to-date details on available grants, and tips for writing a winning grant proposal.

Articles in the Vernier Grant Writing Guide include:

- Working with Your Idea
- Finding a Funding Source
- Writing Your Proposal
- Getting Help
- Supporting Your Idea
- Following Up on Your Grant

This guide will help you write a successful grant proposal and provide you with information on available funding sources.

Vernier / NSTA Technology Award

Win One of Seven Awards

Full-time science teachers from elementary to college level are eligible to apply for the Vernier Software & Technology/NSTA Technology Award. Vernier will provide up to seven awards, each valued at $3000, for educators who demonstrate innovative uses of data-collection technology using a computer, graphing calculator, or other handheld device in the science classroom.

The awards will be given to one elementary teacher, two middle school teachers, three high school teachers, and one college-level educator. Each will receive a $1,000 cash award, $1,000 in Vernier equipment, and $1,000 towards travel and expenses to attend NSTA's National Convention in 2011.

Go to **www.vernier.com/grants/nsta.html** for guidelines, a grant application, and profiles of previous winners.

Terms and Conditions

Vernier Site License
We have a very generous site license policy. The purchase of one copy of any Vernier program entitles you to install it on every computer in your school or your college department. Purchasers of Logger *Pro*, Logger Lite, and Graphical Analysis are also permitted to distribute these programs to their students or teachers for home use.

Other Software
NI LabVIEW Education Edition, Davis WeatherLink, WeatherLink IP, for Vantage Pro, Fathom Dynamic Data, InspireData, ProScope HR software, and software from Texas Instruments are licensed under separate agreements by their respective companies.

Technical Support
We are readily available to help you with individual questions about our software and hardware—simply e-mail info@vernier.com or call us on our toll-free number: 888-837-6437.

We publish a periodic newsletter, *The Caliper*, with information on upgrades, suggestions for new ways to use our programs, and announcements of new products.

Preview Policy
Most Vernier products are available for a 30-day preview (or longer) to educational institutions.

Satisfaction Guarantee
Any product that does not meet your needs may be returned within 30 days for a full refund, subject to the Equipment Return policy stated below. Equipment returned after 30 days may be subject to a restocking fee.

Warranties
Most Vernier products carry a five-year limited warranty as described in the user guide. Consumables associated with Vernier products are excluded from the warranty. All products manufactured by other companies carry the warranties provided by those companies and are not subject to a separate warranty by Vernier. In our 29 years, we have rarely charged a customer for repair, no matter how old the equipment!

Equipment Return
A Return Merchandise Authorization, available from Vernier, is required for any product return. Equipment returned for exchange or credit must be in new condition and in its original packaging. Items returned after 30 days of purchase may be subject to a restocking fee.

Product Usage
All Vernier products are designed for educational use only. Our equipment is not designed nor recommended for research or for any industrial or commercial process, such as life support, patient diagnosis, control of a manufacturing process, or industrial testing of any kind.

International Sales
Most sales of Vernier products outside the U.S. and Canada are handled by Vernier International, 5026 Calle Minorga, Sarasota, FL 34242, 941-349-1000, fax 941-349-2766, **www.vernier-intl.com**, info@vernier-intl.com

Sales in Canada are handled by Merlan Scientific, 6050 Tomken Rd., Mississauga, ON Canada L5T 1X8, phone 905-564-1080, toll free 800-387-2474, fax 800-374-6714, **www.merlan.ca**, info@merlan.ca

Prices and Shipping
Prices are effective January 1, 2010 and supersede any previously published prices. Prices are in U.S. dollars and are F.O.B. Shipping Point. Shipping charges may vary, depending on method of shipment. Prices are subject to change without notice.

Legacy Products
We have products for older Macintosh and PC computers. Contact us for details.

Trademarks
Logger *Pro*, LabQuest, LabPro, SpectroVis, SensorDAQ, Vernier and caliper design, Go!, Logger Lite, Vernier EasyLink, Vernier EasyTemp, and Vernier EasyData are our registered trademarks in the United States. Vernier Software & Technology, vernier.com, DataMate, BlueView, and Graphical Analysis are our trademarks or trade dress.

Calculator-Based Laboratory, CBL 2, Calculator-Based Ranger, CBR 2, ViewScreen, TI-Presenter, TI Connect, TI Navigator, SmartView, TI-Nspire, Cabri Jr., Teachers Teaching with Technology, and T^3 are trademarks of Texas Instruments.

National Instruments, NI, LabVIEW, and NI LabVIEW Education Edition are trademarks or trade names of National Instruments Corporation.

LEGO and MINDSTORMS are trademarks of the LEGO Group. Fathom Dynamic Data and the Fathom logo are trademarks of KCP Technologies, Inc.

All other marks not owned by us that appear herein are the property of their respective owners, who may or may not be affiliated with, connected to, or sponsored by us.

Vernier has been selling science software and data-collection hardware since 1981. We pride ourselves on the quality and affordability of our products and our service to our customers. If, at any time, you are unhappy with any of our products or service, please call, write, or e-mail.

GONE GREEN

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ is the nationally accepted benchmark for design, construction and operation of high-performance green buildings. Here are just a few examples of our practices.

SOLAR PANELS
We have installed 17,000 watts of solar panels.

ALTERNATIVE TRANSPORTATION
All employees are provided with free transit passes and are encouraged to walk, bike, carpool, or take public transport to work.

WORM BIN COMPOSTING
Vernier employees compost food scraps and yard clippings using a colony of red wiggler worms.

RECYCLING
We recycle everything we can: paper, magazines, aluminum, cardboard, CDs, and more.

PACKING MATERIALS
Employees use boxes and packing materials over and over again.

LIGHTING
We've installed energy saving, compact fluorescent bulbs in most of our fixtures.

LEED-EB GOLD RATING
In 2006, our building qualified for the second highest rating possible, with 50 points.

FSC Mixed Sources
Product group from well-managed forests, controlled sources and recycled wood or fiber
Cert no. SW-COC-002180

Why Choose the Vernier LabQuest?

- Sample data at 100,000 samples per second
- Download over 400 teacher-tested experiments FREE using the Lab Organizer
- Get started quickly with free Logger Lite software
- Choose from 66 compatible sensors
- Buy with confidence knowing LabQuest is backed by a 5-year warranty

For a full list of features see pp. 3–9

NEW LabQuest now supports the following sensors:
- Vernier Mini GC
- Watts Up Pro
- Tris-Compatible Flat pH Sensor

NEW WiFi Adapter
Add wireless connectivity with the Vernier WiFi USB Adapter (WIFI-USB $59). See our web site **www.vernier.com/labqwifi** for details.

www.vernier.com/labquest
Take the LabQuest product tour and watch a video demonstration with Dave Vernier.

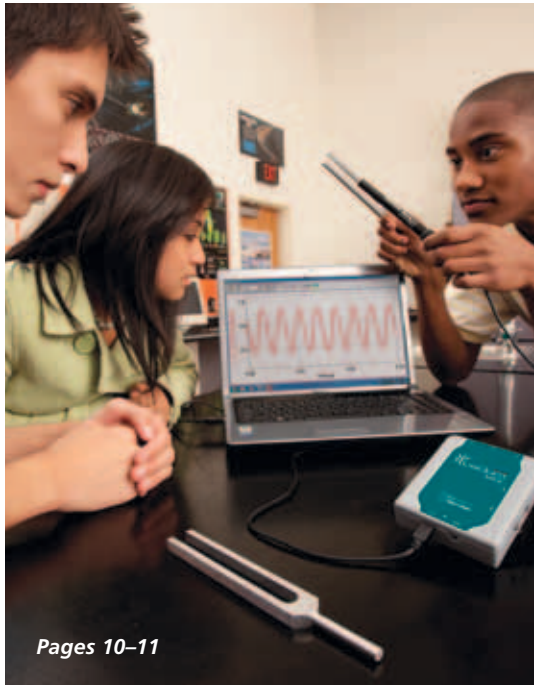
"I have used Vernier technology for nine years. Every telephone call, from ordering, asking a question, or solving a problem, is handled capably and professionally, with friendliness and good humor. The technical support team leave me feeling as if my problem is important…and they leave me with a little more knowledge at the end of the call too."

- Cathy Theisen, Richfield High School, Richfield, MN



Pages 10–11
